Subject: Metrology Extension

Good Afternoon Junell

The Commission received your request for permission to use your standards (10 – 5 gallon test measures and 1 – 100 gallon prover) past the expiration date of the current metrology (January 9, 2018). The calibration due date is extended to February 5, 2018 only under the condition that the standards remain in good condition with no damage that would affect the accuracy.

If you have any questions, please contact me. Thank you!

Hi Shelly

I just talked to Heidi in the metrology lab in Minneapolis and the soonest they can get us in for prover calibration is February 5th. Our calibration certificates expire on January 9th. Can you issue a variance for us so we can use the cans during that period? January is one of the prime months that we perform our midgrades and calibrations for customers (our winter work) Thank you for considering this.
