**In re: Case No. PU-18-280  
Emmons-Logan Wind, LLC  
Emmons-Logan Wind Energy Center  
Weekly Status Report on Aircraft Detection Lighting System  
Our File No. 035218-000046**

Dear Mr. Fahn:

Pursuant to your request dated December 6, 2019, below please find Emmons-Logan Wind, LLC's ("Emmons-Logan Wind") weekly status report regarding construction and installation of the Aircraft Detection Lighting System ("ADLS") at the Emmons-Logan Wind Energy Center ("Wind Energy Center").

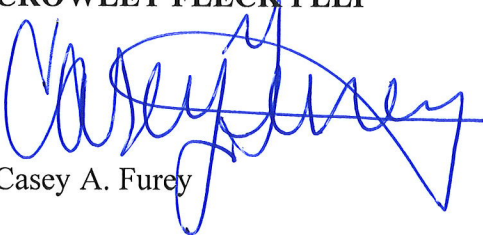

Since the last status report provided on January 31, 2020, Emmons-Logan Wind has activated the ADLS, hired local pilots to fly preliminary test flights, conducted software testing and fine-tuning, and has provided Notice to Airmen ("NOTAM") of the ADLS. Emmons-Logan Wind is continuing testing of the ADLS and plans to fly a second round of test flights the week of February 10, 2020, weather permitting. Following the successful completion of testing, Emmons-Logan Wind will work with its vendor to commission and activate the ADLS.

As described in Emmons-Logan Wind's December 13 status report, the Wind Energy Center is equipped and will be operated with traditional obstruction lighting until ADLS construction activities and radar installation is completed, consistent with N.D. Admin. Code § 69-06-11-02.

Emmons-Logan Wind will continue to provide status updates to the Commission as requested. Please do not hesitate to contact me with any additional questions.

Sincerely,

**CROWLEY FLECK PLLP**
