**Re: Tree and Shrub Inventory
Andeavor Y-Grade Hub Project**

Dear Mr. Bender:

Carlson McCain, Inc. has completed the tree and shrub inventory for the Andeavor Y-Grade Hub pipeline project (Project). Carlson McCain performed a tree and shrub inventory with a 300-foot wide project corridor, as identified in the Siting Application submitted on February 5, 2018. Since the application, the construction right-of-way (ROW) was refined so that trees and shrubs were avoided during construction.

The Project followed existing pipeline ROWs and was co-located in existing pipeline easements for much of the route. Where the construction ROW did not follow existing easements, the construction corridor was reduced and/or the pipeline was installed using the horizontal direction drill (HDD) method to avoid trees and shrubs.

By using these locating and construction techniques, no trees and/or shrubs were removed by Andeavor during construction of the Y-Grade Hub project.

Please call me at 701-595-7001 if you have any questions or need additional information.

Sincerely,

A handwritten signature in black ink, appearing to read 'Todd Hartleben', with a long horizontal flourish extending to the right.
