July 10, 2018

Dean K. Moos
Director- Reclamation Division
Public Service Commission
600 East Boulevard, Dept. 408
Bismarck, ND 58505-0480

Dear Director Moos,

The following pages will address the changes requested in the technical review of Bond Release NO. 1 to Permit GRGR-p501 at the Stony Creek Mine dated June 20, 2018.

Application changes:

1. The date and updated acreage amount have been changed.
2. The bond reduction has been changed to reflect new worst case bond calculations.
3. The box on page three referring to the vegetation contributed to stream flow or runoff has been checked.

Attachment I - Sections Breakdown

Interstate Engineering has supplied us with the updated Metes and Bonds description certified by a Registered Land Surveyor.

Attachment II - Metes and Bounds Description

Interstate Engineering has supplied us with the metes and bounds description for the original bond release boundary drawing with the revised bond release drawing.

Attachment V - Aerial Photograph

Interstate Engineering has provided an aerial photo showing the most recent excavation along with the updated boundaries, and revised heading.

Attachment VI - Topography and Cell Boundaries

Interstate Engineering has updated the headings, book marks replacing the word Tract with Permit, inserted the word Waste and replaced the boundary as revised on April 9, 2018.

Attachment VII – General Information

There were numerous changes to the general information and a red lined copy indicating those changes is attached along with the final version.

Interstate Engineering provided Attachment Vlii with the revised bond release boundary.

Attachment - VIII

The legal description has been changed to include the term "portions of."

Attachment IX - Bond Calculation

This attachment is a new addition to the bond release package and includes several attachments related to the mining plan, reclamation sequence and worst case bond calculations. You will find:

- a. Narrative for the bond release calculations- General Information
- b. Table O-1 updated Mining and Reclamation Sequence
- c. An updated Mine Map – D
- d. The worst case bond estimate calculations on pages R-7 ad R-8
- e. Updated mining narrative Pages O-1 and O-5. The reclamation waive may not be necessary according to this revised plan.
- f. Table E-1

Please contact me with any questions or recommendations.

Sincerely,

Cherie Harms

President
