In re: Case No. PU-18-280
Emmons-Logan Wind, LLC
Emmons-Logan Wind Energy Center
Weekly Status Report on Aircraft Detection Lighting System
Our File No. 035218-000046

Dear Mr. Fahn:

Pursuant to your request dated December 6, 2019, below please find Emmons-Logan Wind, LLC's ("Emmons-Logan Wind") weekly status report regarding construction and installation of the Aircraft Detection Lighting System ("ADLS") at the Emmons-Logan Wind Energy Center ("Wind Energy Center").

Since the last status report provided on January 17, 2020, Emmons-Logan Wind has received delivery of and installed the ADLS server rack and panel. Emmons-Logan Wind's vendor has also notified it that the ADLS radar system has cleared U.S. Customs and has been received by the vendor. Remaining activities associated with the ADLS radar system include the delivery and installation of the radar control box and other system components, including the generator skid. Based on its vendor's current estimate, Emmons-Logan Wind expects the remaining components to be shipped to the site and the ADLS to be installed in the first quarter of 2020. Following delivery and installation of the remaining ADLS components, Emmons-Logan Wind and its ADLS vendor will undertake testing and commissioning of the system.

As described in Emmons-Logan Wind's December 13 status report, the Wind Energy Center is equipped and will be operated with traditional obstruction lighting until ADLS construction activities and radar installation is completed, consistent with N.D. Admin. Code § 69-06-11-02.

Please do not hesitate to contact me with any additional questions.

Sincerely,

CROWLEY FLECK PLLP

A handwritten signature in blue ink, appearing to read "Casey A. Furey", with a large flourish extending from the end.
