**In re: Emmons-Logan Wind, LLC  
Emmons-Logan Wind Energy Center  
Weekly Status Report on Aircraft Detection Lighting System  
Case No. PU-18-280  
Our File No. 035218-000046**

Dear Mr. Fahn:

Pursuant to your request dated December 6, 2019, below please find Emmons-Logan Wind, LLC's ("Emmons-Logan Wind") weekly status report regarding construction and installation of the Aircraft Detection Lighting System ("ADLS") at the Emmons-Logan Wind Energy Center ("Wind Energy Center").

Since the last status report provided on December 20, 2019, Emmons-Logan Wind has begun construction of the fencing around the radar control tower. Remaining construction items associated with the ADLS radar system include the delivery and installation of radar system components (*i.e.*, a 30-foot radar control tower and the radar control box). Emmons-Logan Wind is awaiting delivery of the tower and the radar system to the site. Based on its vendor's current estimate, Emmons-Logan Wind expects the remaining components to be shipped to the site and the ADLS to be installed in the first quarter of 2020.

As described in Emmons-Logan Wind's December 13 status report, the Wind Energy Center is equipped and will be operated with traditional obstruction lighting until ADLS construction activities and radar installation is completed, consistent with North Dakota Administrative Code § 69-06-11-02.

Please do not hesitate to contact me with any additional questions.

Sincerely,

**CROWLEY FLECK PLLP**

A handwritten signature in blue ink, appearing to read "Casey A. Furey". The signature is fluid and cursive, with a prominent initial "C" and a long horizontal stroke at the end.
