Re: Case No. PU-17-364

NSP Renewable Resource Cost Recovery (2018)

On September 29, 2017 Northern States Power Company (NSP) filed an application for approval of its 2018 Renewable Resource Cost Recover Rider (RER) rate.

On December 20, 2017, the commission issued an order approving the rate as filed by NSP.

On December 22, 2017, NSP filed its compliance filing for the 2018 annual update of its RER rate.

The resulting customer billing surcharge for 2018 is 0.0285 cents per kWh for all retail sales, which is a decrease of 0.0613 cents per kWh from the surcharge billed in 2017.

The billing effect for a typical residential customer without electric space heating using 750 kWh per month would be a decrease of 46 cents per month.
