CHAPTER 69-06-08

69-06-08-01. Energy conversion facility siting criteria.

The following criteria must guide and govern the preparation of the inventory of exclusion and avoidance areas, and the site suitability evaluation process.

1. **Exclusion areas.** The following geographical areas must be excluded in the consideration of a site for an energy conversion facility.
 - a. Designated or registered national: parks; memorial parks; historic sites and landmarks; natural landmarks; historic districts; monuments; wilderness areas; wildlife areas; wild, scenic, or recreational rivers; wildlife refuges; and grasslands.
 - b. Designated or registered state: parks; forests; forest management lands; historic sites; monuments; historical markers; archaeological sites; grasslands; wild, scenic, or recreational rivers; game refuges; game management areas; management areas; and nature preserves.
 - c. County parks and recreational areas; municipal parks; parks owned or administered by other governmental subdivisions; hardwood draws; and enrolled woodlands.
 - d. Prime farmland and unique farmland, as defined by the land inventory and monitoring division of the soil conservation service, United States department of agriculture, in

7 C.F.R. part 657; provided, however, that if the commission finds that the prime farmland and unique farmland that will be removed from use for the life of the facility is of such small acreage as to be of negligible impact on agricultural productions, this exclusion does not apply.

- e. Irrigated land.
- f. Areas critical to the life stages of threatened or endangered animal or plant species.
- g. Areas where animal or plant species that are unique or rare to this state would be irreversibly damaged.
- h. Areas within one thousand two hundred feet of the geographic center of an intercontinental ballistic missile (ICBM) launch or launch control facility.

2. **Additional exclusion areas for wind energy conversion facilities.** The following geographical areas must be excluded in the consideration of a site for a wind energy conversion facility:

a. Areas ~~less than~~within:

- (1) One and one-tenth times the height of the turbine from interstate or state roadway right of way;
- (2) One and one-tenth times the height of the turbine plus seventy-five feet from the centerline of any county or maintained township roadway;
- (3) One and one-tenth times the height of the turbine from any railroad right of way;
- (4) One and one-tenth times the height of the turbine from a one hundred fifteen kilovolt or higher transmission line; and
- (5) One and one-tenth times the height of the turbine from the property line of a nonparticipating landowner and three times the height of the turbine from an inhabited rural residence of a nonparticipating landowner, unless a variance is granted. A variance may be granted if an authorized representative or agent of the permittee, the nonparticipating landowner, and affected parties with associated wind rights file a written agreement expressing all parties' support for a variance to reduce the setback requirement in this subsection. A nonparticipating landowner is a landowner that has not signed a wind option or an easement agreement with the permittee of the wind energy conversion facility as defined in North Dakota Century Code chapter 17-04.

3. **Avoidance areas.** The following geographical areas may not be approved as a site for an energy conversion facility unless the applicant shows that under the circumstances there is no reasonable alternative. In determining whether an avoidance area should be designated for a facility the commission may consider, among other things, the proposed management of adverse impacts; the orderly siting of facilities; system reliability and integrity; the efficient use of resources; and alternative sites. Economic considerations alone will not justify approval of these areas. A buffer zone of a reasonable width to protect the integrity of the area must be included. Natural screening may be considered in determining the width of the buffer zone.

- a. Historical resources which are not designated as exclusion areas.
- b. Areas within the city limits of a city or the boundaries of a military installation.

- c. Areas within known floodplains as defined by the geographical boundaries of the hundred-year flood.
 - d. Areas that are geologically unstable.
 - e. Woodlands and wetlands.
 - f. Areas of recreational significance which are not designated as exclusion areas.
4. **Additional avoidance areas for wind energy conversion facilities.** A wind energy conversion facility site must not include a geographic area where, due to operation of the facility, the sound levels within one hundred feet of an inhabited residence or a community building will exceed fifty dBA. The sound level avoidance area criteria may be waived in writing by the owner of the occupied residence or the community building.
5. **Selection criteria.** A site may be approved in an area only when it is demonstrated to the commission by the applicant that any significant adverse effects resulting from the location, construction, and operation of the facility in that area as they relate to the following, will be at an acceptable minimum, or that those effects will be managed and maintained at an acceptable minimum. The effects to be considered include:
- a. The impact upon agriculture:
 - (1) Agricultural production.
 - (2) Family farms and ranches.
 - (3) Land which the owner demonstrates has soil, topography, drainage, and an available water supply that cause the land to be economically suitable for irrigation.
 - (4) Surface drainage patterns and ground water flow patterns.
 - (5) The agricultural quality of the cropland.
 - b. The impact upon the availability and adequacy of:
 - (1) Law enforcement.
 - (2) School systems and education programs.
 - (3) Governmental services and facilities.
 - (4) General and mental health care facilities.
 - (5) Recreational programs and facilities.
 - (6) Transportation facilities and networks.
 - (7) Retail service facilities.
 - (8) Utility services.
 - c. The impact upon:
 - (1) Local institutions.
 - (2) Noise-sensitive land uses.
 - (3) Light-sensitive land uses.

- (4) Rural residences and businesses.
 - (5) Aquifers.
 - (6) Human health and safety.
 - (7) Animal health and safety.
 - (8) Plant life.
 - (9) Temporary and permanent housing.
 - (10) Temporary and permanent skilled and unskilled labor.
- d. The cumulative effects of the location of the facility in relation to existing and planned facilities and other industrial development.
6. **Policy criteria.** The commission may give preference to an applicant that will maximize benefits that result from the adoption of the following policies and practices, and in a proper case may require the adoption of such policies and practices. The commission may also give preference to an applicant that will maximize interstate benefits. The benefits to be considered include:
- a. Recycling of the conversion byproducts and effluents.
 - b. Energy conservation through location, process, and design.
 - c. Training and utilization of available labor in this state for the general and specialized skills required.
 - d. Use of a primary energy source or raw material located within the state.
 - e. Not relocating residents.
 - f. The dedication of an area adjacent to the facility to land uses such as recreation, agriculture, or wildlife management.
 - g. Economies of construction and operation.
 - h. Secondary uses of appropriate associated facilities for recreation and the enhancement of wildlife.
 - i. Use of citizen coordinating committees.
 - j. A commitment of a portion of the energy produced for use in this state.
 - k. Labor relations.

2. Contributions for temporary employees must be submitted no later than the sixth working day of the month for the previous month's salary.
3. Delinquent payments of over thirty days, for reasons other than leave of absence or seasonal employment, will result in termination of eligibility to participate as a temporary member.

71-02-03-02.5. Costs.

If purchasing under North Dakota Century Code section 54-52-02.6 or subdivision d of subsection 1 of North Dakota Century Code section 54-52-17.4, the cost will be the higher of the amount refunded to the member plus interest at the actuarial rate of return or the actuarial cost to provide the credit. All other types of service purchases must be actuarially determined. An actuarial cost must be calculated by applying actuarial factors to the amount of retirement and retiree health insurance credit being purchased by the member. The member's current age, average salary, ~~and current credited service,~~ and actuarial factors on record and in effect with the North Dakota public employees retirement system in the month in which the member's written request is ~~received~~ processed by the office must be used in the cost calculation. A member's written request must be processed by the office within sixty days of receipt. The amount of retirement and retiree health insurance credit being purchased must be calculated using the benefit formulas in place at the time the written request ~~is received~~ from the member is processed by the office. When calculating the cost, enhancements to the benefit formula must be considered to be in place at the time the law is signed by the governor.

The member's average salary shall be calculated as follows:

1. For members working full time with more than twelve months of service credit, by using the calculation found in subsection 2 of North Dakota Century Code section 54-52-17.
2. For members working full time with less than twelve months of service credit, by using the calculation found in subsection 2 of North Dakota Century Code section 54-52-17, but disregarding any month in which the member was paid less than a full-month salary. A full-month salary is the compensation the member and the member's employer agreed the member would be paid for working a full month.
3. For members who have not yet received a full-month salary, the member's average salary shall equal the member's full-month salary, as defined in subsection 2.
4. For members working part time, by using the applicable calculations found in subsections 1 and 2, but using a monthly salary equal to the equivalent of the salary the member would have received if the member was working full time.

The retirement board must adopt actuarial assumptions necessary to determine the actuarial factors for the cost calculation. The assumptions must be reviewed concurrently with the assumptions for the retirement program.

Upon receipt of the written request from the member, and all required documentation, a written cost confirmation must be prepared and mailed to the member. The cost stated in the confirmation letter is valid for a period of ninety days from the date of the letter unless the contributor terminates employment with a participating employer. If the contributor terminates employment, then the cost stated in the confirmation letter is valid only until the earlier of the end of the ninety-day period or the fifteenth day of the month following the month of termination.

the executive director. For members transferring from one participating employer to another participating employer without terminating eligible employment, the public employees retirement system will record unused sick leave of a participating member if the new employer certifies that it will not transfer that leave. The certification must include documentation from the previous employer detailing the number of hours of sick leave. The public employees retirement system must receive the certification within sixty days after the member leaves employment with the former employer. One month of service credit must be awarded for each one hundred seventy-three and three-tenths hours of unused accumulated sick leave. The employer and employee contributions rates used to calculate the cost must be the rate of the retirement program of the member at termination.

1. Aftertax payments may be accepted from the member as early as six months prior to ~~termination~~ when the member is no longer eligible to accrue sick leave hours. if the following requirements are met:
 - a. A notice of ~~termination or application for monthly benefits form is on file with~~ employment change has been provided to the public employees retirement system.

 - c. ~~At termination, the~~ The sick leave conversion payment must be recalculated using the member's unused balance of accumulated sick leave confirmed by the member's employer, and the member's final average salary as of that date. If there is a difference between the sick leave conversion payment amount and the amount the member has paid, any overpayment must be refunded to the member and any underpayment must be collected from the member by the fifteenth of the month following the month ~~of the member's date of termination~~ the member is no longer eligible to accrue sick leave hours.

 - b. A written certification by the member's employer, as to the member's projected unused balance of accumulated sick leave no sooner than sixty days prior to the date ~~of termination~~ the member is no longer eligible to accrue sick leave hours, is on file with the public employees retirement system. This certification must also include a certification by the employer of the projected salaries to be reported to the public employees retirement system during the final months of employment.
 - c. ~~At termination, the~~ The sick leave conversion payment must be recalculated using the member's unused balance of accumulated sick leave confirmed by the member's employer and the member's final average salary as of ~~that~~ the date the member is no longer eligible to accrue sick leave hours. If there is a difference between the sick leave balance or conversion payment amount and the amount the member has paid, then only the amount of sick leave available as of the ~~termination~~ date the member is no longer eligible to accrue sick leave hours will be added to the member's record. The member account balance will be credited with the full amount of funds from the rollover or transfer.

- b. The medical consultant shall review all medical information provided by the applicant.
- c. The medical consultant is responsible to determine eligibility for disability benefits for applicants not approved for social security disability benefits or for judges not approved pursuant to subsection 3 of North Dakota Century Code section 27-23-03 and shall advise the executive director of the decision in writing. Applicants who become eligible for disability benefits under the Social Security Act and who meet the requirements of subdivision h of subsection 3 of North Dakota Century Code section 54-52-17 are eligible for benefits under subdivision e of subsection 4 of North Dakota Century Code section 54-52-17 without submitting further medical information to the medical adviser, but are subject to recertification requirements specified in this chapter. The social security disability award must provide proof that the member's disability was determined during the member's period of eligible employment. In determining eligibility for judges not approved pursuant to the above, the medical director shall work with a review committee composed of one supreme court judge and a district court judge to review the proposed application. In order for the application to be approved, it must have the concurrence of the medical director and at least one judge. The executive director shall appoint two judges to serve on the review committee.

3. Medical examination.

- a. The applicant for disability retirement shall provide the medical examination reports as requested by the medical consultant.
- b. The member is liable for any costs incurred by the member in undergoing medical examinations and completing and submitting the necessary medical examination reports,

- c. The applicant may appeal an adverse determination to the board by providing a written notice of appeal within thirty days of the date that the public employees retirement system mailed the decision.

The executive director shall provide to the board for its consideration a case history brief that includes membership history, medical examination summary, and the plan administrator's conclusions and recommendations. The board shall make the determination for eligibility at the meeting unless additional evidence or information is needed. The discussion concerning disability applications must be confidential and closed to the general public.
- e. If the initial board decision is adverse to the applicant after exhausting the administrative procedure under subdivisions a and b, the applicant may file a request for a formal hearing to be conducted under North Dakota Century Code chapter 28-32. The request for a formal hearing must be filed within thirty days after notice of the initial decision has been mailed or delivered. 5. **Payment of annuity.** If awarded, the disability annuity is payable on, or retroactive to, the first day of the month following the member's termination from covered employment minus any early retirement benefits that have been paid.

6. **Redetermination and recertification.**

- a. A disabled annuitant's eligibility must be recertified eighteen months after the date the first check is issued and thereafter as specified by the medical consultant unless proof of receipt of ongoing social security disability benefits is received. The executive director may waive the necessity for a recertification, based on the recommendation of the medical consultant or upon proof of receipt of ongoing social security disability benefits.
- b. The public employees retirement system will send a recertification ~~form~~application and request for a statement of annual earnings by certified mail with return receipt to the disabled annuitant to be completed and sent back to the office. If completed recertification application has not been received by the recertification date set in the recertification request, benefits will be suspended effective the first of the month following that date. If the recertification application is not received within six months of the recertification date set in the recertification request unless an alternative date has been approved by the executive director, the member will no longer be eligible to receive disability benefits. Benefits suspended within six months of the recertification date set in the recertification request will be reinstated the first of the month following recertification by the medical consultant, or upon proof of receipt of ongoing social security disability benefits, unless an alternative date has been approved by the executive director. The regular accrued disability benefits will commence with a lump sum equal to the amount of missed payments, without interest, retroactive to the first day of the month benefits were suspended, unless otherwise approved by the ~~North Dakota public employees retirement system~~ board.
- c. The medical consultant may require the disabled annuitant to be reexamined by a doctor. The submission of medical reports by the annuitant, and the review of those reports by the board's medical consultant, may satisfy the reexamination requirement. Upon recertification, the disabled annuitant must be reimbursed for the cost of the required reexamination if deemed necessary by the medical consultant and the executive director.
- d. ~~The~~When the member has not provided proof of receipt of ongoing social security disability benefits, the medical consultant will make the recertification decision. The decision may be appealed to the board within ninety days of receiving the written recertification decision.
- e. Benefit payments must be suspended immediately upon notice received from the medical consultant that the annuitant does not meet recertification requirements. The executive director shall notify the annuitant of the suspension of benefits by certified mail and shall reinstate benefits back to date of suspension if the annuitant is subsequently found to meet recertification requirements.
- f. If it is determined that the disability annuitant was not eligible for benefits during any time period when benefits were provided, the executive director may do all things necessary to recover the erroneously paid benefits.

The cost for any required employee contributions to be paid by the member may be paid in a lump sum or in installments pursuant to the rules established for purchase or repurchase payment under subsection 1, 2, or 3 of section 71-02-03-02.2. If no payments have been made, no credit will be awarded for benefit calculation purposes. To prevent any delay in issuing the employee's first retirement check, purchase must be completed at least thirty days prior to retirement date.
2. The employer cost will be assessed to the member's most recent participating employer. Upon being billed by the North Dakota public employees retirement system, the participating employer will have thirty days in which to make payment in full. If, after sixty days, the employer has not made payment in full, a civil penalty on fifty dollars will be assessed, and, as interest, one percent of the amount due for each month of delay or fraction thereof after the payment became due. In lieu of assessing a civil penalty or one percent per month, or both, interest at the actuarial rate of return may be assessed for each month the contributions are delinquent. If contributions are paid within ninety days of the date they became due, penalty and interest to be paid on delinquent contributions may be waived.

CHAPTER 74-03-01

74-03-01-01. Seed certification in North Dakota.

The certification of seed in North Dakota is a function of the state seed department as outlined in North Dakota Century Code chapter 4.1-53. This chapter applies to all crops, except seed potatoes, which are regulated pursuant to North Dakota Century Code chapter ~~4-10~~4.1-55 and Administrative Code article 74-04, grown for the production of all classes of North Dakota certified seed. If a North Dakota crop is accepted for field inspection and certification for which there are no North Dakota field or seed standards, the latest standards published by the association of official seed certifying agencies for that crop will apply.

History: Amended effective January 2, 2006; July 1, 2007; July 1, 2018.

Law Implemented: NDCC 4.1-53-42

74-03-01-06. Seed eligibility.

1. The seed department shall be supplied with satisfactory evidence of the source and class of seed used to plant each crop considered for certification.
2. Eligible seed stocks include breeder's, foundation, registered or, in special cases, approved lots of the certified class. Eligible seed obtained from another person must be accompanied by the official tag or bulk certificate from an approved certifying agency, which will be the documentation of acceptance required for field inspection.
3. Certified seed growers may plant seed from their own fields if the field passed inspection and if the class of seed is eligible to be certified. The grower must provide sufficient evidence to the department to verify eligibility.
4. Certified seed growers may only plant seed from their own field that failed field inspection previously if the field did not fail due to genetic purity, and the grower is the applicant for field inspection. If the field fails inspection a second time for any reason, that seed shall no longer be eligible for ~~the production of certified~~certification.
5. Contract growers may not replant any of the seed produced unless final certification has been completed.
6. Growers should check with the state seed department regarding approved lots of the certified class eligible for recertification.

History: Amended effective May 1, 1986; September 1, 2002; January 2, 2006; July 1, 2010; October 1, 2012; July 1, 2018.

74-03-01-09. Field inspection.

1. Applications. Applications for field inspection, accompanied by the correct fees, payment of past-due accounts, and proof of seed eligibility, must be received at the state seed department office in Fargo not later than June fifteenth. The penalty fee will apply after that date. Applications for grass seed must be received by May first to avoid late penalty. Applications for hybrid wheat and industrial hemp must be received by June first to avoid late penalty. Applications for millet and buckwheat must be received by July fifteenth to avoid late penalty. Applications for soybeans requiring only a single inspection (preharvest) must be received by August first to avoid late penalty. In case of an emergency or unusual circumstances due to weather or crop conditions, the deadline may be extended at the discretion of the seed commissioner. In such an event, late application penalties may be waived.
2. Information required on application. The application shall be completed by the applicant and returned to the seed department. All questions must be answered completely and correctly. The location of the farm and field, including the legal description, shall be given clearly so that the inspector will be able to find the farm and field readily without waste of time and extra travel. Farm service agency field maps or equivalent must be provided by the applicant. If the seed is the grower's own seed, sufficient evidence must be provided to the department to verify eligibility. If the seed is purchased, an official certified seed tag or bulk certificates must accompany the application.
3. Roguing and spraying fields. Roguing is essential to maintain the purity of varieties and high standards of certified seed. Roguing fields prior to inspection is recommended to remove undesirable plants from fields. Plants that should be removed include off-type plants, other crop plants, prohibited and restricted noxious weeds, and other impurities which may be growing in the field.

Roguing is usually done by pulling off-types or other crop plants or weeds and removing them from the field. In the case of small grain, roguing should be done after heading as foreign plants are seen most easily at this time. In hybrid seed production, fertile off-types and undesirable plants should be removed before pollen is shed. Sterile off-types may be removed any time prior to the final inspection.

Whenever practical and advisable, seed fields should be sprayed with pesticides according to the manufacturer's label to control pests. Growers must follow posting requirements as specified by state and federal agencies responsible for the regulation and use of pesticides.

4. Weeds and diseases.
 - a. Prohibited noxious weeds under North Dakota seed laws and rules are leafy spurge, field bindweed (creeping jenny), Canada thistle, perennial sow thistle, Russian knapweed, hoary cress (perennial peppergrass), absinth wormwood, musk thistle, spotted knapweed, and yellow starthistle.
 - b. Restricted noxious weeds under North Dakota seed laws and rules are dodder species, hedge bindweed (wild morning glory), wild oats, and quackgrass.
 - c. A field may be rejected if it is the field inspector's opinion that the amount and kind of weeds present make it difficult to conduct the inspection, or the field condition is such that the quality of the cleaned seed may be questionable.
 - d. Objectionable weed seeds are restricted noxious weeds under North Dakota seed laws and rules and may include some common weeds which cause a specific problem in the conditioning of some individual crops.
 - e. Diseases not governed by specific crop standards may be cause for rejection if it is the field inspector's opinion that the quality of the cleaned seed may be affected or if results of tests made on the seed indicate a disease condition which will affect the crop produced from such seed.
5. Cancellation of field inspection. An application may be canceled by the applicant before the field inspection is completed. The application fee minus an administrative fee will be refunded to the applicant. The request for cancellation, however, must reach the state seed department before the inspector arrives in the general locality of the field or before inspection has occurred. Refunds will not be made after the field is inspected or because the field has been rejected.
6. Appeal. Reinspection of rejected fields may be considered, provided the application for appeal allows a reasonable amount of time for reinspection prior to harvest. A fee for reinspection may be assessed.
7. The variety name stated on the application will be standard for inspection when entering the field. Absent compelling visual evidence to the contrary, the variety or selection declared by the applicant will be presumed correct if the documentation provided is valid.

74-03-01-11. Seed conditioning, sampling, and laboratory inspection.

1. **Identification in storage.** Field-inspected seed must be identified at all times. Identification must be traceable to field inspection numbers from the crop year in which the seed was

produced. Conditioned seed in storage must be identified by kind, variety, class, and lot number displayed on the bin or storage container.

2. **Preconditioned sample testing.** To hasten labeling or determine the quality of seed which has passed field inspection prior to conditioning, a representative sample of seed may be submitted to the state seed department for the purpose of germination and disease testing. The sample should be cleaned on a small mill or hand sieve to approximate as nearly as possible the quality of the entire lot after conditioning.

Results of germination and disease tests conducted on preconditioned samples may be used for final certification purposes. A labeler may request new tests for labeling purposes after the seed lot is conditioned. Fragile crops such as soybeans, field beans, lentils, chickpeas, and field peas must be tested for germination after the final conditioning of the seed lot to assure correctness of label claims. The labeler is responsible in all cases for information stated on seed labels.

3. **Conditioning.** All field-inspected seed which is to be labeled must be conditioned and must meet the minimum seed standards for the crop and class. Field-inspected seed may be conditioned either by the grower or by an approved seed conditioner.

- a. Conditioning by seed grower.

- (1) A seed grower does not need an approved conditioning facility permit if the grower conditions the grower's own seed on the grower's premises with the grower's equipment.
- (2) The seed grower must complete a sampler's report in its entirety, attach the report to a two-pound [.907-kilogram] sample that is representative of the entire seed ~~lot~~lot, and deliver to the state seed department for analysis.

- b. Conditioning by an approved facility.

- (1) To be eligible for final certification, field-inspected seed shall be conditioned by a facility approved by the seed department. Seed conditioned at an unapproved facility will be ineligible for final certification.
- (2) If ownership of the seed lot is transferred to a different individual or entity, the grower must complete and sign a grower's declaration. Transfer of ownership of field-inspected seed is limited to an approved conditioner or bulk retailer unless the transfer has been approved by the commissioner.
- (3) While conditioning, the seed lot must be sampled at regular intervals by an authorized sampler. The sample and completed sampler's report must be submitted to the state seed department for analysis.

4. **Sampling procedures.** Representative samples of seed for testing and analysis must be collected during or after conditioning in accordance with sampling procedures outlined in the current association of official seed certifying agencies operational procedures.

- a. All seed lots eligible for final certification shall be sampled during conditioning as follows:

- (1) Portions of conditioned seed may be drawn by hand as seed is conditioned to form a composite, representative sample for a seed lot; and
- (2) Automatic mechanical devices may be used to continually or intermittently draw representative samples as a seed lot is conditioned.

- b. Specific instructions to samplers are found on the reverse side of the samplers report.
5. **Maximum lot size and numbering.**
- a. The maximum lot size for bagged seed is five thousand bushels [17619.54 dekaliters] except for small seeded legumes and grasses which is twenty-two thousand five hundred pounds [10000 kilograms]. Bulk seed lots do not have a maximum size limit except bin capacity. Each bin is considered a separate seed lot. For all crops, one sample for each lot is required. The entire lot must be certified at the time final certification is completed.
 - b. The lot number shall be designated by the labeler. The lot number of the seed planted may not be used as the new lot number for the seed being certified during the current crop year.
6. **Commingling (mixing) of inspected seed fields.** Seed of the same kind and variety from different fields that pass field inspection may be commingled if the seed is of the same class and general quality. If seed of different classes is commingled, the seed becomes eligible for the lowest class only.
7. **Commingling carryover certified seed lots.** Carryover seed from certified lots may be commingled if the seed is of the same variety, class, and general quality. If seed of different classes is commingled, the seed becomes eligible for the lowest class only. A new germination test is required for labeling. Germination tests should be done on each lot prior to commingling to ensure none of the lots have gone out of condition.
8. The state seed department may resample any lot of seed before final certification or after the seed is labeled.
9. **Official samples.** At the request of a customer, an official sample may be collected by a representative of the seed department, with expenses incurred by the customer. The seed department shall determine the appropriate collection method and sample size. Sampling bulk seed in bins requires that a minimal amount of seed is withdrawn from the bin. The amount shall be determined by the quantity of seed in the lot, but shall be no less than five percent of the total lot size. Test results from official samples shall supersede all previous test results and shall be final.
10. **Laboratory analysis.**
- a. All laboratory testing shall be done by qualified personnel of the state seed department. Analysis and tests of seed samples and definition of analysis terms shall be in accordance with the rules of the association of official seed analysts (AOSA). In certain cases when time constraints are critical to the efficient movement of certified seed, the commissioner may accept germination or other test results from an approved laboratory, through the certification agency of the state of origin of the seed.
 - b. If more than one sample of seed from the same lot is tested without additional conditioning, an average shall be taken of all purity tests conducted. Results from the most recent germination or disease test shall be used as the final result.
 - c. Seed from certain classes or kinds, or both, may be subject to variety identification analysis at the discretion of the department, with testing fees payable by the grower or labeler.

74-03-01-16. Approved conditioners.

Any seed conditioner may be designated as an "approved conditioner" to condition field-inspected seed for final certification if, after inspection, it is the state seed department inspector's opinion that the facility is properly managed and equipped to maintain genetic purity and varietal identity of each seed lot. A separate inspection and permit is required for each fixed facility or mobile conditioning unit. The managers and the designated samplers in these facilities are under agreement to handle all seed and seed records and to draw representative samples of all seed lots for certification according to the certification rules and regulations.

1. Approved conditioners of small grains are required to have the following operational equipment capable of: (1) length grading - either a disc separator or indent cylinder or combination machine which removes long and short fractions and (2) width grading - either an air screen machine or precision graders with aspiration in line.
2. The commissioner may approve specialized equipment and facilities utilized for the purpose ~~of~~ of seed conditioning, repackaging, treating, or inoculating certified seed.

History: Amended effective May 1, 1986; December 18, 1989; September 1, 2002; July 1, 2010; October 1, 2012; [July 1, 2018](#).

74-03-01-17. Interagency certification.

Interagency certification is a procedure established to maintain certification eligibility of seed originating in another state.

1. **Field inspected in another state and transferred to North Dakota for final certification.**
 - a. North Dakota labelers may purchase seed that passed field inspection in another state and complete final certification and labeling in North Dakota. A certificate of transfer from the state in which the seed originated must be submitted to the state seed department to verify eligibility.
 - b. The labeler is responsible for completing final certification. If conditioning is necessary, a representative sample must be submitted to the state seed department along with a completed sampler's report and a copy of the certificate of transfer. The seed shall meet North Dakota seed standards for certification.
 - c. Interagency certification labels will be issued by the North Dakota state seed department.
2. **Field inspected in North Dakota and transferred to another state for final certification.**
 - a. A seed producer may transfer seed that passed field inspection in North Dakota to a purchaser in another state with approval from the state seed department. The producer must submit a completed certificate of transfer to the state seed department verifying eligibility of the seed. Once approved, the state seed department will forward copies to the purchaser and the official certification agency of the state where the seed is destined.
 - b. The purchaser is responsible for completing the requirements for certification with the certification agency.
3. **Certified in another state and transferred to North Dakota for relabeling.**
 - a. Seed that has been previously certified and labeled by an official certifying agency from another state may be reconditioned, rebagged, and relabeled in North Dakota.

- b. When the seed is reconditioned or rebagged, a new sample must be submitted to the state seed department for analysis. The North Dakota labeler must submit a certification label from the state ~~of~~of origin as proof of eligibility along with a completed sampler's report.
- c. New interagency certification labels will be issued by the state seed department.

Interagency seed lots not meeting North Dakota certification standards may require resampling or retesting to ensure compliance with North Dakota certification standards.

74-03-14-01. General requirements.

The following genetic standards are applicable for the production of parental lines and hybrid wheat produced by commingling a cytoplasmic male-sterile seed parent and a fertility restorer line.

1. **Eligibility requirements for varieties.** Standards applicable to wheat varieties apply to the production of pollinator lines.
2. **Definition of parental types.**
 - a. **Maintainer (B-line).** A line with normal fertile cytoplasm which is used as a pollinator to increase the seed parent.
 - b. **Seed parent (A-line).** A cytoplasmic male-sterile line, which is genetically identical to the maintainer line that when pollinated by a restorer, produces hybrid seed.
 - c. **Restorer (R-line).** Any male fertile line possessing nuclear restoration genes used as a pollinator in the production of commercial hybrid seed.
3. **Eligible seed classes.**
 - a. Only the certified class is recognized in the production of commercial hybrid seed. A commercial hybrid is planted for any use except for seed production. To be certified, a commercial hybrid must be produced from foundation class seed stocks. These seed stocks must consist of male steriles, inbred lines, and/or hybrids.
 - b. Only the foundation class is recognized for parental lines.

74-03-14-02. Land requirements.

1. Maintainer and restorer lines are not eligible for foundation class if planted on land on which the same kind was grown the previous two years unless the previous crop was the same variety and was inspected for certification.
2. Seed parents are not eligible for certification if planted on land on which the same kind was grown the previous two years.

74-03-14-03. Field inspection.

Fields for the production of parental lines utilized in hybrid wheat production must be inspected as follows. Roguing to remove undesirable plants must be done prior to field inspection. Rogued plants must be removed from the field.

1. AxB production. Seed parents must be inspected three times. The first inspection must occur after heading but before anthesis to check for off-type plants. The second and third inspections must be during anthesis to check for shedders in the seed parent, the presence of which must be communicated immediately with the seed producer to allow for roguing.
2. Maintainers and restorers. Male lines must be inspected at least once for purity after the crop is fully headed.
3. Commercial hybrid production fields must be inspected at least once.

1. Isolation.

- a. Seed parent increases (AxB). Fields or parts of fields acceptable for production of seed parents to be used for the production of commercial hybrid seed must be so located that the seed parent is not less than two thousand six hundred forty feet [804.67 meters] from fields of other kinds or varieties that could provide a source of contamination, or from fields of the same variety that do not meet varietal purity requirements for certification. The A-line and B-line must be separated by an unplanted strip of ground adequate to prevent mechanical mixture.
- b. Restorer increases. Prior to inspection, the field must be isolated from inseparable crops by a strip at least five feet wide to prevent mechanical contamination.
- c. Commercial hybrids. Fields or parts of fields acceptable for production of commercial hybrid seed must be no less than three hundred thirty feet [100.58 meters] from fields of other kinds or varieties that would provide a source of contamination, or from fields of the same variety that do not meet varietal purity requirements for certification.

74-03-16-01. General requirements.

All production of industrial hemp crops is subject to license application approval that may be required by regulatory authorities. Only growers who possess a current license with the North Dakota department of agriculture are eligible to produce certified seed. Only varieties of industrial hemp approved by regulatory authorities for seed production and which meet Federal Seed Act eligibility requirements are eligible for certification. Growers may be required by regulatory agencies to obtain tetrahydrocannabinol test results according to applicable regulations. Growers may be required to submit test results to the seed certifying agency before labels are issued. Upon meeting final certification requirements, eligible seed will be labeled in the licensee's name only.

1. Isolation.

- a. Prior to inspection, the field must be isolated from fields of any other variety or fields of the same variety not meeting genetic purity requirements for certification.
- b. The minimum isolation distances required between inspected industrial hemp and other hemp crops must be maintained as specified in the following table. There must be no hemp plants within three hundred feet [91.44 meters] of a seed field and no more than four plants per acre outside three hundred feet [91.44 meters]. - a. Roguing to remove undesirable plants must be done before field inspection. Rogued plants must be removed from the field to be harvested.
- b. Any combination of impurities may be reason for failing an inspection. Unless otherwise specified by the breeder, an industrial hemp crop for certification must not exceed the limits specified in the following table. Impurities may include harmful contaminants (species capable of cross pollinating with the inspected variety), plants of other varieties or distinct types foreign to the variety being inspected, weeds, or other inseparable crops.

CHAPTER 74-04-01

74-04-01-02. General requirements and responsibilities.

1. Participation and responsibility.
 - a. Participation in this seed potato program is voluntary and may be withdrawn prior to the first inspection.
 - b. Responsibilities.
 - (1) Seed department responsibilities. The inspections, approvals, certification, and production of these rules and regulations will be done by the state seed department.
 - (2) Applicants' responsibilities. The farming, sanitation practices, storing, and packing will be the grower's responsibility. It is the responsibility of the applicant to maintain genetic purity and identity at all stages of certification, including planting, harvesting, storing, and handling. Evidence that any lot of seed has not been protected from contamination that might affect genetic purity or is not properly identified shall be cause for possible rejection of certification.
2. General requirements.
 - a. Potatoes to be eligible for the program shall have been in a certification program and winter tested for eligibility.
 - b. Fields will pass two or more inspections given by visual examination of a representative sample of the plants which method and size of sample will be determined by the state seed department.
 - c. Fields passing inspection will be stored in a seed warehouse and sorted to grade at shipping time.
 - d. Responsibility for the quality of work done in sorting the potatoes falls upon the grower or a thoroughly qualified agent authorized by the grower.
 - e. Requirements for certification are not complete on any lot of eligible potatoes until properly labeled as described in this chapter and an official seed grade inspection certificate has been issued. Official labels will be provided to the grower by the state seed department in hard copy or electronic form. Official seed grade inspections are compulsory for seed shipped out of state. Grade inspection is voluntary for intrastate shipments. For those shipments that are not inspected, or that fail to meet grade standards described in section 74-04-01-11, the label must state "no grade".
 - f. The responsibility for properly and accurately labeling foundation or certified seed rests with the grower of the seed. The labels will be issued to the purchaser only on order or authorization from the grower, who must provide to the purchaser a proper and accurate label for each container or load of seed at the time of delivery. ~~These labels are to accompany the potatoes at shipment.~~ Labels must not be applied to stock other than that indicated on the tags or bulk certificates. Bulk shipments, by truck or railcar, when thoroughly disinfected, may be considered the container.
 - g. The seed label must contain the following information:
 - (1) Year in which the crop was produced.
 - (2) Grower/labeler's name.

(3) Variety.

(4) Generation.

(5) Class.

(6) Certification or application number of the seed lot.

(7) Total amount in container represented by cwt.

h. Resorting or regrading. If a lot of potatoes fails to meet certified seed grade requirement upon inspection, they are to be reconditioned to meet the requirement or the official labels must be removed.

h.i. Reconditioning while in transit. In the case of any circumstance making it essential to recondition seed in transit, permission must be obtained from the state seed department.

i.j. Latent virus testing. Serological testing for latent viruses shall be voluntary and a requirement for only virus-tested seed. Virus-tested seed meeting established tolerances may be indicated on the label.

j.k. Upon the discretion of the state seed department, potato seed lots originating from out of state may be subjected to a laboratory test, by a seed department-approved laboratory, for the detection of seedborne pathogens. 2. A governing board of the organization shall establish a written system of internal control, comprised of accounting and administrative controls. An organization may not permit any unauthorized person as determined by the governing board from reviewing this system. 99-01.3-03-02. Gaming account.

1. An organization shall maintain all gaming accounts at financial institutions located in North Dakota. These accounts must be used for depositing gaming funds and transferring net proceeds to a trust account, except as provided by subsection 3. All gaming prizes paid for by check, including cash and merchandise, must be paid from the gaming account. Transfers must be made by the last day of the quarter following the quarter in which the net proceeds were earned. The transfer date is the date the funds actually are received in the trust fund. The amount transferred must be for an amount equal to or greater than the adjusted gross proceeds, less gaming taxes, and less the greater of actual or allowable gaming expenses for the quarter. The gaming account may be used for payment of expenses. An organization may transfer funds to its general account for payment of expenses. If an organization is not required to maintain a trust account, a disbursement of net proceeds to an eligible use must be payable to the ultimate use or recipient. A payment may be made by electronic transfer.
2. Interest earned is other income. A service fee is an expense.

3. Organizations shall reimburse the gaming account as required by section 99-01.3-03-05 and may deposit raffle nongaming funds, bingo dauber receipts, fees from players who use bingo card marking devices, and prizes paid by an insurance company to an organization for payment to a player. Any additional deposit of nongaming funds into a gaming account must be communicated to the attorney general within five business days of the deposit.

99-01.3-03-03. Trust account.

1. An organization shall maintain all trust accounts at financial institutions located in North Dakota. If an organization only conducts a calcutta, raffle, sports pool, paddwheel described by subsection 1 of section 99-01.3-11-01, or poker or a combination of these games, or is involved in conducting no more than two events during a fiscal year and each event lasts no more than fourteen calendar days, an organization is not required to maintain a separate trust account and may use the gaming account for the disbursement of eligible uses. Trust accounts are used only to disburse net proceeds to eligible uses and must receive only funds from a gaming account, except to reimburse the account as required by section 99-01.3-03-05 and as provided by subsections 5 and 13 of section 99-01.3-14-01. [Interest earned and service fees incurred by trust checking and savings accounts must be reported as adjustments to the trust account on a tax return.](#) A transfer of net proceeds to another trust account or to a closely related organization is not a disbursement of net proceeds. Net proceeds cannot be pledged as collateral for any loan.
2. An organization shall disburse net proceeds within a reasonable time period.
3. An organization may not transfer funds from a trust account to any other bank account, except for transferring funds to another trust account or to reimburse its general account for compensation that qualifies as an eligible use. A reimbursement must be documented by a supporting schedule. If a disbursement of net proceeds is for an expense item that includes both nongaming (an eligible use) and gaming functions, only the nongaming eligible use portion can be paid with trust account money. The organization shall maintain complete, accurate, and current documentation detailing the proration of the expense between nongaming and gaming. A disbursement must be payable directly to the ultimate use or recipient. However, an organization may make a payment directly to a credit card company for charges on a credit card provided that an organization can identify purchases that qualify as an eligible use from other purchases. A payment may be made by electronic transfer.
4. If an organization invests net proceeds in a certificate of deposit, bond, stock, mutual fund, or other marketable securities, all income earned, including interest, dividends, and capital gains, must be reported each quarter as [an a positive](#) adjustment on a tax return and be disbursed to an eligible use. If the net effect of the investment in marketable securities results in an actual loss, the organization may not deduct the loss on a tax return. A service fee is an adjustment to the account's balance. ~~The organization shall submit a copy of the marketable securities statements for each quarter with its tax return.~~
5. If an organization invests net proceeds in marketable securities with the intent to maintain the investment for a period of three years or greater and no change is made to the original investment amount, either additions to or withdrawals from, the organization may choose to account for and report any earned income, including capital gains, on a tax return after each three-year period instead of each quarter. If additions are made to or withdrawals are made from the original investment amount before a three-year period ends, the organization shall account for and report any earned income, including capital gains, on the tax return for the

quarter in which the change was made to the original investment amount. If the net effect of the investment results in an actual loss, the organization may not deduct the loss on the tax return. Service fees incurred during the reporting period are an adjustment to the account's balance. ~~The organization shall submit a copy of the marketable securities statements for each quarter with its tax return.~~

6. For reporting purposes, an organization may elect to report the gain in market value of the accounts outlined in subsection 4 and 5. Adjustments can be made for decreases in market value; however, such decreases cannot reduce the account's value below its adjusted basis. Electing to report securities at market value must be consistently applied each quarter.
7. The organization shall submit a copy of the marketable securities statements for each quarter with its tax return and shall submit a copy of its annual 1099 received for all marketable securities accounts each year with the tax return filed for the quarter ending March thirty-first.

99-01.3-03-04. Restrictions and requirements.

1. An organization is allowed an expense limit according to subsection 2 of North Dakota Century Code section 53-06.1-11. The allowable expense amount may be used for any purpose that does not violate the gaming law or rules.
2. An organization may not base an employee's compensation on a participatory percentage of gross proceeds, adjusted gross proceeds, or net proceeds. An organization may pay a fixed bonus through an incentive program.
3. An organization may not pay or reimburse, nor may a lessor accept a payment or reimbursement from an organization, for any media advertising done by the lessor or any other person that is related to games at a site unless the organization's share of this expense is prorated to the benefit the organization receives and the media advertising is voluntary by the organization.
4. An organization may not pay or reimburse a lessor or share in the cost, nor may a lessor accept a payment, reimbursement, or sharing of the cost from an organization, of any sign advertising related to games at a site unless the sign is not owned by the lessor. If a lessor rents an advertising sign from a vendor, the organization's share of this expense must be prorated to the benefit the organization receives and the sign advertising is voluntary to the organization.
5. A player's uncollectible check is an expense. If an organization establishes a policy to reduce a player's cash prize by the amount of the player's uncollectible check and award the player the difference, if any, the organization shall post or make available to players that policy.
6. If a door prize is awarded as a promotion of games, the cost of the door prize is an expense.
7. A net cash short is an expense and a net cash long is other income for a quarter.
8. Only an unopened pull tab, including unplayed electronic pull tabs, unopened set of stapled jar tickets, or set of banded jar tickets that has the band intact may be accounted for as unsold or defective when a game is reported on a tax return. An organization shall account for any single unsold or defective jar ticket at a proportional selling price of a stapled set of jar tickets.
9. If foreign currency is exchanged into United States currency, any loss is an expense.

10. The attorney general shall determine whether a theft of an organization's gaming funds can be deducted from gross proceeds and adjusted gross proceeds on its tax return and notify the organization. The attorney general shall consider whether the organization:
 - a. Immediately reported the theft to a local law enforcement agency and the attorney general;
 - b. Has documentation that substantiates the theft amount;
 - c. Had physical security of the funds;
 - d. Has an adequate system of internal control; and
 - e. Incurred an identifiable theft.
11. If an organization rents out gaming equipment, the income is nongaming income.
12. All accounting records must be completed and initialed or signed with permanent ink. The use of correction fluid or correction tape to make changes to accounting records is prohibited. Changes must be made with a single strikethrough of the original amount, writing the correct amount, and initialed by the individual making the change. An organization shall maintain a register of all individuals who initial or sign a record or report, including independent contractors who provide auditing, accounting, and bookkeeping services. Any financial institution employee who provides drop box cash count services is not required to be included on the register; however, the financial institution employee shall legibly sign their full name on the daily report when providing drop box cash count services. The register must include each individual's name and the initials or signature as the individual normally writes them on a record or report. The initials or signature of an individual on a record or report attests that to the individual's best knowledge the information is true and correct.
13. The fees charged to players to enter a twenty-one tournament and the prizes awarded, must be reported as other income on a tax return.
14. For computing prizes on a tax return, a merchandise prize and a gift certificate are valued at an organization's actual cost, including sales tax, and a donated prize is valued at zero.
15. An organization shall own and possess, have a contract to acquire, or be able to obtain a prize being offered for a game. A winning player may not be required to first pay for or buy something to receive a prize. However, an organization does not need to register or title an automobile or similar item.
16. If a prize winner is ineligible to receive a merchandise prize, the organization may convert the prize to a cash prize or other ~~fair alternative~~ merchandise prize of at least equal value, provided that the conversion of a raffle prize does not exceed the limits outlined in North Dakota Century Code section 53-06.1-10.1.
17. If a gaming prize is not claimed by the winning player and has previously been reported on a tax return, an organization shall amend the applicable tax returns to account for the unredeemed prize.
18. When a deal of pull tabs, club special, tip board, seal board, raffle board, prize board, sports-pool board, calcutta board, or a series of paddlewheel ticket cards is placed in play, an employee shall compare the game serial number on the pull tab, board, or card to the serial number on the state gaming stamp. If the two serial numbers are different, an employee shall immediately notify the distributor.

19. If an organization pays a fee to an insurance company to insure a contingency cash or merchandise prize for bingo or a raffle, the fee is an expense. If the insurance company pays or provides a prize to a winning player, it is not reported as a prize on a tax return.
20. If an organization conducts twenty-one, it may pay monthly rent for more than one table provided that each additional table is used at least thirteen times a quarter. This level of activity is based on a site's historical experience, or seasonal activity, for each of the previous four quarters, regardless of which organization conducted twenty-one at the site. For a new site or a site that has been completely remodeled in appearance and function, the level of activity must be reviewed and or reestablished after the first full quarter. If an additional table is used at least thirteen times in at least one but not all of the previous four quarters, the allowable monthly rent for that table must be prorated over all the active months of the licensing year. For example, if a second table was used at least thirteen times in only two of the previous four quarters, the additional monthly rent for the second table would be a maximum of two hundred dollars per month (or three hundred dollars per month if a wager greater than five dollars is accepted on the table) multiplied by six months (totaling one thousand two hundred dollars) and prorated to one hundred dollars per month for the licensing year.
21. If an organization temporarily releases its site authorization to allow another organization to conduct gaming at a site, the primary site holder shall provide the temporary organization with a signed statement of site release, include the duration which it is valid, and provide a copy to the attorney general's office at least fourteen days prior to the site release.
22. If an organization does not intend to reapply for a license for the next fiscal year, its license is revoked or suspended for a period of more than six months, or its license application is denied, and it has net proceeds that are not disbursed, the organization shall file an action plan with the attorney general. The plan must be filed within thirty days of the expiration of the license or when the license is relinquished, revoked, suspended, or the license application is denied, and include a planned timetable for disbursing all the net proceeds and anticipated uses.

If the action plan is not timely filed, net proceeds must be disbursed within ninety days of the expiration of the license or when the license is relinquished, revoked, suspended, or the license application is denied. The disbursement must be reported to the attorney general.

The cash banks for twenty-one, and paddlewheel activity described by subsection 2 of section 99-01.3-11-01, may be combined and the cash banks for pull tab games at a site may be combined, if approved by the attorney general. If an employee needs to establish or replenish a cash bank by withdrawing funds from the gaming account, the employee shall execute a withdrawal by check or other withdrawal method and reference the specific game's name, other game type, or the combined cash bank.  - b. Before each game, the game's winning bingo pattern.
 3. An employee may only assist a disabled player in playing a bingo card or assist a player in how to use a bingo card marking device. A legally blind or disabled player may use the player's personal braille or special card when an organization does not provide such a card. An organization may inspect and reject the card.
 4. An employee may not sell or award a gift certificate as a prize unless:
 - a. A certificate is accounted for when it is sold or awarded. An employee shall issue a certificate to the purchaser or player and retain a copy or stub of the certificate with the daily records and record the certificate on a register to document the sale. An organization shall recognize a sale of a certificate as gross proceeds on the tax return for the quarter in which it was sold. A certificate awarded as a prize has no cash value. A certificate must be used to buy only a bingo card or package;
 - b. A register is maintained which accounts for all certificates sold or awarded at a site. A register must include, for each certificate, a consecutive control number, selling price (if applicable), dates issued and redeemed, sites at which it is issued and redeemed, and initials of the employees who issue and redeem the certificate; and

- c. A redeemed certificate is signed by a player and retained by an organization with the daily accounting records. A player is issued a bingo card or package at the site when the certificate is redeemed.
5. If an organization changes a publicly announced bingo program for a session in which a potential prize or the number of games is reduced, an employee shall notify a player of the change before the player buys a card.
6. If an organization sells two or more differently priced cards or packages for a game, it shall use a different type, color, serial number, or a distinctive identifiable feature for each differently priced card or package. An organization may not use the same serial numbered paper bingo cards for more than one game or group of games during a bingo session, unless the face of a card is a different color or a paper card tracking number is used.
7. If an organization accepts a discount coupon, the redeemed coupon must contain the dollar value or percentage discount and be signed by a player. An employee shall write the value of the bingo card or package purchased on the face of the coupon unless the value is already stated, record the date on the coupon or on a group of coupons for a session, and retain the coupon with the daily records. The value of a player's one or more coupons must be less than the value of the card or package bought.
8. If an organization accepts a donated item in exchange for a discount, an employee shall account for the discount on a register as part of the daily records. A discount must be less than the value of the card or package bought. A register must contain:
 - a. Bingo session and date of the session;
 - b. Amount of the discount;
 - c. Value of the bingo card or package bought;
 - d. Signature of the player;
 - e. Total amount of bingo card or package discounts for the session; and
 - f. Date and initials of the cashier.
9. A card or package must be bought on a site immediately before the start of a game or during a session. However, an organization may presell a card or package for a special session that involves a bingo prize or prizes that equal or exceed ten thousand dollars for the session provided the organization:
 - a. Uses a consecutively numbered two-part receipt to register a player who prepays. One part is issued to a player who shall redeem the receipt to receive the card or package. The second part is retained by the organization to account for the gross proceeds;
 - b. Separately accounts for the gross proceeds and reports it on a tax return for the quarter in which the game is conducted; and
 - c. Provides a card or package to the player before the start of the session that day.
10. No card may be sold for a game which is in progress or ended except for a bonanza bingo or a game that has all of its numbers predrawn. If a paper bingo card is included in a package for a game in progress or ended, the card must be withdrawn and destroyed. An employee may exchange a purchased package for another package if the employee accounts for all the cards of the first package and a session has not started.

11. An organization may allow a player to use a bingo card marking device provided by the organization that marks an electronic card image of a purchased card as follows:
 - a. A device cannot be reserved for a player unless a player is disabled. An organization shall provide each player an equal opportunity to use the available devices on a first-come, first-served basis. A device cannot be issued through a floorworker;
 - b. A device must be used only to play bingo cards at a site where the site system is located and the session is being conducted;
 - c. A device must be rented for a fixed amount, regardless of the price for a card or package or number of cards played through the device, or provided free to a player for the player's temporary use during the session. Rental fees charged to players for the use of devices is nongaming income;
 - d. No player can use more than one device at a time during a session;
 - e. No player can play more than seventy-two single-faced cards per game on a device and cannot choose or reject cards;

 - g. If a card or package may be used in a device and in paper form, it must be sold for the same price. An organization may sell a special card or package to a player for use only in a device. The organization may require a player to buy a minimum-priced card or package to use a device;
 - h. If a player rents a device while a game for that session is in progress, the player may not play that game and a cashier shall record on the player's receipt that the specific game number is void;
 - i. An organization may print a facsimile of a winning card and post it for players to inspect;
 - j. A player may use an input function key on a device or an organization may use a radio frequency signal or Wi-Fi transmission to mark each number as it is called. When a player inputs a number or an organization sends a radio frequency signal or Wi-Fi transmission, a device may automatically mark all the player's cards that contain that number;
 - k. If a player has a winning card, the player shall:
 - (1) Timely call bingo according to subdivision c of subsection 2 and it must be by a method other than through a device; and
 - (2) Provide the device with the winning card displayed to a floorworker to verify according to subsection 18;
 - l. If a player's call of a bingo is disputed or if the attorney general makes a request, an organization shall print the winning card stored on the site system;
 - m. An organization shall have at least one spare device available should a device in use malfunction. If a player's device malfunctions, the player may replace the device with a spare device. An organization shall restore the player's same cards from the site system;
 - n. For site systems in which electronic bingo card images are downloaded to a bingo card marking device, if a player exchanges a device for another device, the original

transaction of the first device must be voided and the transaction involving the second device must be recorded as a sale;

- o. An organization may perform routine maintenance on a site system and bingo card marking device; and
 - p. An organization shall back up all of a site system's accounting information for a session on a separate electronic media file prior to the start of the next business day and retain the backup file for three years from the end of the quarter in which the activity was reported on a tax return. The accounting information must comply with subsection 1 of section 99-01.3-16-09.1.
12. After the start of a session, an organization may not refund the purchase price of a card or package unless a site incurs an electrical power loss, there is inclement weather, an organization experiences an extraordinary incident, a session is canceled, or a player has an emergency.
 13. If an organization sells hard cards before each game, during the game an employee shall count the number of hard cards played by all the players to the number recorded as sold. If the comparison reveals an irregularity, the gaming manager shall take corrective action.
 14. An organization may not sell a bingo package that contains a variable number of cards based on each player's ability to play. Each separately priced package must contain a standard number of cards.
 15. If a game has an actual or potential prize valued at ~~five hundred~~fifty dollars or greater or is a bonus game, an employee shall use an electronic bingo card verifier; record in writing the called numbers and the sequence in which they were drawn; or audio recording of the bingo caller calling the balls. When a player bingos, an employee shall retain the bingo card verifier record, the written record, or audio record, which includes the following and retain these records for six months:
 - a. Game number, winning pattern, type of card (number of faces on a sheet), type of package (regular, premium, super), winning series (card) number, and last number called; and
 - b. Cash register receipt number, if applicable.
 16. A caller shall display the letter and number on the ball to players except for speedball bingo or when a random number generator is used. An employee shall announce the letters and numbers on the balls or displayed by a random number generator in their exact sequence; however, numbers freely awarded do not need to be announced. The caller is also not required to announce all letters and numbers for a game in which the pattern does not require the use of the selected letters or numbers. If a player calls bingo and the bingo is invalid, the next ball called must be in sequence of the balls drawn.
 17. A player may bingo more than one time on the same card when an organization conducts continuation games of more than one pattern on the same card. An organization may also conduct bonus games where multiple winning patterns may be played on the same card and where one or all of the prize patterns has a winner.
 18. A winning card must be verified by an employee and one neutral player or person unless an electronic bingo card verifier is used and the display of an electronic bingo card verifier is shown to all players on a monitor. A floorworker may not access a verifier. For a winning card on a bingo card marking device, an employee shall compare the serial number of the device to the receipt for the cards played on that device.

19. An organization may offer a variety of prizes to a winning player who may choose a prize by random selection or chance. A player may win an additional prize by choosing the prize by random selection, by an organization drawing from previous winning players, or playing a game of skill if the player is not required to give anything of value. An organization shall disclose the potential prizes in the bingo program and notify a player of these prizes before the player chooses a prize, has the opportunity to win a prize, or plays a game of skill.
20. An organization may award, as a prize, cash, merchandise, merchandise gift certificate, or gift certificate that can be redeemed for a bingo card or package.
21. An organization may conduct a qualifying game whereby a player wins an opportunity to play in a special game.
22. An organization may award a bonus that is based on a factor incidental to a bingo program if it is disclosed in a program, calendar, or flyer, and announced before a session, and is recorded on a prize register. Factors may include a player bingoing on a certain color of card, combination of colored cards, last number called, particular face of a multifaced card, or winning a game on the player's birthday.
23. If a player bingoes and an employee determines that the player is playing more bingo cards than were bought, the player's bingo is void.
24. Bonanza bingo and a game that has all of its numbers predrawn must be conducted as follows:
 - a. A caller shall initially call a certain quantity of balls. While a caller initially calls the bingo balls or before the caller calls the next continuous number, a player shall verify that the letter and number on the balls drawn are correctly displayed. A posted display must be used for the games, have restricted access, and reference that game;
 - b. A card must be sealed and unpeekable when it is sold;
 - c. An organization may sell or exchange cards throughout a session until sales are closed. If an organization exchanges cards, an employee shall, before the next continuous number is called, fully account for the floorworkers' sales of cards according to section 99-01.3-04-07. A floorworker may not turn in any exchanged card after the accounting is begun;
 - d. If a player bingoes before the next continuous number is called, the player wins. Otherwise, an additional bingo ball is drawn until a player bingoes. This rule does not apply to a game that has all of its numbers predrawn;
 - e. A game may not extend beyond a session;
 - f. If an organization permits a player to exchange a partially played card for a new card and pay a discounted or exchange price, an employee shall:
 - (1) Validate the date of the session on the card with a mechanical device or rubber stamp. A card validated for a session, but not sold, must be voided. The organization shall use a different color of card for each game conducted at a site during a day;
 - (2) Retain the exchanged cards as part of the daily records for six months;
 - (3) Record the validation date and card color used by session; and
 - (4) Reconcile the cards, accounting for:

- (a) Number of cards taken from inventory which must be independently counted and verified by two employees who shall initial and date the verification;
 - (b) Number of cards sold;
 - (c) Number of cards exchanged, which must be separately maintained for each floorworker. The cards must be recounted by an employee who is not the floorworker. The employee who controls the floorworker sales report shall band each floorworker's exchanged cards separately, identify the banded group with the floorworker's name, session, and initial and date. A floorworker shall also initial the floorworker's banded group;
 - (d) Number of cards returned to inventory and voided which must be independently counted and verified by two employees. Each person shall initial and date the verification; and
 - (e) Document any discrepancy and corrective action taken; and
- g. A voided card must be retained for six months.
25. If an employee determines, during or immediately after the play of a game and before a card is verified as a winning bingo, that a ball is missing, the employee shall void the game and offer the players a fair alternative.
 26. An organization shall receipt gross proceeds, including an additional amount paid by a player for a chance to win an extra prize in a special game, by a cash register, tickets, paper card count, paper card tracking number, or floorworker sales report, unless written approval is obtained from the attorney general for use of another receipting method. The receipting method must reference the primary color and type of cards, serial number (optional), number of cards or packages sold, discounts applied to each type of card or package sold, or reference other information approved by the attorney general.
 27. If packages are sold which consist of a multiple of cards, records must be maintained that document the number of and primary color and type of cards that are included as part of each package.
 28. For a progressive game that increases the number of bingo balls to be called or the prize amount, the organization shall maintain a written record that includes date of session, game number, number of bingo balls, prize amount increase, and accumulated prize amount.
 29. For a site where bingo is the primary game or a site that is leased by a licensed organization, the organization or any person may not pay bingo prizes in which the total bingo prizes exceed total bingo gross proceeds for two entire consecutive quarters. However, if bingo is the primary game at the site, a bingo prize that equals or exceeds ten thousand dollars is excluded from the calculation of total bingo prizes.
 30. An organization shall have a written bingo program for each session. However, if the program does not change each day or session, an organization may retain one program and record the dates on which it applied. A program must contain:
 - a. Name of a site and organization;
 - b. Date or dates of the sessions;
 - c. Game description, color and type of card, and prize for each game;
 - d. Selling prices of the cards or packages; and

- e. Rental fee charged for a bingo card marking device, if applicable.

CHAPTER 99-01.3-04.1

99-01.3-04.1-01. Electronic quick shot bingo.

"Electronic quick shot bingo" means a bingo game played on portable hand-held bingo devices utilizing electronic bingo card images. The bingo game is played using twenty-four predrawn letters and numbers and may use up to six bonus numbers to achieve predetermined patterns. If a predetermined pattern is achieved, then the player wins a prize based on a specific prize table. Because the game has all of its letters and numbers predrawn, there may or may not be a winning player for each game played. A player is not required to say the word "bingo" before a bingo is awarded. Before a session begins, an employee shall draw or a random number generator shall draw twenty-four balls or numbers comprised of the first five balls or numbers from each of the "B", "I", "G", and "O" rows, and the first four balls or numbers from the "N" row. Up to six additional balls or numbers may be drawn as bonus numbers. Once twenty-four balls or numbers and any bonus balls or numbers, if applicable, are selected, an employee or the related equipment shall enter the numbers into the electronic quick shot bingo site operating system and post the selected balls or numbers once during a business day prior to starting the session. An electronic quick shot bingo site operating system with card-marking devices and related equipment may only be sold or provided to an organization with a state gaming license.

Unless there is only one employee on duty, two persons shall verify and attest to the numbers drawn or selected, numbers posted, and numbers entered into the electronic quick shot bingo site operating system for the current session. When the bingo numbers have been drawn or selected, the numbers may not be changed. Players are not allowed to pick any numbers to match for an electronic quick shot bingo game or bonus feature. 99-01.3-05.1-01. Fifty-fifty raffle system.

A fifty-fifty raffle system means computer hardware, software, and related equipment used to sell fifty-fifty raffle tickets and account for sales. A fifty-fifty raffle system server must be located in a secure location at the site of the raffle event. A fifty-fifty raffle system must be operated by the organization conducting the raffle. A draw number is a number that is provided to the player on a bearer ticket which may be selected as the winning number for the raffle. A bearer ticket is a paper ticket that contains one or more draw numbers purchased. The conduct of a raffle is the drawing. Fifty-fifty raffle systems may only be used for single event raffles. CHAPTER 99-01.3-06

99-01.3-06-02. Conduct and play.

1. Deals of pull tabs must be commingled for a game as follows:
 - a. Two or more deals must be placed in a receptacle and be thoroughly intermixed. When an organization's predetermined number or range of numbers of winning pull tabs remain in a game as unredeemed, an additional deal is added. An employee shall add a deal to a game when there are about two hundred fifty pull tabs remaining and the game cannot be or is not being closed. The new pull tabs must be intermixed with the pull tabs in the receptacle before any pull tab is sold;
 - b. The deals must be identical except for the game serial number, and a minor difference in printing that is approved by the attorney general. Each deal must have at least two top tier winning pull tabs. If deals of a game involve folded or banded jar tickets, the color of the tickets' band must be the same; however, multiple-colored bands on a single ticket may be used. When a deal is added to a game, an employee shall compare the color of a deal's pull tabs to the color of the game's pull tabs. If the two colors are not the same, the deal cannot be used;
 - c. A master flare or flare for at least one deal of a game must be displayed with the game and be visible to and not easily removed by a player. An organization shall retain all original flares at a site while a game is in play. If a deal has a last sale prize feature, the deal's flare must also be displayed. Only the flare of one deal of a game may have a last sale prize feature;
 - d. If an indicator for adding a deal to a game has been reached and an organization does not have a deal to add, the organization shall temporarily suspend the game until it procures a deal. However, if the organization is unable to procure a deal from the distributors and all the top tier winning pull tabs have been redeemed, it may close the game;
 - e. If a site's total gross proceeds of pull tabs averages twelve thousand five hundred dollars or less per quarter, a game may be closed anytime if all top tier winning pull tabs have been redeemed;
 - f. Except as provided by subdivision g, if a site's total gross proceeds of pull tabs averages more than twelve thousand five hundred dollars per quarter, no game may be closed unless an organization discontinues gaming at the site, or all the top tier winning pull tabs have been redeemed and a game has been in play for twenty-five consecutive calendar days; and
 - g. An organization shall close a game by the end of a quarter. If all top tier winning pull tabs have been redeemed, an organization may close a game for the quarter within fourteen calendar days before the end of that quarter. An organization may start a new game for the next quarter within fourteen calendar days before the next quarter begins. However, an organization may not start a new game and end that game within this fourteen-calendar-day period.
2. An employee may not place a deal of pull tabs, club special, or prize board in play which has a manufacturer's or distributor's seal broken on the game's container when the game was received from a distributor. A person may not take off a deal's manufacturer's cellophane shrink wrap or break the manufacturer's or distributor's security seal on the deal's container until the deal is to be placed in a receptacle. If a distributor's or manufacturer's security seal is

broken before the deal is used, an organization shall return the deal to the distributor. If a deal is packaged in two or more containers, the full deal must be placed in play at the same time.

3. The following rules, information, and policies must be posted or made available to players. If made available to players, the rules, information, and policies must be in the form of a handout that is easily visible to the players and may not be a copy of the gaming law and rules:
 - a. Restricting the play of a game to one player or a group of players is prohibited;
 - b. A winning pull tab must be redeemed within a fifteen-minute time limit;
 - c. If a person knowingly solicits, provides, receives, or knowingly uses any inside information, from or to any person, by any means, or knowingly uses a fraudulent scheme or technique to cheat or skim involving pull tabs, regardless of the amount gained, the offense is a class C felony punishable by a five thousand dollar fine or five years in jail or both;
 - d. A pull tab cannot be redeemed if it has been taken from the gaming area;
 - e. To the best of the organization's knowledge, a prize remaining on a board relates to a winning pull tab that has not been redeemed. This rule is not required to be posted or made available to players if an organization does not conduct a prize board;
 - f. A deal may be added to a game at any time; and
 - g. If a player attempts to falsify or falsifies a record of win, the prize is forfeited. This rule is not required to be posted or made available to players if an organization does not pay a prize that requires a record of win;
 - h. For any last sale prize, the method of determining which player is entitled to buy the last pull tab or punch for a last sale prize when two or more players desire to buy the last pull tab or punch;
 - i. The information, if any, authorized by subdivision a or b, or both, of subsection 5;
 - j. Any limit on the number of pull tabs or punches that a player may buy at a time;
 - k. When a game is being closed, an employee shall:
 - (1) Post a notice that the game is being sold out; and
 - (2) Any limit on the number of pull tabs or punches that two or more players may buy at a time.
4. A player may not redeem and an employee may not knowingly pay a prize for a pull tab after fifteen minutes have elapsed since the pull tab was bought. If a player attempts to redeem a pull tab after the time limit, an employee shall, if possible, retain and void the pull tab.
5. A person may post the information referenced by subdivision a or b, or both, for a commingled game provided that the posting contains a statement that the information is correct to the best of the organization's knowledge and that the information is not guaranteed to be accurate. If an organization does not have a policy on when to stop posting this information when a game is being closed, it shall stop posting the information when there are less than six winning pull tabs, through a level of prize value determined by the organization, that remain unredeemed. Posted information may be as described in subdivision a or b, or both:

- a. The minimum number of unredeemed winning pull tabs or a range of numbers of unredeemed winning pull tabs, through a level of prize value determined by an organization, that will always be in a game unless the game is being closed. This information may be for each prize value or the total of several prize values. The level of prize value must be posted. If a pull tab has two or more winning prize patterns, the information must be based on the value of each prize pattern.
 - b. The number of unredeemed winning pull tabs, through a level of prize value determined by an organization, that remain in a game. This information may be for each prize value or the total of several prize values. The level of prize value must be posted. If a pull tab has two or more winning prize patterns, the information must be based on the value of each prize pattern. The information must be continually updated.
6. An organization may limit the number of pull tabs a player may buy regardless if the player is redeeming a winning pull tab.
 7. An employee may not selectively pick a pull tab from a receptacle based on its game serial number or other factor. An employee shall take a handful of pull tabs from a receptacle and count off the number bought. An employee may not permit a player to physically handpick a pull tab or honor a player's request to select a specific pull tab. However, an employee may honor a player's suggestion to select a pull tab from a general area of a receptacle. In applying subsection 2 of North Dakota Century Code section 53-06.1-16, the phrase "fraudulent scheme or technique" includes an employee selecting, by any method, only certain pull tabs in a game or an employee not thoroughly intermixing pull tabs of the initial or added deals.
 8. An employee may only assist a ~~disabled player~~person with a disability in opening a pull tab.
 9. An employee shall deface a winning number or symbol of a pull tab, including pull tabs used with a prize board, and punchboard punch when it is redeemed. If a pull tab has two or more winning prize patterns, a winning number or symbol of at least one pattern must be defaced. An employee may not knowingly pay a prize to a player who is redeeming a pull tab that has been defaced, tampered with, counterfeited, has a game serial number different from the serial numbers of the deals in the game, or is defective.
 10. If a player buys a set of banded jar tickets and before opening or breaking the band of any jar ticket, determines that the set contains less than the standard number of tickets, an employee may issue the player only the number of tickets actually missing or may issue the player a new set in exchange for the defective set.
 11. When a game is being closed, an organization may continue to conduct the game although all of its top tier and minor winning pull tabs have been redeemed. An employee may not permit a player to buy out a game except when a game is being closed. If an organization closes a game that has pull tabs unsold, it may not open or place the pull tabs back into play.
 12. Unless an organization conducts a commingled game according to subdivision e of subsection 1 or closes a commingled game at least monthly, an employee who did not conduct the game, have sole access to the games in play, cash banks, and receipts or cash profit for the games, shall do a monthly interim audit of the game. If the percent-of-accuracy of all the games of a site for the previous quarter was less than ninety-eight and one-half percent, and a cash shortage of more than one hundred dollars, an employee who did not conduct the game, have sole access to the games in play, cash banks, and receipts or cash profit for the games, shall do a weekly interim audit of the games for that site for up to twelve continuous weeks or until the organization determines, resolves, and documents the cause. One of the weekly interim audits may be the audit required by subsection 7 of section 99-01.3-03-10. An organization shall start the weekly audits no later than the date on which its

tax return for the quarter was filed with the attorney general. Percent-of-accuracy is computed as cash profit divided by adjusted gross proceeds.

13. An employee shall award the last sale cash or merchandise prize to the player who actually buys the last pull tab or punch.
14. An organization may transfer a commingled game, club special, tip board, seal board, prize board, and punchboard from a site to another site, or rotate games among sites. If an organization discontinues gaming at a site, it may close a game. If a game is in the process of being conducted through a jar bar, the game cannot be transferred to a dispensing device. A game must be reported for the site at which it was closed and on a tax return for the quarter in which it was closed.
15. An employee may not pay, from any source of funds, a prize to a player unless the player redeems an actual winning pull tab that has a game serial number from a game conducted at the site. This rule does not apply to a last sale prize.
16. Before leaving a jar bar unattended, an employee shall safeguard the games, cash, and records.
17. An organization may not publicly display a redeemed pull tab.
18. An organization or employee may not reimburse, from any source of funds, an amount to a player for play of a game that has a manufacturing defect or has an incorrect posting of information described by subsection 6, unless the attorney general approves.
19. If an organization suspects or determines that a game may be defective, the organization shall temporarily suspend the game, notify the attorney general, and follow the attorney general's instructions.

99-01.3-06.1-01. Electronic pull tab devices.

"Electronic pull tab device" means a device, approved by the attorney general, which electronically displays pull tabs. The device is part of an electronic pull tab device operating system used in the conduct of electronic pull tabs. After the insertion of cash into the electronic pull tab device's currency validator, the player has access to a credit account allowing for the purchase and play of an electronic pull tab. If a winning combination of numbers, letters, or symbols is displayed after opening the electronic pull tab, a player wins credits that are displayed on the credit meter and can be used to purchase more electronic pull tabs or cashed out to a voucher which can be redeemed for cash.

99-01.3-06.1-02. Use and requirements of an organization.

1. An organization may not install more than five electronic pull tab devices in a site. An organization may request, in writing, a waiver to the number of devices installed for consideration by the attorney general not to exceed fifteen devices per site. A device must be clearly labeled so as to inform the public that no one under twenty-one years of age is allowed to play.
 - a. An electronic pull tab device must be a stand-alone cabinet style device. No device may be a hand-held portable device or affixed to a bar, counter, or table top.
 - b. An electronic pull tab device must be used only to play electronic pull tabs. No other game type may be played on the device and no level of player skill may be involved in the determination of any pull tab prize. A device may not be part of a progressive system or employ any other features, such as bonus plays or promotions. An extended play feature may be used in which a player may play without additional consideration. An extended play feature must not interfere with or in any way affect the outcome of any finite game being played. If an extended play feature is used a notification must be provided to the player explaining that an extended play feature is used on the game and that "Extended play features prolong the play of an electronic pull tab ticket but do not award a prize in addition to the predetermined prize for that ticket."
 - c. Insertion of United States paper currency only must be accepted through the electronic pull tab device's currency validator to initiate play.
 - d. An electronic pull tab device may not directly dispense coins, cash, tokens, or anything else of value other than a credit ticket voucher.
2. An organization may not have more than six electronic pull tab game titles selectable for play on the electronic pull tab devices at a site. Only one of the games can be selected for play at

any given time. A winning electronic pull tab may be made up of a combination of numbers, letters, or symbols. Game themes must not contain offensive or obscene graphics, animations, or references.

3. An organization only may conduct electronic pull tab device activity during the hours when alcoholic beverages may be dispensed according to applicable regulations of the state, county, or city. A device must be programmed to not allow play during hours when alcoholic beverages may not be dispensed.

4. The following rules must be posted:

a. A player may play only one electronic pull tab device at a time;

b. An electronic pull tab device may not be reserved. However, a device may be held for an active player for no more than fifteen minutes;

c. A credit ticket voucher is only valid and must be redeemed on the same business day as it was printed; and

d. If a person knowingly solicits, provides, or receives any inside information, by any person, by any means, or knowingly uses a fraudulent scheme or technique to cheat or skim involving electronic pull tabs, regardless of the amount gained, the offense is a class C felony punishable by a five thousand dollar fine or five years in jail, or both.

5. An organization shall maintain custody of all keys to an electronic pull tab device. A bar employee may not have access to a device. The keys for each lock on a device must be keyed differently, including the lock for a device's outer door and the inner compartments that must separately house the computer logic and server area and currency validator stacker area. An organization may not provide an independent service technician keys to access an electronic pull tab device regardless if the device is leased.

6. An organization or employee may not modify the assembly or operational functions of an electronic pull tab device.

7. An organization may not post nor may an electronic pull tab device be capable of displaying any game information relating to electronic pull tab device activity, including the number of unsold pull tabs or the number and value of prizes remaining in a game.

8. An organization shall use the attorney general's current recordkeeping system for electronic pull tab activity unless approval is obtained from the attorney general for use of another system.

9. An organization shall:

a. Withdraw currency from an electronic pull tab device within a seven-calendar-day interim period. Electronic pull tab activity at a site must be suspended during the period of time when currency is being withdrawn from a device and credit ticket vouchers are bought back.

b. Generate and print an interim period electronic pull tab device activity report for each device at a site according to subdivision a of subsection 16 of section 99-01.3-16-09.6. The information from this report must be recorded on an interim period site summary. After completion of the interim period site summary, all system generated interim period electronic pull tab device activity reports must be attached and retained with the interim period site summary.

c. From the interim period site summary, game activity information, including gross proceeds, prizes, adjusted gross proceeds, cash profit, and cash long or short for each game conducted at a site must be posted to a game summary report maintained for each game. The game summary report must include cumulative totals for each. Total cash profit for the interim period at a site is allocated to each game based on the ratio of a game's adjusted gross proceeds to the total adjusted gross proceeds of all the games.

10. An organization shall have a rental agreement conforming to section 99-01.3-02-06.

11. An organization shall maintain an access log prescribed by the attorney general for each electronic pull tab device. A person who accesses a device shall record the reason for access and date and initial the log. An organization shall retain the log in the device during the quarter of activity.

12. Credit ticket vouchers may be redeemed by an organization employee when on duty, by a bar employee, or by both.

13. For the redemption of credit ticket vouchers by organization employees at a site, an organization shall maintain one cash bank for each different manufacturer's devices.

14. An organization may provide a bar with a temporary loan to enable a bar employee to redeem a credit ticket voucher. A loan and any increase in the loan must be made by check payable to the bar and be interest free. An organization may not access, count, or take custody of the loaned money. The duration of the loan must be until the organization discontinues conducting electronic pull tabs at the site. When the bar repays the loan, the organization shall deposit the funds in its gaming account and the deposit slip must reference the site, source of funds, and amount. The amount reimbursed to a bar must equal the dollar value of redeemed credit ticket vouchers which the bar provides to an organization. An organization employee may not use a bar's loan for redeeming a credit ticket voucher.

15. If a theft of currency occurs from an electronic pull tab device, an organization immediately shall discontinue and close all electronic pull tab games at the site associated with that manufacturer's devices, contact their distributor and generate an interim period electronic pull tab device activity report and electronic pull tab closed game summary report according to subdivisions a and d of subsection 16 of section 99-01.3-16-09.6. The organization shall provide a copy of all of this information to a local law enforcement agency and the attorney general.

16. A game must be conducted and played through an electronic pull tab device as follows:

a. Each electronic pull tab deal must contain a fixed number of tickets. The maximum number of pull tab tickets per electronic deal may not exceed fifteen thousand and the minimum may not be less than two thousand.

(1) All electronic pull tabs in a particular deal must be of the same purchase price and may not exceed the maximum two dollars sale price per pull tab as set forth by North Dakota Century Code section 53-06.1-08;

(2) The maximum prize amount awarded for a winning combination of numbers, letters, or symbols on each electronic pull tab may not exceed five hundred dollars as set forth by North Dakota Century Code section 53-06.1-08;

(3) A deal must have at least two top tier winning pull tabs;

(4) Each deal may not pay out more than ninety percent of gross proceeds;

(5) Each deal must be assigned a unique serial number; and

(6) Each deal must be assigned a unique state gaming stamp number by the distributor prior to delivery to the organization site server.

b. All games of electronic pull tabs of the same manufacturer at a site must be put into play and started at the same time. For the start of each game, at least two, and no more than two electronic pull tab deals must be commingled on the site server for each game. The game deals must be identical, which includes game identification, deal version, manufacturer, game name, total number of electronic pull tabs, purchase price per electronic pull tab ticket, and prize structure.

c. For each game of the same manufacturer, when the unsold tickets of the original starting identical two deals reach two thousand pull tab tickets remaining, at least one full deal but no more than one additional identical deal of the same game must be automatically downloaded onto the site server and commingled with the remaining two thousand tickets of that game. Each time the two thousand ticket threshold is reached, an additional deal must automatically be downloaded and commingled with the remaining electronic pull tab tickets in the game continuously throughout the entire quarter.

d. No game may be closed during a quarter unless approved by the attorney general and all games of the same manufacturer at a site must be closed at the same time within fourteen calendar days from the end of the quarter. Once closed, a game and its deals cannot be reopened.

e. When the games are closed an employee shall buy back all remaining credit ticket vouchers from the organization employee cash bank and from a bar. The game must be reported on a gaming tax return for the site at which it was closed.

f. At the end of each month, an independent audit person of the organization shall reconcile the game summary report to the monthly interim audit report according to subdivision c of subsection 16 of section 99-01.3-16-09.6. At the end of the quarter, after a game has been closed, the independent audit person shall reconcile the game summary report to the electronic pull tab closed game summary report according to subdivision d of subsection 16 of section 99-01.3-16-09.6. The electronic pull tab closed game summary report may not be generated or printed prior to an electronic pull tab game being closed. Doing so will cause immediate and automatic termination of a game. All reconciliations must be dated and signed by the independent audit person.

17. The organization immediately shall shut down an electronic pull tab device operating system and notify the attorney general if it detects or discovers any defect, malfunction, or problem with an electronic pull tab operating system, electronic pull tab device, or electronic pull tab game that affects the security or the integrity of the game. The organization shall also immediately notify their distributor of the defect, malfunction, or problem.

 4. A bar may accept or not accept a gaming-related check from a player. A player's check must be payable to a bar. CHAPTER 99-01.3-08

99-01.3-08-04. Video surveillance system.

If a site had twenty-one gross proceeds averaging ten thousand dollars or more per quarter for two entire consecutive quarters, this level of activity is expected to continue, and wagers exceed two dollars, an organization shall have a video surveillance system operational at the site within forty-five days from the end of the second quarter. However, for a site with seasonal activity, this level of activity is based on the average gross proceeds of the active quarters within the fiscal year July first through June thirtieth. A level of activity is based on a site's recent historical experience, but not earlier than the previous fiscal year, regardless of which organization conducted twenty-one at the site. If an organization conducts twenty-one at a newly acquired site that has a level of activity requiring a video surveillance system, it shall have the system for a table operational within forty-five days of conducting twenty-one or limit wagers to two dollars until the system is operational. A system must be operational for each twenty-one table that is regularly located on a site, regardless of how infrequent a table is used or the value of wagers accepted at the table. A temporary table that is brought onto a site for fourteen or fewer consecutive days for a special event according to subsection 4 of section 99-01.3-01-02, but for not more than two events per quarter, does not need a system. An organization shall:

1. Install a system that meets these requirements:
 - a. A recording unit must record in real time. A video system must be approved by the attorney general and no time lapse or multiplex video recorders may be used as the primary mode of operation. A recording unit must be secured in a locked vented cabinet or area, plugged into an outlet that cannot be switched off, and be programmable with a minimum seven-day memory backup. A recording unit must have a built-in or separate time and date generator that displays the time and date on the recorded video without significantly obstructing a recorded picture. A playback unit used to review a recorded video must have forward and reverse frame-by-frame and high-speed scanning capability;
 - b. A high-resolution color camera must be positioned above the center of a table and record gaming activity from the dealer's perspective. A camera must be plugged into a surge protector and use an outlet that cannot be switched off. A camera must be protected by a slotted or clear dome;
 - c. A camera lens must have a field of view to record the face of a dealing shoe, all betting spaces, discard holder, chip tray, currency plunger, and table number;
 - d. A color video monitor onsite; and
 - e. A system must be capable of allowing organizations to download, burn, or copy files onto a storage device.
2. If an organization conducts twenty-one or paddlewheels at more than one site, a table must have a site identification. A site identification and any table number must be visible on a recorded video.
3. A playing surface must be green and may not contain imprinted graphics, excluding the tip betting spaces, unless authorized by the attorney general. Red or maroon and black jumbo-faced playing cards may be used.
4. Maintain a clean dome and a proper field of view on the playing surface.
5. Authorize only a gaming or shift manager or an independent person to:
 - a. Access a recording unit, camera, and stored recorded video;

- b. Start and stop a recording unit for a table when chips are first made available for use on the table and continue recording until the table is permanently closed for the day; and
 - c. Change a recorded video in a recording unit for a table at the beginning, during, or at the end of a day's activity, regardless if the authorized person is a dealer or wheel operator at the site. An organization may use two real time recorders in sequence to record a table's activity that exceeds the recording capability of one tape. If two recorders are used for one table, their separate recordings for a day's activity must overlap by ten minutes.
6. Retain a recorded video in a safe storage place for thirty days.
 7. On a daily basis an employee shall review and document that a surveillance camera at each twenty-one and paddlewheel table at a site is recording an unobstructed view and clear picture of the table activity. If a recording unit or camera for a table is not properly operating or not producing an unobstructed view and clear picture of the cards, currency, or chips and is not repaired or remedied within forty-eight hours of activity on the table or four calendar days, the organization shall close the table or limit wagers to two dollars on the table until the equipment is repaired.
 8. The attorney general's current recordkeeping system must be used unless approval is obtained from the attorney general for use of another recordkeeping system. An organization shall track a dealer's and wheel operator's percent-of-hold performance.
 9. For a site that requires video surveillance, if percent-of-hold at that site is less than ten percent for twenty-one and less than fifteen percent for paddlewheel for a quarter, a minimum of one hour per week of video surveillance for each active table at that site must be reviewed and documented during the period immediately after the percent-of-hold for the quarter has been determined. The review of video surveillance must be continued for six continuous weeks or until the organization has determined and documented the reason the percent-of-hold is less than ten percent for twenty-one and less than fifteen percent for paddlewheel at that site. The review must be completed by an individual who did not conduct twenty-one or paddlewheel at the site on the dayshift selected for review. ~~The review of video surveillance must be continued until the organization has determined and documented the reason the percent-of-hold is less than ten percent at that site.~~
 10. An organization may purchase or lease a camera, lens, cable, camera dome, digital recording device, time and date generator, and installation services, including moving a camera to another site, from a vendor approved by the attorney general, or any other business entity. If purchasing or leasing the equipment from an approved vendor, an organization shall defer remitting at least fifty percent of the cost or lease price of this equipment to the vendor until the attorney general approves the clarity of the recorded video for a table.
 11. An organization shall provide the attorney general with a sample recording to evaluate. If an organization acquires video surveillance equipment at a new site from another organization, moves a camera or table to another location at the site, or changes video surveillance equipment at a site, the organization shall, within fourteen days, provide the attorney general with a sample recorded video to evaluate. A nontournament occasion and a side game are restricted to a twenty-four-hour period of play. Tournament activity, including any satellite activity, is an occasion of not more than three consecutive calendar days of play. Both tournament and nontournament play may occur as part of the same occasion provided that the nontournament play and a side game does not exceed a twenty-four-hour period of play.

An organization shall charge a player a fee not to exceed two dollars per one-half hour of playing time and collect the fee in advance. An employee shall record the fee when it is collected. The fee schedule must be posted or made available to players.

99-01.3-09-04. Conduct and play.

- 1. The cards are ranked ace, king, queen, jack, ten, nine, eight, seven, six, five, four, three, and two. A poker hand in a showdown consists of five cards, usually the best five selected from a greater number, ranked according to the following from highest to lowest:
 - a. Royal flush--the best hand of the same suit in sequence of ace, king, queen, jack, ten;
 - b. Straight flush--five cards of the same suit in sequence;
 - c. Four of a kind--four cards of the same rank;
 - d. Full house--three cards of the same rank and two cards of the same rank;
 - e. Flush--five cards of the same suit;
 - f. Straight--five cards in sequence; an ace may be low in a five-high-card straight;
 - g. Three of a kind--three cards of the same rank;
 - h. Two pair--two cards of the same rank and two cards of one other rank;
 - i. One pair--two cards of the same rank; and
 - j. High card--the highest ranking card in the hand.

2. The cards in the game of poker must be one complete standard deck of fifty-two cards. The design on the back of each card in the deck must be identical, and no card may contain any marking, symbol, or design that enables a player to know the identity of any element printed on the face of the card. The backs of the cards may contain a logo. The backs of the cards in the deck must be designed to eliminate the ability of any person to place concealed markings on them.
3. The organization shall have additional decks of cards available at the site. The color of the backs of the cards of the replacement decks must be of a different predominant color.
4. When cards are brought to the poker table, an organization employee first shall approve the deck of cards. The deck must be sorted into sequence, by suit and the back of each card inspected to assure all cards are present and none are taped, cut, shaved, marked, defaced, bent, crimped, or deformed.
5. Before the play, the dealer, in front of the players, shall spread the cards face upwards on the table, according to suit and in sequence within the suit for review by the ~~first player~~ players. After ~~a player's~~ review, the cards must be shuffled so the cards are randomly intermixed. If a replacement deck is used, this step must be repeated.
6. Before starting play, and after each hand, the dealer thoroughly shall shuffle the cards. Then the dealer shall cut the cards by placing a portion of the deck on top of a cutting card. The dealer then shall restack the cards with the former bottom part of the deck on top.
7. Cards must be dealt out of the hand by the dealer. Dealing must start with the first player to the left of the dealer or button. A card dealt must be the top card of the deck. After the first card of the hand has been dealt to a player, the deal continues in a clockwise direction. The order of cards in the deck may not be disturbed during the deal of a round.
8. The first holder of the button shall be determined at random by dealing for the high card or a set position before seat assignment. If two or more players have the same ranked card, card suit will determine high card. From best to worst, suits rank spades, hearts, diamonds, and clubs. ~~After each hand, a button must be moved around the table clockwise, player to player, so that the player who has the button receives the advantage of playing and betting last.~~
9. An ante may be used in the game at the discretion of the organization. The player shall ante for each hand by placing wagers equaling the ante in front of the player on the table before the first card of the hand is dealt. The dealer shall sweep the antes and place them in the pot. Once the first card is dealt to any player, the ante may not be altered.
10. If an organization allows blind bets, the first betting round is started by the player to the left of the big blind by opening or folding and each following player shall call, raise, or fold; otherwise the player to the left of the button shall check, open, raise, or fold and each following player shall check, call, raise, or fold. A player shall match or raise the previous bet amount to remain in the hand. Subsequent betting rounds are started by the first active player to the left of the button. A betting round ends when all players have had a chance to act and all players who haven't folded have wagered the same amount for the round.
11. If a table only has two players remaining (heads-up), the small blind is posted by the player that has the button. When play becomes heads-up, the player who had the big blind the most recently, is given the button and the other player is given the big blind. The player with the button shall be the first player to act on the first betting round and last to act on the subsequent betting rounds.
12. A card that is meant to be dealt face downward but is dealt face upward or flashed as it is dealt so that a player might know its identity or is dealt off the table is considered an exposed

card. A card exposed by a player is not an exposed card. ~~An exposed card must be replaced except in the game of stud poker in which the correction may be made by dealing the next card down.~~ The replacement of an exposed card must be done after all players have received their cards in that round.

13. A misdeal occurs when during the initial deal a player receives an incorrect number of cards, an active player is dealt out or cards are dealt to an inactive empty seat at the table, or cards are dealt out of sequence. A misdeal causes all of the cards to be returned to the dealer for a redeal. A misdeal may not be called once substantial action has occurred. "Substantial action" is defined as either three players acting by betting or folding or two players acting, if one of them has raised the pot.

14. An organization shall adopt a burn card procedure in which one card will be burned either after each round of betting or before dealing any additional cards.

15. ~~If a player bets but announces a fold, the player has a dead hand and the bet remains in the pot.~~

~~16.~~ A statement by a player of "call" or "raise" or of a specific bet is binding. A player who states a certain amount but puts a different amount into the pot shall correct the bet to the stated amount. ~~If the player placed an amount greater than the stated amount into the pot, the dealer shall correct the bet.~~

~~17.~~ A player who makes a bet, decides incorrectly that the player has no live hand against the play, and concedes the hand by throwing it into the discard pile loses the pot.

~~18.~~ 16. A player who unintentionally bets less than the amount required to call shall complete the call or ~~withdraw the partial bet in full. A player who shows that the player is unaware of the raise by calling only the amount of the bet before the raise may withdraw the bet and fold.~~ An improper bet must stand once three players have called, a player has raised, or all players in the pot have acted; otherwise, the action must back up to the player making the improper bet and any other action is nullified. A player makes a bet if the bet is pushed forward or placed into the pot at a sufficient distance from the player to make it obvious that the player intends to bet. If the situation is unclear and a player allows the dealer to pull the player's bet into the pot without making an immediate objection, it is a bet.

~~19.~~ 17. If a player ~~calls but~~ places a single-chip wager into the pot that is larger than the bet, it must be regarded as a call unless the player announces a raise. ~~The player may clarify the apparent call as a raise only if no other player behind the player has placed a bet into the pot or announced a call or raise. The dealer shall provide the player with change of chips, if necessary, at the time the bet is placed. If a multi-chip wager is fifty percent or greater of a legal raise then the minimum raise must be completed.~~

~~20.~~ 18. A fouled hand is a hand that ~~either~~ has an improper number of cards, unless the player is short a card and due to get the top card of the deck, ~~or has a card that has come into contact with discards.~~ If a player has a fouled hand by having too many cards, that hand is dead and cannot win any part of the pot. ~~Except for games of low draw and high-low split draw, a player may play with too few cards as long as the player can make a hand.~~

~~21.~~ 19. If a player discovers that the hand is fouled, the player cannot recover any wagers placed into the pot unless a misdeal can be called. If a player with a fouled hand makes a bet or raise and the next player has not yet acted, the next player may call attention to the fact that the hand is fouled. The dealer shall return the player's bet to the player with the fouled hand and betting may resume.

22.20. No player may deliberately foul a hand to recover a bet or make an attempt to win the pot by betting or raising after the player has discovered that the player's hand is fouled. If the dealer determines that a player has intentionally bet a fouled hand, the dealer shall rule that all of the player's wagers remain in the pot and the player's hand is dead.

23.21. When an active player exposes the player's hand to another active player, all other players at the table have the right to see the exposed hand. ~~If the player who exposed the hand or the player who saw the exposed hand refuses, both hands must be declared dead.~~

24.22. If a card is improperly faced in the deck, it must be treated as a dead card and replaced by the next card below it in the deck.

25.23. At the conclusion of the final betting round, a player shall place the player's hand face upward on the table at the showdown as follows:

- a. If there has been a bet on the final round, the player who made the bet shall show first;
- b. If there have been one or more raises on the final round, the player who last raised shall show first;
- c. If the final round has been checked by all the players, the player who acted first shall show first;
- d. The subsequent order of showing hands is clockwise around the table from the player who shall show first; and
- e. If there is a side pot, players involved in the side pot shall show their hands before any player who is "all-in" for only the main pot.

26.24. If two or more players remain in the pot after all of the cards have been dealt and the betting is over for that hand, the remaining players show their cards to determine which player has the best hand and wins the pot. A player may discard a hand without showing it. A player shall show the hand at the showdown if requested to do so by ~~the dealer or management.~~ ~~If the player refuses to show the hand upon such a request, the player shall leave the game. The player with the winning hand shall show all cards before the pot is awarded.~~ All hands will be shown without delay once a player is all-in and all betting action by all other players in the hand is complete. No player who is either all-in or has called all betting action may muck his hand without showing. All hands in both the main and side pots must be shown and are live. The following provisions govern showdown:

- a. A hand with too many cards for that game is dead;
- b. A hand is ranked according to the actual cards it contains. The cards speak for themselves;
- c. A hand that is prematurely discarded by a player and touches the discarded cards is dead unless it is one hundred percent identifiable and retrievable;
- d. A verbal concession is ~~not~~ binding;
- e. A player who leaves the table conceding the pot shall discard the hand;
- f. A hand discarded face upward is a live hand if it has not become irretrievably mixed with the discards;
- g. A hand discarded face downward may be retrieved if the following conditions are met:
 - (1) The player retrieves it or requests the dealer to turn it face up; and

(2) ~~The hand has not touched any discards;~~

~~(3) Another player has not been induced to discard the other player's hand;~~

h. A hand discarded face downward that is not retrievable is dead even if it had been shown before being discarded;

i. A player is responsible for ~~holding onto their cards~~protecting their hand until a winner is declared; and

j. ~~If the dealer discards the winning hand without the player's approval, the player is entitled to the pot if it is claimed before being taken in by another player; and~~

~~k. A player who remains silent has not given approval for the dealer to discard the player's hand. The player shall positively approve the dealer's action~~Dealers cannot kill a properly shown and tabled hand that was obviously the winner.

~~27.25.~~ At a showdown if two or more hands are tied, the hand with the highest ranked card or cards for high poker games and the lowest ranked card or cards for low poker games wins; otherwise, the tie must be broken by the rank of the unmatched cards in the hand. All suits are of equal value for determining hand rankings. In high-low split poker games, the highest hand and the lowest hand split the pot. A player who wins in one direction (high or low) and ties a player for the other direction, receives three-quarters of the pot. A player who wins in both directions without a tie receives all of the pot. Aces may be used for either high or low.

~~28.26.~~ Pots must be awarded by the dealer. ~~When the dealer has awarded a pot and it has been taken in by a player without a claim against it, the award stands. No player may make an agreement with any other player regarding the pot.~~ A game must be played to conclusion and the pot awarded to the winning player. The reading of a shown hand may be disputed until the next hand begins. Accounting errors in calculating and awarding the pot may be disputed until substantial action occurs on the next hand. If a hand finishes during a break, the right to any dispute ends one minute after the pot is awarded.

~~29.27.~~ If using chips, and a pot that is split by having tied hands at the showdown has an odd chip, the chip is awarded to the player with ~~the highest ranking card~~a live hand clockwise from the dealer button. This section does not apply to splits between the high and low hands in high-low poker. If the lowest denomination chips in the pot are unable to be used to split the pot evenly, the dealer shall exchange the chips in order to divide split pots as evenly as possible.

~~30.28.~~ If a defective deck is used, all wagers in the pot must be returned to the players in the amount each contributed. A player who knows the deck was defective and attempts to win the pot by a bet is not entitled to the player's wagers in the pot. Such wagers must remain in the pot as a forfeited amount for the next game. A player who won a pot is entitled to keep it, even though the deck is subsequently found to be defective.

Except as provided by this section, an organization shall conduct a poker tournament according to this chapter.

1. An organization shall post tournament rules and a written schedule for each tournament and satellite tournament. A schedule must contain:

- a. Name of the site and organization;
 - b. Date or dates of the poker tournament;
 - c. Structure of the tournament prize payouts, once determined; and
 - d. Buyin, fees, add-ons, rebuy, and bounty options.
2. Each table will set a maximum of eleven players. Players will be distributed as evenly as possible between all tables.
 3. A seat assignment is determined at the time of the buyin by the player randomly drawing a card from a specially marked deck or custom cards.
 4. Tournament chips will be distributed directly to the player.
 5. Texas hold'em must be played according to the following rules:
 - a. The dealer shall deal two (hole) cards to each player, face downward, and one at a time. The first player to receive a card is the player to the left of the player who has the button. The last player to receive cards is the player assigned the button. After each player has received two cards, there is a betting round and the players may bet an amount not more than the posted table limit;
 - b. The dealer shall discard the top card of the deck and place it in the discard card pile (burn a card) and deal three community cards from the deck face upward, in the center of the table. After the flop, another betting round occurs; and
 - c. The dealer burns another card and then deals a fourth community card face upward in the center of the table. Another betting round takes place. The dealer burns another card before dealing the fifth community card face upward in the center of the table for the final betting round. A player shall make the best five card hand using any combination of hole and community cards. If there are two or more players remaining in the game after all bets are made, there is a showdown. The highest hand wins the pot.
 6. Omaha poker must be played according to the following rules:
 - a. The dealer shall deal four (hole) cards to each player, face downward, and one at a time. The first player to receive a card is the player to the left of the player who has the button. The last player to receive a card is the player assigned the button. After each player has received four cards, there is a betting round;
 - b. The dealer shall discard the top card of the deck and place it in the discard card pile (burn a card) and deal three community cards from the deck face upward, in the center of the table. After the flop, another betting round occurs;
 - c. The dealer burns another card and then deals a fourth community card face upward in the center of the table. Another betting round takes place. The dealer burns another card before dealing the fifth community card face upward in the center of the table for the final betting round. A player shall use two hole cards and three of the community cards to make their best hand. If there are two or more players remaining in the game after all bets are made, there is a showdown. In Omaha high, the highest hand wins the pot. In Omaha high-low split, the highest hand and the lowest hand split the pot. A player who wins in one direction (high or low) and ties a player for the other direction, receives three-quarters of the pot. A player who wins in both directions without a tie receives all of the pot. Aces may be used for either high or low.

7. A player confronted by a bet larger than the player's stack of chips may call "all in" and place the chips into the pot as a call. The excess part of the bet is either returned to the bettor or used to form a side pot with another player or players by matching the amount called. There is no limit on the number of side pots. Play must continue and the ~~player who is "all in" shall receive cards as other active players. The~~ remaining players shall place their bets into the side pot or pots. At the showdown, if the player who is "all in" has the high hand, the player wins the pot. The player with the second highest hand wins the side pot. If the player who is "all in" does not have the highest hand, the player with the highest hand wins both pots. In a high-low game, a similar procedure must be used to award the pots to the highest and lowest hand. A player who is "all in" and loses must leave the table or rebuy, if applicable.
8. A player may call "all in" at any time during a betting round provided that the bet does not exceed the tournament limit.
9. Chips may not be transferred or purchased from another player.
10. All chips must remain visible on the table throughout the event.
11. If a player is absent from the seat at the start of the initial deal of the hand, any ante or blind bet will be posted by the dealer on the player's behalf. A player shall be at the table by the time all other player's receive their hole cards in order to have a live hand for that deal.

CHAPTER 99-01.3-10

99-01.3-10-01. Calcutta.

A "calcutta" is a sporting event in which players wager at an auction on the competitors. A sporting event is a competitive sport involving physical skill or endurance and scores a person's physical ability. The conduct of a calcutta is the auction process. An auction pool is comprised of the wagers paid by players who offered the highest bids on the competitors. The auction pool is distributed to the player who wagered on the winning competitor. The winning competitor may be one competitor, a team of competitors, or ranked competitors. The payout of the cash prize to a winning player is based on a predetermined percentage of the auction pool, which may not exceed ninety percent. Only cash prizes may be awarded.

1. A calcutta may only be conducted for a professional or amateur sporting event held in North Dakota, but not for an elementary, secondary, or postsecondary education sporting event. An organization may conduct more than one calcutta on the same sporting event. More than one organization may independently conduct a calcutta on the same event.
2. An organization shall acquire a calcutta board from a distributor and complete on it the sporting event, date of the sports event, and manner of distributing the auction pool as a prize. The requirements of the players must be posted or made available to the players on the site.
3. Each competitor in a sporting event shall be identified before the auction begins. A competitor may also be a player who may wager on oneself. A competitor may wager on another competitor.
4. Each competitor shall be eighteen years of age or older to be eligible to be listed on a calcutta board. Each eligible competitor shall be offered through an auction to prospective players. An organization may require that all eligible competitors be bid on and may set a minimum bid. A player who offers the highest bid for a competitor by a verbal, sealed, or open bid wagers on that competitor. A player may wager any amount and buy more than one competitor. A competitor may be auctioned off only to one player. An organization may not bid on a competitor.
5. An open bid enables a potential player, during a certain time, to write the player's name and bid for a competitor on a register assigned that competitor. Each successive potential player interested in that competitor shall write the player's name and bid, of an amount higher than the previous bid, on the register. When the time period ends, the last player listed on the register wagers the amount bid on that competitor.
6. An organization shall conduct an auction at its site that may be where the sporting event is held. A player shall be present to bid.
7. Before an auction, an employee shall:
 - a. Verbally announce the predetermined percentages of the auction pool that will be paid to a winning player and retained by an organization. The amount a player may win depends on the total amount of the auction pool and not on any odds; and
 - b. Complete for each line on a board a sequential number starting with the number one and a name of a competitor.
8. The sequence of a verbal bid auction must be determined by a random drawing of the numbers assigned each line.
9. If a competitor is not bid on by a player, an organization may sell the competitor by:

- a. If there is more than one competitor not bid on, placing the competitors in one or more groups and auction a group as one competitor; or
 - b. Allowing a competitor to purchase oneself for a predetermined minimum wager.
10. After an auction, an employee shall complete this information for each line on a board and total the amounts wagered:
- a. Full name and address of the player who bought the competitor; and
 - b. Amount wagered by the player.
11. If a competitor was bought by a player and does not compete in the event, an organization shall refund the wagered amount to the player and adjust the prize payout.
12. After a sporting event, an employee shall complete on the board, for each winning player, the amount of the auction pool won. A winning player is the player who wagered on the competitor who won the event. An organization may award the prize to a winning player where the event is held. If an eligible competitor was not bought by a player and wins or places in the event, the organization shall retain the prize that would have been awarded on the competitor. If an ineligible competitor wins or places in the event, the organization shall award the prize that would have been awarded on the competitor to the next highest ranked eligible competitor.
13. An organization shall make a good-faith effort to contact a winning player to award a prize. If a prize is unclaimed for thirty days following the notification or a player attempts to falsify or falsifies a record of win, the prize is forfeited.

 - d. At the start of a game the pull tabs must be randomly placed in all the stacking columns.  - h. An organization shall close a game by the end of a quarter. If all top tier winning pull tabs have been redeemed or low-level switches in all but two columns of a device have been triggered, an organization may close a game for the quarter within fourteen calendar days before the end of that quarter. An organization may start a new game for the next quarter within fourteen calendar days before the next quarter begins. However, an organization may not start a new game and end that game within this fourteen-calendar-day period. When a game is being closed, an employee shall post a sign stating that the game is being sold out;
 - i. If the percent-of-accuracy of all the games involving a device for a site for the previous quarter was less than ninety-eight and one-half percent, and a cash shortage of more than one hundred dollars, an employee who did not conduct the game, [have sole access to the games in play, cash banks, and receipts or cash profit for the games](#), shall do a weekly interim audit of the games at the site for up to twelve continuous weeks or until the organization determines, resolves, and documents the cause. One of the weekly interim audits may be the audit required by subsection 7 of section 99-01.3-03-10. An organization shall start the weekly audits no later than the date on which its tax return for the quarter was filed with the attorney general. However, if games involving a device are conducted without a bar employee redeeming a winning pull tab, pull tab games not involving a device are also conducted, and the combined percent-of-accuracy of all pull tab games at the site for the previous quarter was ninety-eight and one-half percent or greater, no weekly interim audit is required. Percent-of-accuracy is computed as cash profit divided by adjusted gross proceeds; and
 - j. An organization may transfer a device from a site to another site or rotate a device among sites. If an organization discontinues gaming at a site, it may close a game or transfer the game to a device at another site. If a game is in the process of being conducted through a device, an organization may not transfer the game to a jar bar.
15. Two or more organizations may use devices at the same site on different days of the week provided the organizations use different names of games in the devices and the bar uses separate cash banks.

CHAPTER 99-01.3-14

99-01.3-14-01. Restrictions and requirements.

1. An organization may not accept, and a recipient or potential recipient of net proceeds may not give or offer to give, a payment, gift, service, loan, personal or real property, or other thing of material value, for disbursing or receiving net proceeds. However, a recipient or potential recipient of net proceeds that is an organization or group of people may initiate and transact a formal agreement with a donor organization to voluntarily provide a gaming or nongaming related service to the donor organization in exchange for receiving net proceeds; provided, the agreement is first approved by the attorney general or complies with guidelines prescribed by the attorney general. If the attorney general approves the service, the donor organization shall document the service by recording the location, names of volunteers, description of service, number of hours volunteered, and value of the service based on a reasonable hourly rate. The donor organization shall offset the value of these services against the amount of net proceeds disbursed to the recipient during a quarter by reporting the value of these services as an adjustment on a tax return.
2. A disbursement of net proceeds must be specific as to recipient and use. After an organization disburses net proceeds, it may not interfere with a recipient's control of the funds or attempt to own or influence the use or sale of personal or real property bought by or for a recipient of the funds.
3. Use of net proceeds for economic development or tourism programs may not directly benefit a member, employee, or board of directors' member of a donor or donee organization nor may this person have a financial interest in a funded economic development or tourism program.
4. No private athletic, social, hobby, trade, business, professional, or similar clubs or associations may receive net proceeds, unless the use of the funds complies with subsection 2 of North Dakota Century Code section 53-06.1-11.1 or section 99-01.3-14-02. An expense related directly or indirectly with gaming is not an eligible use.
5. Restrictions on fundraising activities are:

 - b. An organization may only use net proceeds for expenses related to fundraising activities if the gross receipts from the fundraising activity are deposited into the trust account and the net income of the fundraising activity is used for a specific recipient or purpose that qualifies as an eligible use of net proceeds;
 - c. If an organization conducts a qualifying fundraising event and deposits the event's gross receipts in or pays the expenses from other than its trust account, it may not disburse net proceeds to the recipient unless it transfers the net income from the event to its trust account and makes a proper adjustment on a tax return; and
 - d. If a civic and service, fraternal, or veterans' organization uses net proceeds to conduct a fundraising activity and the amount spent on expenses exceed the net income generated by the activity, it shall reimburse the trust account for the difference between the expense amount and the net income amount with nongaming funds and make a proper adjustment on the tax return.

6. The attorney general may require a recipient of net proceeds to document the use of the funds and reimburse a donor organization if the funds were used for an ineligible use.
7. Unless an organization has first received approval from the attorney general, it may not sell a gift certificate or other thing of value to a recipient of its net proceeds.
8. If a check for a disbursement of net proceeds is not cashed by a recipient within six months of the date of the check, an organization shall contact the recipient to cancel or cash the check. If a check is voided, an organization shall make a proper adjustment on a tax return. If a recipient of net proceeds cashes a check related to a disbursement of net proceeds but has not applied the amount toward the intended eligible use within six months of the date of the check, the organization may request the recipient to return the net proceeds.
9. An organization may only disburse net proceeds to a recipient provided the recipient first requests a donation in writing and provides a description of the intended use and amount requested and the request is signed and dated. ~~Also, if the recipient is a charitable organization, professional fundraiser, or professional solicitor, the recipient shall provide the organization with evidence that it has or is exempt from a charitable solicitations license required by North Dakota Century Code chapter 50-22.~~ This rule does not apply to an unsolicited donation of net proceeds or a disbursement of net proceeds by an organization to a program or service that qualifies as an eligible use and which is supported directly by the organization.
10. If an organization conducts or enables a nonprofit corporation, community or school club, or other similar entity to conduct a fundraising event at the organization's facility, the organization may not exchange the gross or net receipts of the fundraising event for net proceeds.
11. An organization may not disburse net proceeds to a recipient on the condition that the recipient hold a meal or banquet at the donor's facility.
12. No disbursement of net proceeds can be used ~~partly~~ for services or fees that do not qualify as an eligible use or for any gaming-related expense. No disbursement of net proceeds to a recipient can be designed to circumvent the allowable expense limits.
13. If an organization is involved in any of the following types of transactions, it shall deposit the net proceeds, income, or receipts directly into its trust account or, if it is exempt from having a trust account, deposit the net proceeds, income, or receipts in its gaming account, and make a proper adjustment on a tax return:
 - a. The organization receives net proceeds from another organization and the net proceeds have been designated for a specific eligible use which the recipient has paid for or will pay for with net proceeds, or the net proceeds have not been designated for a specific eligible use;
 - b. The gross receipts derived from fundraising activity according to subdivision b of subsection 5 of section 99-01.3-14-01;

99-01.3-16-04. Quality standards for pull tabs.

A manufacturer shall manufacture paper pull tabs according to these standards:

1. Construction.
 - a. A deal must be designed, constructed, glued, and assembled to prevent the determination of a winning pull tab or numbers or symbols without first removing the tabs or other covering.
 - b. All the pull tabs of a deal must have the same game serial number which cannot be repeated on the same form number for three years.
 - c. When a tab or other covering is removed, the numbers or symbols must be fully visible in the window. The numbers or symbols can be displaced to the left or right in a window for increased security.
 - d. The window slits on a pull tab must be perforated on three sides. A pull tab must be glued on all four edges and between each window. The glue must be of sufficient strength and type to prevent any separation.
2. Opacity. Concealed numbers, symbols, or winner protection features cannot be viewed or determined from the outside of a pull tab using a high-intensity lamp.

3. Color. It must not be possible to detect or pick out winning from losing pull tabs through a variation in printing graphics or colors.
4. Printed information. The minimum information printed on a pull tab must be as follows, except that subdivisions b, c, and d are not required for a folded or banded jar ticket or to a two-ply or three-ply card with only one perforated break-open tab which measures one and one-quarter inches by two and one-quarter inches or less in size, subdivisions a, c, d, and e are not required for pull tabs used with a tip board, and subdivisions b, c, and e are not required for a pull tab used with a prize board:
 - a. Name of manufacturer or its logo;
 - b. Name of game;
 - c. Cost per pull tab;
 - d. Manufacturer's form number;
 - e. Number of winning pull tabs and winning numbers or symbols, and prize amounts, or a flare must be included with the game providing that information; and
 - f. Unique minimum five-character game serial number, printed on the game information side of the pull tab.
5. Winner protection. A unique symbol or printed security device, such as a specific number keyed to a particular winning pull tab, or the name of the symbol or some of the symbol colors changed for a winning pull tab, or other similar protection must be placed in the winning windows of winning pull tabs. Also, a winning pull tab that has a prize greater than twenty dollars must have a secondary form of winner verification.
6. Randomization. The winning pull tabs must be intermixed among all other pull tabs in a deal to eliminate any pattern between deals, or portions of deals, from which the location or approximate location of any winning pull tab may be determined. A deal must be assembled so that no placement of winning or losing pull tabs exists that allows prize manipulation or pick out. Banded jar tickets packaged in a bag must be randomized.
7. Guillotine cutting. It must not be possible to isolate winning or potential winning pull tabs of a deal by variations in size or the appearance of a cut edge of the pull tabs.
8. Packaging.
 - a. A deal must contain a seal warning the purchaser that the deal may have been tampered with if the container was received with the seal broken. A seal must ensure that a deal's pull tabs are not accessible from outside the container when sealed. A manufacturer shall seal or tape every entry point into the container. The seal or tape must be tamper-resistant and be designed so that should a container be opened or tampered with, it would be easily noticed. For jar tickets packaged in a bag, the glue used to seal the flap of the bag must be permanent adhesive glue. The required seal cannot be a manufacturer's cellophane shrink wrap.
 - b. A manufacturer shall print, in bold letters, "Pull tabs must be removed from this packaging container and thoroughly mixed before sale to the public" or similar language on the outside of a container.
 - c. A deal's game serial number must be legibly placed on or be able to be viewed from the outside of the deal's container.

- d. For a deal shipped to North Dakota, a flare for a pull tab or jar ticket deal must be located on the outside of the deal's sealed container so that the manufacturer's security seal will not be broken to access the flare.
9. Number of top tier winners. A deal must have at least two top tier winning pull tabs, except for a deal for a prize board and a last sale prize feature.
10. A manufacturer may not duplicate (print) a winning number, symbol, or set of symbols of any nonpromotional jar ticket or pull tab on any promotional jar ticket or pull tab.

99-01.3-16-08. Manufacturing specifications - Dispensing device.

A pull tab dispensing device must meet these specifications:

1. If a device is designed to accommodate two or more different games of pull tabs, each compartment must independently meet the specifications of this section;

The power cord must be ten feet in length and have a three-prong ground. A surge protector or in-line power filter must be installed in-line on the main ~~powerline~~[power line](#) to a device. A device must safely and operatively

withstand a static test of twenty thousand volts of electricity and maintain proper voltage during a low electrical current (brownout);

4. A stacking column must be adjustable for varying lengths of pull tabs. However, as an option, a device may use replaceable stacking columns that accommodate varying lengths of pull tabs. The device must accommodate a minimum pull tab size of one and seven-eighths inches in width by two and five-eighths inches in length, a maximum pull tab size of one and seven-eighths inches in width by four and one-fourth inches in length, or both sizes;
5. A device must be adjustable for varying thicknesses of pull tabs;
6. Glass must be placed in the front of the device enabling an employee to see whether a device is low on pull tabs;
7. A device must have a dispensing outlet or tray to catch a dispensed pull tab;
8. A device must have one currency validator. A coin acceptor is not allowed;
9. A pull tab device must accommodate pricing of twenty-five cents, fifty cents, one dollar, and two dollars per pull tab and dispense the correct number of pull tabs based on the amount of credit played. The standard price per pull tab must apply to all columns;
10. An exterior door must have at least one keyed lock. The key must be different from all other keys used on other devices manufactured by the manufacturer;
11. A pull tab device may have an optional "all" player button that activates the device to dispense pull tabs equal to the value of the unplayed credits and randomly selected by a random number generator or player button sequencing concept. Devices that dispense pull tabs involving a prize board are not required to select tickets by use of a random number generator;
12. A device must have an interior mode switch, interior dipswitch, or an exterior mode switch activated by a key which enables a person to:
 - a. Set the price per pull tab; and
 - b. Unless a device prints reports prescribed by subsection 15, access the accounting information required by subsection 13 and, if the device has nonresettable electronic accounting meters, subsection 14;
13. Unless a device prints reports prescribed by subsection 15, there must be at least two independent resettable electronic or mechanical accounting meters. The meters must maintain accounting information of at least four digits in length and be capable of maintaining the accounting information for six months after electrical power to a device is disconnected or the electrical current used to operate a device is switched off. The meters must record the:
 - a. Total value of currency validated; and
 - b. Total number of pull tabs dispensed;
14. Unless a device prints reports prescribed by subsection 15, there must be at least two independent nonresettable electronic or mechanical accounting meters. The meters must maintain accounting information of at least six digits in length and be capable of maintaining

the accounting information for six months after electrical power to a device is disconnected or the electrical current used to operate a device is switched off. The meters must record the:

- a. Cumulative value of currency validated; and
 - b. Cumulative number of pull tabs dispensed;
15. Unless a device has resettable and nonresettable accounting meters prescribed by subsections 13 and 14, the device must print a cash pickup and a lifetime activity report.
- a. A cash pickup and a lifetime activity report must:
 - (1) Be printed and accessible only from the interior of a device;
 - (2) State the time and date of the present report and of the preceding report. The time must be expressed in numeric hours and minutes. The hour must be expressed as a.m. or p.m.;
 - (3) State the unique device number; and
 - (4) State a sequential report number, which must be at least three digits in length, starting with number one.
 - b. A cash pickup report, based on resettable electronic accounting meters, must include this information for activity since the preceding report:
 - (1) For a pull tab device, number and value of pull tabs dispensed from all columns; and
 - (2) Value of currency validated.
 - c. A lifetime activity report, based on nonresettable electronic accounting meters, must include this information for activity since a device was manufactured:
 - (1) For a pull tab device, cumulative number and value of pull tabs dispensed from all columns; and
 - (2) Cumulative value of currency validated;
16. To ensure a commingling of pull tabs, a random number generator or player button sequencing concept must be used to select a particular column from which a pull tab will be dispensed. A selection process is random if it does not produce a significant statistic of recurring patterns. A player button sequencing concept must field each button at least one hundred times a second. This subsection does not apply to a dispensing device used in the conduct of a prize board;
17. Instructions for player operation must be permanently affixed or placed under glass or other transparent material on the front of a device;
18. A pull tab device must have one or more player buttons located on the front to activate the dispensing of a pull tab. However, excluding an "all" player button, the number of player buttons may not exceed the number of columns. Regardless of which player button is pressed, the selection of a particular column from which a pull tab is dispensed must be done by a random number generator or player button sequencing concept. This subsection does not apply to a dispensing device used in the conduct of a prize board;
19. A device must have an LED or LCD display screen of at least four digits in length. However, if a device uses two independent nonresettable electronic accounting meters, the device must

have an LED or LCD display screen of at least six digits in length. The digits must be one-quarter of one inch in height. The value of currency validated must be displayed on the LED or LCD screen as a monetary credit which is reduced as a device vends a pull tab. Unless a device prints reports prescribed by subsection 15, the LED or LCD display screen must also display the accounting information required by subsection 13 and pricing information required by subdivision a of subsection 12;

20. A device must record every vend, including a test vend, of a pull tab when the door of the dispensing device is closed and every currency validation on the accounting meters required by subsections 13 and 14 or subsection 15;
21. If a device malfunction occurs or electrical power is interrupted, the value of credits previously displayed on an LED or LCD display screen must be correctly redisplayed immediately after the malfunction is cleared or electrical power is restored. However, this rule does not apply if a device is totally inoperable;
22. In a pull tab device a column of pull tabs must automatically discontinue operation, triggered by a micro, optical, or software controlled switch, when the column has fewer than fifty pull tabs remaining. However, this rule does not apply when an organization is closing a game at which time a micro, optical, or software controlled switch may be circumvented;
23. A device must automatically stop operating when there is only one column of pull tabs functioning. However, if this occurs and there are unplayed credits on the device, the device may dispense pull tabs equal to the value of the unplayed credits from the remaining column before the device automatically stops operating. This subsection does not apply to a dispensing device used in the conduct of a prize board;
24. An identification plate must be affixed to an exterior side panel and contain the device's:
 - a. Manufacturer;
 - b. Name of device;
 - c. Serial and model numbers; and
 - d. Date of manufacture which may be part of the model or serial number;
25. No device may have an auxiliary remote control unit for posting credits;
26. A device must automatically stop operating when a nonresettable meter is disconnected; and
27. A device must have a maintenance and operations manual.

Only upon the close of a game at the end of the quarter can the finite details of a game be made available. Generating this report prior to the game being closed must cause immediate and automatic termination of the entire game.

17. All accounting information from an electronic pull tab device operating system site server must be automatically downloaded to the manufacturer's central computer system's central server immediately after the close of electronic pull tab activity each business day.

a. An organization shall have the capabilities of printing all required records and reports from the site server and the manufacturer's central computer system's central server.

b. An organization's electronic pull tab device operating system may be programmed for hours of operation based on when alcoholic beverages may be dispensed according to applicable regulations of the state, county, or city.

18. Electronic pull tab devices must be a stand-alone cabinet style device. No device may be a hand-held portable device or affixed to a bar, counter, or table top. Electronic pull tab devices must conform to the following minimum standards:

This includes top prize changes, selectable settings, or any other option that would affect payout percentage.

19. An electronic pull tab device must be robust enough to withstand forced entry that would leave behind physical evidence of the attempted entry, or such entry causes an error code that is displayed and transmitted to the central computer system, and which inhibits game play until cleared, and which does not affect the subsequent play or any other play, prize, or aspect of the game.

20. An electronic pull tab device must be designed so that power and data cables into and out of the electronic pull tab device can be routed so that they are not accessible to the general public. Security related wires and cables that are routed into a logic compartment must be securely fastened within the interior of the device.

The currency validator must be electronically based and be configured to ensure that they only accept valid currencies of legal tender and must reject all other items. Rejected currencies should be returned to the player. The currency validator must be constructed in a manner that protects against vandalism, abuse, or fraudulent activity. In addition a currency validator must meet the following rules:

a. Each valid currency must register the actual monetary value received for the denomination being used on the player's credit meter;

b. Credits must only be registered when:

(1) The currency has passed the point where it is accepted and stacked; and

(2) The validator has sent the "irrevocably stacked" message to the electronic pull tab device.

- h. If the electronic pull tab device is capable of printing a duplicate voucher, the duplicate voucher must clearly state the word "DUPLICATE" on its face.

28. To further meet the requirements of subdivisions a through h of subsection 27, the electronic pull tab device must have the ability to retain a log of the last twenty-five voucher-out events. The voucher-out log must contain sufficient information to reconstruct the voucher-out event in order to resolve potential player disputes.

33. The credit meter must be maintained in cash value and must at all times indicate all cash available for the player to purchase tickets or cash out with the exception of when the player is viewing an informational screen, such as a menu or help screen item. This should be displayed to the player unless a tilt condition or malfunction exists.

Eight digits must be used for the dollar amount and two digits used for the cents amount. The meter must roll over to zero upon the next occurrence, and any time the meter exceeds ten digits and after 9,999,999,999 has been reached or any other value that is logical. Occurrence meters must be at least eight digits in length; however, are not required to automatically roll over. Meters must be labeled so they can be clearly understood in accordance with their function. All electronic pull tab devices must be equipped with a device, mechanism, or method for retaining the value of all meter information specified in these rules which must be preserved in the event of power loss to the device. 34. An electronic pull tab device may not have software that determines the outcome of any electronic pull tab game. All application software must be owned or licensed by the manufacturer. All game outcomes are determined at the time of deal creation by the electronic pull tab operating system software as outlined within this section of the administrative rules.

The electronic pull tab operating system must be dedicated primarily to functions related to the creation of electronic pull tabs and their creation, randomization, storage, and transmittal to the electronic pull tab devices. It also must be capable of generating the data necessary to provide the reports required within this section. The operating system must be operationally independent from the electronic pull tab device. The electronic pull tab operating system, logic components, and site server must be in a locked, secure enclosure with key controls in place.

The electronic pull tab operating system must provide a means for terminating the electronic pull tab game if unopened pull tab information has been accessed or at the discretion of the attorney general.

37. Progressives, cashless gaming, bonus plays, promotions, or other gaming management or marketing functions are not allowed. An extended play feature may be used if there is no additional consideration required from the player and the features do not alter the predetermined prize to be awarded for the pull tab ticket. No player skill may be required with the extended play feature.

38. As used in this section, unless the context requires a different meaning:

- a. "Card position" means the first electronic pull tab dealt, second electronic pull tab dealt in sequential order.
- b. "Number position" means the first number drawn in sequential order.

39. Any random number generation used in connection with the central computer system must be by use of a microprocessor and random number generation program that meets the following random selection tests:

- a. Chi-square analysis. Each card, symbol, number, or position which is wholly or partially determinative of the outcome of the game satisfies the ninety-nine percent confidence limit using the standard chi-square analysis.
- b. Runs test. Each card, symbol, number, or position does not, as a significant statistic, produce predictable patterns of game elements or occurrences. Each card symbol, number, or position will be considered random if it meets the ninety-nine percent confidence level with regard to the "runs test" or any generally accepted pattern testing statistic.
- c. Correlation analysis. Each card, symbol, number, or position is independently chosen without regard to any other card, symbol, number, or position drawn within that game play. Each card, symbol, number, or position is considered random if it meets the ninety-nine percent confidence level using standard correlation analysis.
- d. Serial correlation analysis. Each card, symbol, number, or position is independently chosen without reference to the same card, number, or position in the previous game. Each card, number, or position is considered random if it meets the ninety-nine percent confidence level using standard serial correlation analysis.

40. The central computer system may not permit the alteration of any accounting or significant event log information that was properly communicated from the electronic pull tab device without supervised access controls. If financial data is changed, an automated audit log must be capable of being produced to document:

41. The electronic pull tab operating system must have a medium for securely storing electronic pull tab deals on the site server which must be mirrored in real time by a backup medium. The manufacturer's central computer system server also must provide a means for storing duplicates of the electronic deals, already transmitted to the electronic pull tab devices site

server, so as to reflect, on an ongoing basis, changes in the transmitted electronic deals as they occur.

42. All storage must be through an error checking, nonvolatile physical medium, or an equivalent architectural implementation, so if the primary storage medium fails, the functions of the central computer system and the process of auditing those functions can continue with no critical data loss.

43. The database must be stored on redundant media so that no single failure of any portion of the system would cause the loss or corruption of data.

44. In the event of a catastrophic failure when the central computer system cannot be restarted in any other way, it must be possible to reload the central computer system from the last viable backup point and fully recover the contents of that backup, recommended to consist of at least the following information:

a. Significant events;

b. Accounting information;

c. Auditing information; and

d. Specific site information, such as employee files with access levels.

45. Connections between all components of the central computer system only must be through the use of secure communication protocols that are designed to prevent unauthorized access or tampering, employing advanced encryption standards or equivalent encryption with changeable seeds or algorithms. More specifically, secure connections and encryption must be utilized between the interface component and the system. This same level of security is not required between the electronic pull tab device and the interface component when they are housed within the same physical cabinet or enclosure.

46. All data communication must incorporate an error detection and correction scheme to ensure the data is transmitted and received accurately.

47. The system must be capable of detection and displaying certain conditions. These conditions must be recorded on an error log that may be displayed or printed on demand and must archive the conditions for a minimum of ninety days. The conditions include:

a. Power reset or failure of an electronic pull tab device or any component of the online data system; and

49. The minimum width for encryption keys is one hundred twelve bits for symmetric algorithms and one thousand twenty-four bits for public keys.

a. There must be a secure method implemented for changing the current encryption key set. It is not acceptable to only use the current key set to "encrypt" the next set.

b. There must be a secure method in place for the storage of any encryption keys. Encryption keys must not be stored without being encrypted themselves.

50. The following significant events, if applicable, must be collected from the electronic pull tab device and communicated to the central computer system for storage and a report of the occurrence of the significant event must be made available upon request:

a. Power resets or power failure;

b. Communication loss between an electronic pull tab device and any component of the electronic pull tab site operating system;

c. Door openings;

d. Currency validator errors;

b. The electronic pull tab operating system must have multiple security access levels to control and restrict different classes;

c. The electronic pull tab operating system access accounts must be unique when assigned to the authorized personnel and shared accounts amongst authorized personnel must not be allowed;

d. The storage of passwords and personal identification numbers must be in an encrypted, nonreversible form; and

e. A program or report must be available which lists all registered users on the electronic pull tab operating system, including their privilege level. This report must include all user accounts that have access to system configurations, data, or other sensitive areas.

53. All components of an electronic pull tab operating system that allows access to users, other than end-users for game play, must have a password signon with two-level codes comprising the personal identification code and a personal password:

a. The personal identification code must have a length of at least six ASCII characters; and

b. The personal password must have a minimum length of six alphanumeric characters, which should include at least one nonalphabetic character.

54. An electronic pull tab operating system must have the capability to control potential data corruption that can be created by multiple simultaneous log on by system management personnel.

a. An electronic pull tab operating system must specify which of the access levels allow for multiple simultaneous sign on by different users and which of the access levels do not allow for multiple sign on, and if multiple sign on are possible, what restrictions, if any, exist; or

b. If an electronic pull tab operating system does not provide adequate control, a comprehensive procedural control document must be drafted for the attorney general's review and approval.

55. Where the site operating system or components are linked with one another in a local network for function sharing or other purposes, communication protocols must be used which ensure erroneous data or signals will not adversely affect the operations of any such system or components.

56. Dedicated and protected network connections prohibiting unauthorized access, may allow two or more central computer systems to share information. Deal details and other information prohibited from being viewed, as outlined in other sections of these rules, must not be available or transmitted between the connected systems or facilities.

57. The central computer system may be used to record the data used to verify game play and to configure and perform security checks on electronic pull tab devices provided such functions do not affect the security, integrity, or outcome of such games.

58. Central computer system software components and modules must be verifiable by a secure means at the system level denoting program identification and version. The central computer system must have the ability to allow for an independent integrity check of the components and modules from an outside source and is required for all control programs that may affect the integrity of the central computer system. This must be accomplished by being authenticated by a third-party device, which may be embedded within the central computer system software or having an interface port for a third-party device to authenticate the media. This integrity check will provide a means for field verification of the central computer system components/modules to identify and validate the programs and files. The test laboratory, prior to system approval, must approve the integrity check method.

59. Following the initiation of an nonvolatile memory reset procedure, the game program must execute a routine, which initializes all bits in critical nonvolatile memory to the default state. All memory locations intended to be cleared as per the nonvolatile memory clear process must be fully reset in all cases. For electronic pull tab devices that allow for partial nonvolatile memory clears, the methodology in doing so must be accurate.

60. The default game display immediately after an nonvolatile memory reset must not be the advertised top prize on any selectable line. The default game display, upon entering game play mode, must also not be the advertised top prize.

61. It must not be possible to change a configuration setting that causes an obstruction to the electronic accounting meters without a nonvolatile memory clear. Notwithstanding, a change to the denomination must be performed by a secure means, which includes access to the locked logic compartment or other secure method provided that the method can be controlled by the attorney general.

62. Critical memory is used to store all data that is considered vital to the continued operation of the electronic pull tab device. This includes:
- a. All electronic meters required in subsection 33 of section 99-01.3-16-09.6, including last currency data and power up and door open metering;
 - b. Current credits;
 - c. Electronic pull tab device game configuration data;
 - d. Information pertaining to the last ten plays with the play outcome;
 - e. Software state;
 - f. Any prize structure configuration information residing in memory; and
 - g. A log of the last one hundred significant events.
63. Critical memory storage must be maintained by a methodology that enables errors to be identified. This methodology may involve signatures, checksums, partial checksums, multiple copies, timestamps, or effective use of validity codes, or any combination.
64. Comprehensive checks of critical memory must be made following game initiation but prior to display of game outcome to the player. Critical memory must be continuously monitored for corruption. The methodology must detect failures with an extremely high level of accuracy.
65. An unrecoverable corruption of critical memory must result in an error. The memory error should not be cleared automatically and should result in a tilt condition, which facilitates the identification of the error and causes the electronic pull tab device to cease further function. The critical memory error should also cause any communication external to the electronic pull tab device to immediately cease. An unrecoverable critical memory error must require a full nonvolatile memory clear performed by a licensed distributor.
66. Nonvolatile memory space that is not critical to the security of the electronic pull tab device is not required to be validated.
67. Program storage device means the media or an electronic device that contains the critical control program components. Device types include EPROMs, compact flash cards, optical disks, hard drives, solid state drives, USB drives, etc. All program storage devices must:
- a. Be housed within a fully enclosed and locked logic compartment;
 - b. Be clearly marked with sufficient information to identify the software and revision level of the information stored in the device. In the case of media types on which multiple programs may reside it is acceptable to display this information via the attendant menu;
 - c. Validate themselves during each processor reset;
 - d. Validate themselves the first time they are used; and
 - e. CD-ROM, DVD, and other optical disk-based program storage must:
 - (1) Not be a rewritable disk; and
 - (2) The "session" must be closed to prevent any further writing.

69. Non-EPROM program storage must meet the following rules:

- a. The software must provide a mechanism for the detection of unauthorized and corrupt software elements, upon any access, and subsequently prevent the execution or usage of those elements by the electronic pull tab device. The mechanism must employ a hashing algorithm which produces a message digest output of at least one hundred twenty-eight bits;
- b. In the event of a failed authentication, after the electronic pull tab device has been powered up, the terminal immediately should enter an error condition and display an appropriate error. This error must require operator intervention to clear and must not clear until the data authenticates properly, following the operator intervention or the media is replaced or corrected, and the electronic pull tab device's memory is cleared.

70. Alterable media must meet the following and additional rules:

- a. Employ a mechanism that tests unused or unallocated areas of the alterable media or unintended programs or data and tests the structure of the media for integrity. The mechanism must prevent further play of the electronic pull tab device if unexpected data or structural inconsistencies are found;
- b. Employ a mechanism for keeping a record any time a control program component is added, removed, or altered on any alterable media. The record must contain a minimum of the last ten modifications to the media and each record must contain that date and time of the action, identification of the component that affected the reason for the modification, and any pertinent validation information.

71. Program storage devices that do not have the ability to be modified while installed in the electronic pull tab device during normal operation must be marked clearly with sufficient information to identify the software and revision level of the information stored in the devices.
