December 6, 2017

Bob Fogarty
CHS Inc.
Box 429
Minot ND 58701

Dear Mr. Fogarty:

The Commission received your request to use your portable prover with serial number Browne 42495 past the expiration date of the current metrology (July 10, 2017).

The calibration due date is extended to July 1, 2018 only under the condition that the prover remains in good condition with no damage that would affect the accuracy.

Prior to July 1, 2018, the prover must be certified to meet the Temporary Variance Permit Conditions identified in the Temporary Variance Permit issued on December 6, 2017.

If you have any questions, please contact me. Thank you.

Sincerely,

Konrad Crockford
Compliance Division
