**RE: Prosperity Wind Farm, LLC and Prosperity Wind Farm 2, LLC's Ten Year Plan for 2018-2028
Case No. PU-18-_____**

Dear Mr. Nitschke:

Enclosed for filing are originals of the following documents:

1. Prosperity Wind Farm, LLC and Prosperity Wind Farm 2, LLC's Ten Year Plan: 2018-2028;
2. Notice of Filing Ten Year Plan: 2018-2028; and
3. Certificate of Service.

Electronic copies of the enclosed documents were filed with the Commission today via e-mail. If you have any questions, please let me know.

Sincerely,

MOLLIE M. SMITH

MMS/bd
Enclosures

TEN YEAR PLAN: 2018-2028
Prosperity Wind Farm, LLC and Prosperity Wind Farm 2, LLC

June 2018

In accordance with N.D.C.C. § 49-22-04 and N.D.A.C. Ch. 69-06-02, Prosperity Wind Farm, LLC (“Prosperity 1”) and Prosperity Wind Farm 2, LLC (“Prosperity 2” and collectively with Prosperity 1, “Prosperity 1 and 2”), submit the following Ten Year Plan for years 2018 through 2028.

- (1) *A description of the general location, size, and type of all facilities to be owned or operated by the utility during the ensuing ten years, as well as those facilities to be removed from service during the ten-year period.*

Prosperity 1 and 2 are proposing to develop and construct an up to 200 MW wind project known as the Prosperity Wind Farm, and an up to 200 MW wind farm known as Prosperity Wind Farm 2, respectively. The Prosperity Wind Farms will be located approximately 25 miles west of Fargo in Cass County, ND. The projects will consist of wind turbine generators, access roads, an electrical collection system, an O&M building, and a project substation.

Prosperity 1 and 2 do not currently have any facilities within North Dakota and, therefore, have no plans to decommission any facilities. The Prosperity 1 and 2 Wind Farms will have an estimated life of greater than 10 years. As such, Prosperity 1 and 2 do not have any plans to decommission any proposed facilities within the timeframe of this plan.

- (2) *An identification of the location of the tentative preferred site for all electric energy conversion facilities and the tentative location of all electric transmission facilities on which construction is intended to be commenced within the ensuing five years and such other information as may be required by the commission. The site and corridor identification shall be made in compliance with the criteria published by the commission pursuant to section 49-22-05.1.*

The Prosperity 1 and 2 Wind Farms will be located adjacent to each other, west of Fargo and approximately 11 miles northwest of Casselton in western Cass County, North Dakota. A map of the proposed site for the Prosperity Wind Farms is provided in Exhibit A, attached hereto. The projects will be designed so as to comply with the exclusion and avoidance areas referenced in Section 49-22-05.1 of the North Dakota Century Code and identified in Sections 69-06-08-01 of the North Dakota Administrative Code.

- (3) *A description of the efforts by the utility to coordinate the plan with other utilities so as to provide a coordinated regional plan for meeting the utility needs of the region.*

Throughout the development of the projects, Prosperity 1 and 2 have and will continue to engage and coordinate with the Midcontinent Independent Transmission System Operator (MISO), the local transmission owner, Xcel Energy, and the local electrical cooperatives regarding the Projects.

In August of 2017, Prosperity 1 moved its request to MISO for interconnection of a 200 MW wind farm at Xcel Energy's Bison Substation into the Definitive Planning Phase. In March of 2018, Prosperity 2 moved its request to MISO for interconnection of a 200 MW wind farm at Xcel Energy's Bison Substation into the Definitive Planning Phase. Prosperity 1's and Prosperity 2's Interconnection Applications were filed per the MISO Business Practice Manual 015 for Generator Interconnection. Prosperity 1's and Prosperity 2's Interconnection and MISO's administration of the applications are consistent with MISO's Open Access Transmission, Energy and Operating Reserves Market Tariff, and per the operating policies of the Midwest Reliability Organization designed to facilitate the administration of efficient energy markets.

- (4) *A description of the efforts to involve environmental protection and land-use planning agencies in the planning process, as well as other efforts to identify and minimize environmental problems at the earliest possible stage in the planning process.*

Prosperity 1 and 2 have utilized, and will continue to utilize, internal environmental personnel, as well as external environmental consultants, to conduct studies and analyses of the Prosperity 1 and 2 Wind Farms. The Prosperity 1 and 2 Wind Farms will comply with the siting criteria set forth in Chapter 49-22 of the North Dakota Century Code, as well as Section 69-06-08-01 of the North Dakota Administrative Code. Additionally, Prosperity 1 and 2 have consulted and will continue to consult with applicable state and federal agencies to further avoid, minimize, and/or mitigate any impacts to the environment from the construction and operation of the projects. Prosperity 1 and 2 have been and will continue to work with Cass County and the associated townships to ensure conformance with local land use regulations.

- (5) *A statement of the projected demand for the service rendered by the utility for the ensuing ten years and the underlying assumptions for the projection, with that information being as geographically specific as possible, and a description of the manner and extent to which the utility will meet the projected demands.*

Prosperity 1 and 2 are proposing to construct these facilities to sell energy, capacity and renewable energy credits ("RECs"), either bundled or unbundled, to one or more electric utilities and/or commercial customers. Prosperity 1 and 2 are

actively marketing the projects to a number of potential off-takers and may sell the power in the form of power purchase agreements (“PPAs”), or the projects could be owned directly by a utility.

As independent power producers, Prosperity 1 and 2 are not limited to the needs of one region and are able to bid into multiple wholesale markets across the region. For example, over the past year, Prosperity 1 and 2 were eligible to bid into 8 utility and 12 corporate/industrial power supply proposal requests in the region. Utilities and other customers seeking to diversify and build their energy generation portfolios are attracted to wind energy projects because of long-term, fixed, competitive pricing, environmental benefits and existing and potential renewable energy policies.

Renewable Energy Policies

In March 2007, North Dakota enacted legislation (H.B. 1506) establishing an *objective* that 10% of all retail electricity sold in the state be obtained from renewable energy and recycled energy by 2015. The objective must be measured by qualifying megawatt-hours (MWh) delivered at retail, or by credits purchased and retired to offset non-qualifying retail sales. This objective is voluntary; there is no penalty or sanction for a retail provider of electricity that fails to meet the objective. Municipal utilities and electric cooperatives that receive wholesale electricity through a municipal power agency or generation and transmission cooperative may aggregate their renewable and recycled energy objective resources to meet the objective.

As of reports filed with the Commission in 2017, all filing utilities indicated that they presently meet their 10% objective for renewables. However, North Dakota is proximate to other jurisdictions that also have renewable policies. Minnesota, in particular, has a standard that requires Xcel Energy to obtain 30% of its energy from renewables by 2020, and all other utilities to obtain 25% of their energy from renewables by 2025. North Dakota’s available land and high wind resource, along with newly constructed transmission lines, create an ideal environment for wind energy projects to meet Minnesota’s renewable standards.

Economic Energy and Capacity

With improving technology and falling costs, utilities are beginning to include solar projects in their resource plans as long-term economic energy and capacity resources. In North Dakota, excellent wind resources create high capacity factor generation, reducing the cost/MWh. Recent wind pricing has shown that wind generation produces the lowest cost energy among all electric generation resources and fuels (Lazard’s Levelized Cost of Energy Analysis 10.0, 2016).

For example, in its 2015 Resource Plan filing, the Commission approved Xcel Energy’s proposed purchase of up to 750 MW of win by 2020. Through the

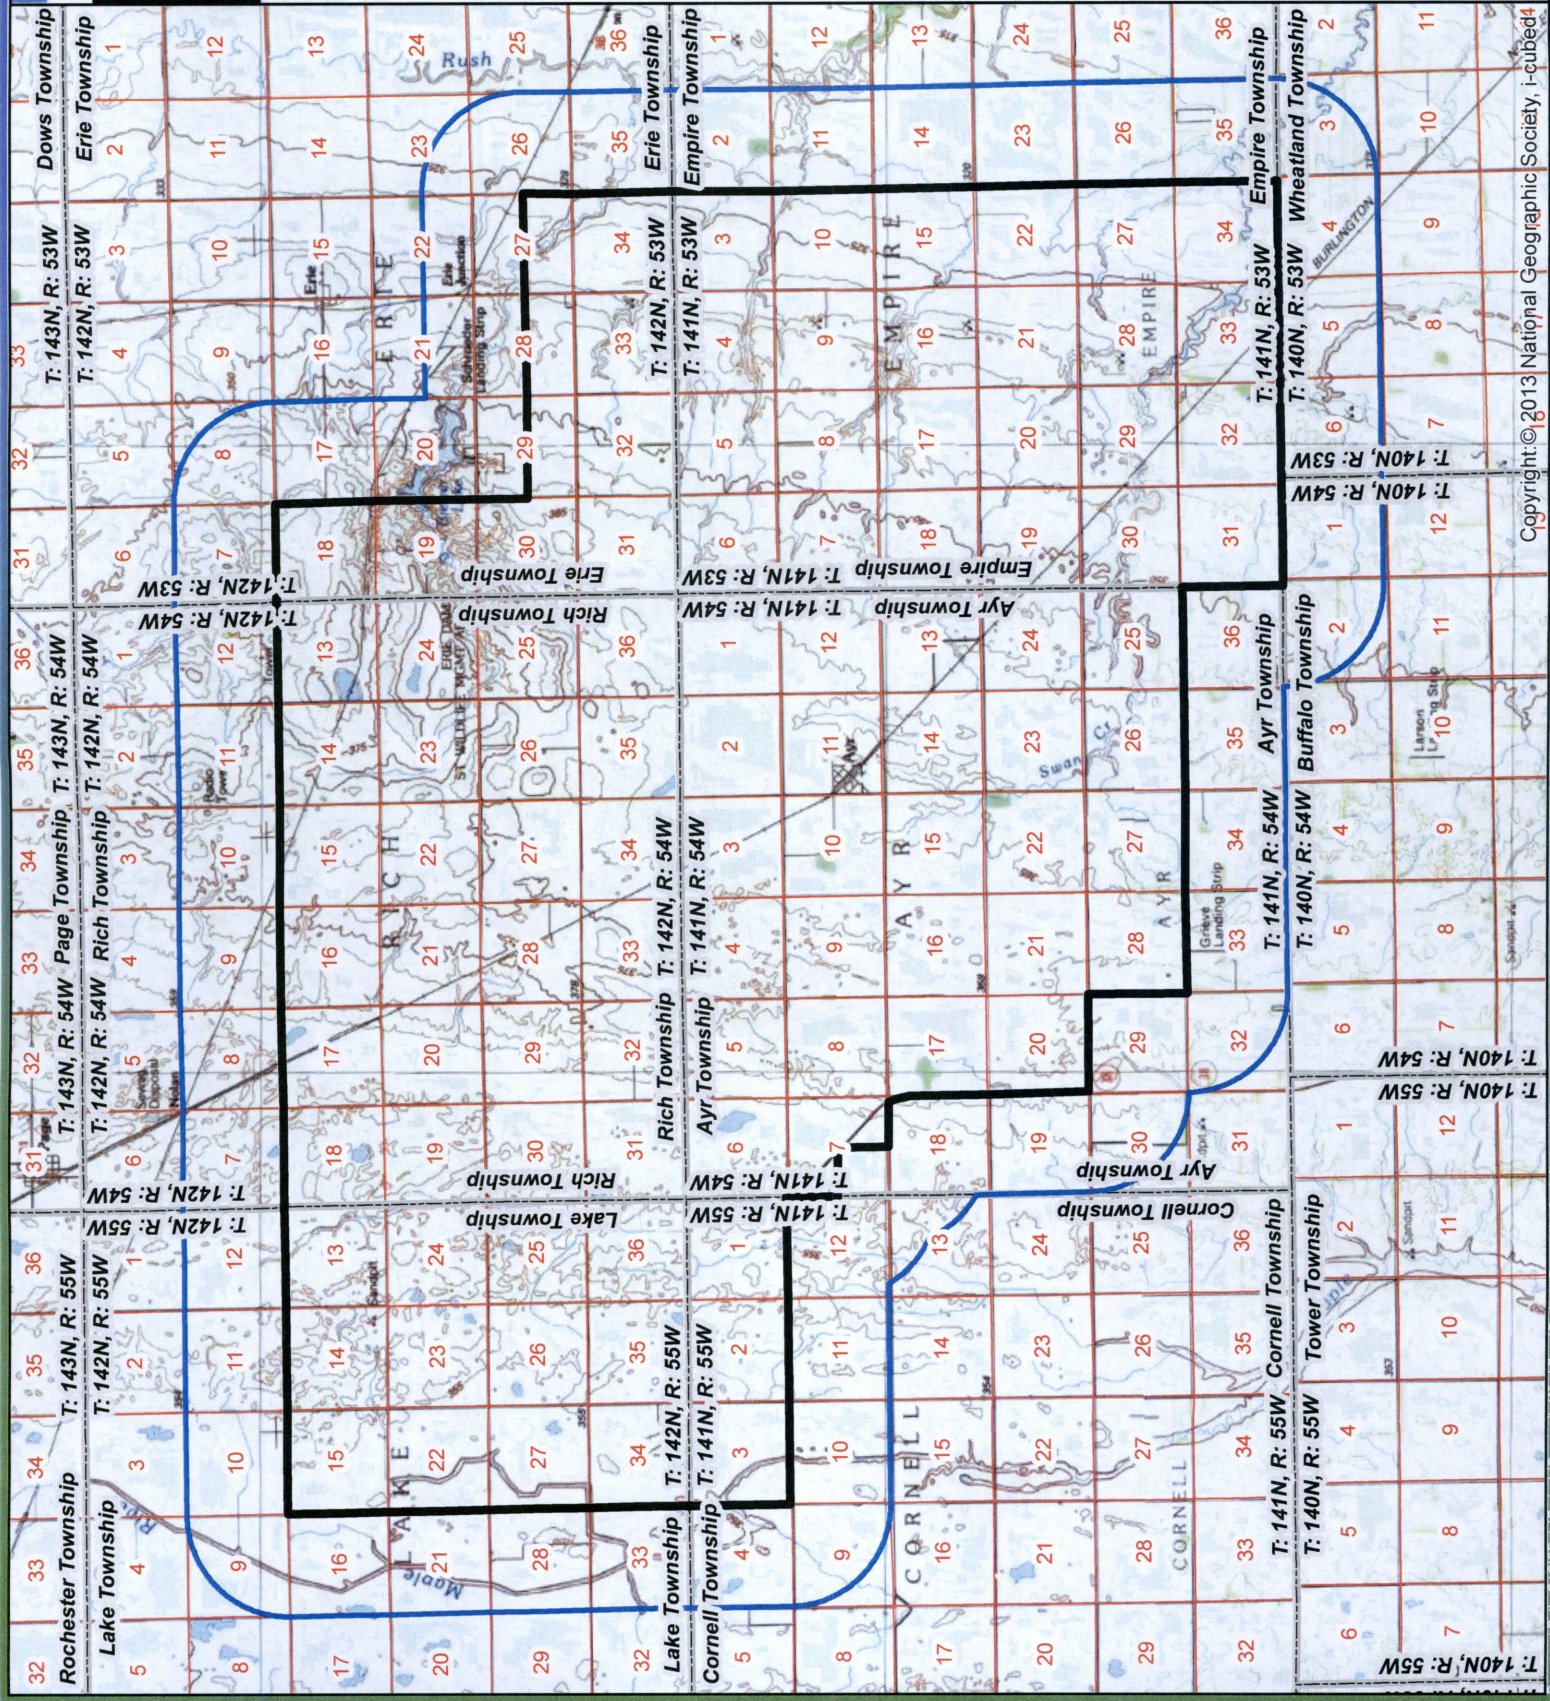

competitive bidding process, Xcel Energy found wind to be so cost effective that it more than doubled its purchase, contracting to own or purchase over 1550 MW of wind energy in that time frame.

Commercial and Industrial Demand

In addition to traditional utility demand for solar energy, a growing number of corporations are turning to renewable energy to save money on energy and meet sustainability goals. Corporate customers either purchase renewable energy directly or obtain renewable benefits and cost savings through financially settled contracts, sometimes called virtual PPAs. In addition, many utilities are creating “green tariffs,” which allow customers to purchase up to 100% renewable energy from the utility. Corporations such as Apple, Google and Facebook along with many others, have recently set goals to obtain 100% of their energy from renewables. In 2016, approximately 1600 MW of renewable energy was purchased by commercial and industrial customers, and the number of requests for proposal doubled in 2017 (Renewable Choice Energy, 2017). In a recent survey, 84% of corporations stated that they planned to purchase renewable energy in the next 2 years. (Apex Clean Energy, Green Biz, 2017).

PUBLIC SERVICE COMMISSION

Case No. PU-18-___

**IN THE MATTER OF THE FILING OF A
TEN YEAR PLAN BY PROSPERITY WIND
FARM, LLC AND PROSPERITY WIND
FARM 2, LLC**

CERTIFICATE OF SERVICE

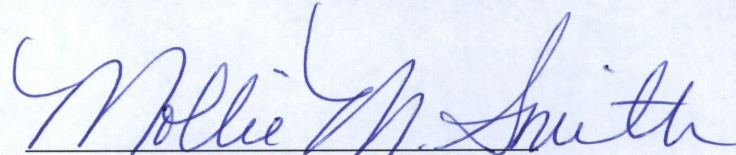

Mollie M. Smith, being first duly sworn, does depose and state that on June 29, 2018, she served the following document:

Ten Year Plan: 2018-2028

by placing a true and correct copy of said document in an envelope addressed as follows:

Mr. Michael Montplaisir
Cass County Auditor
P.O. Box 2806
Fargo, ND 58108-2806

and depositing the same, with postage prepaid, in the United States mail at Minneapolis, Minnesota.

Case No. PU-18-_____

IN THE MATTER OF THE FILING OF A TEN
YEAR PLAN BY PROSPERITY WIND FARM,
LLC AND PROSPERITY WIND FARM 2, LLC

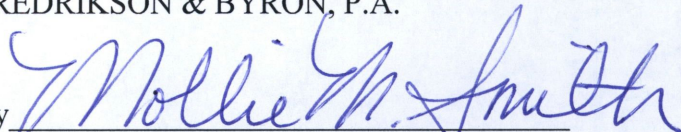

**NOTICE OF FILING TEN YEAR PLAN
2018-2028**

PLEASE TAKE NOTICE that Prosperity Wind Farm, LLC and Prosperity Wind Farm 2, LLC, in accordance with N.D.C.C. § 49-22-04 and N.D.A.C. Ch. 69-06-02, filed a Ten Year Plan for the years 2018 through 2028 with the North Dakota Public Service Commission on June 29, 2018, and the Cass County Auditor on June 29, 2018.

Dated this 29th day of June, 2018.

FREDRIKSON & BYRON, P.A.
