Tulsa, Oklahoma 74103

Dear Ms. Perry-Chambers:

The U.S. Army Corps of Engineers (Corps) has reviewed the information you provided for the proposed Bear Creek Natural Gas Plant Expansion project. This information was received by our office on January 2, 2018. The project is located at Latitude 47.440523, Longitude -102.784664, Dunn County, North Dakota.

Specifically, the project proposes the expansion of the facility to increase the gas processing capacity to 175 MMscfd.

The Corps is responsible for administering federal laws that regulate certain activities in the waters of the United States (WOUS). The authority applicable to this responsibility is Section 404 of the Clean Water Act (CWA) (33 U.S.C. 1344), which prohibits the discharge of dredged or fill material into waters of the United States without authorization in the form of a Department of the Army (DA) permit.

Based on the information provided, the project will not involve a regulated discharge of dredged or fill material under Section 404 of CWA. Therefore, the activity is not subject to DA regulatory authorities and no permit pursuant to Section 404 is required from the Corps. However, a DA permit authorization may be required should changes be made in your project that result in a regulated discharge of dredged or fill material into waters of the U.S.

Although a Department of the Army permit is not required for this project, this does not eliminate the requirement that you obtain any other applicable Federal, State, Tribal or local permits as required.

We appreciate your feedback. At your earliest convenience, please tell us how we are doing by completing the customer survey on our website under *Customer Service Survey*.
