

## **LATE-FILED EXHIBIT 24**

### **Discrepancies from Consulted Agency Recommendations, if any**

ONEOK consulted with agencies as identified in Exhibit 8 and has reviewed the responses from these agencies, and comments received by other agencies (Exhibits 10 and 11). ONEOK will comply with all recommendations or requirements outlined by these agencies. The only exception is a recommendation from the North Dakota Parks and Recreation Department to conduct an aerial survey of the Project area to identify raptor or eagle nests within ½ mile of the Project area. ONEOK has not conducted an aerial survey and does not believe one to be necessary. ONEOK believes that the measures outlined in its migratory bird plan (provided as part of Late-filed Exhibit 22) will meet the intent of the North Dakota Parks and Recreation Department recommendation. ONEOK will conduct ground reconnaissance of each area to be disturbed by construction of the Project in advance of construction to ensure no migratory birds, raptors, or eagles are present in the vicinity of the Project that could be affected by construction.
