RELEASE OF BOND
FOR SURFACE COAL MINING AND RECLAMATION OPERATIONS

February 6, 2019

Based on the application for **Bond Release Number 1 to Surface Coal Mining Permit GRGR-0501**, filed September 29, 2017 and all information and documentation contained therein, the North Dakota Public Service Commission finds that:

1. Copies of all letters sent by the Permittee as required by NDCC §38.14.1-17(1)(b) have been made part of the Application for Release of Bond. Copies of the newspaper advertisement required by NDCC §38.14.1-17(1)(a), and an affidavit of publication have been filed. The last date of publication was March 21, 2018.
2. On March 21, 2018, the Commission conducted an inspection and evaluation of the reclamation work involved in this bond release as required by NDCC §38.14.1-17(3). The surface owners, agents, or lessees were given notice of the bond release inspection and had the opportunity to participate with the Commission in conducting the inspection of the bond release tract at the Stony Creek Mine.

In accordance with NDCC §38.14.1-17, Bond Release No. 1 for Surface Coal Mining Permit GRGR-0501 is hereby granted to Leonardite Products, LLC effective March 8, 2019, unless a formal hearing is requested. Release in the amount of \$111,257 is approved. The area is described by a metes and bounds description and as follows:

A portion of the W½ of Section 8, T154N, R100W, Williams County,
releasing all reclamation liabilities on 15.15 acres.

The decision to release all of the bond on this acreage is made for the following reason:

An industrial postmine land use for long-term waste disposal activities has been implemented in accordance with the approved reclamation plan and all other applicable reclamation requirements have been satisfied. The area will be used by Will Chamley, doing business as Eco Park Landfill, LLC, for the long-term disposal of inert waste under a waste disposal permit issued by the North Dakota Department of Health.
