On August 9, 2018, in Case No. PU-18-302, Burke Wind, LLC filed combined applications for a corridor certificate and route permit to construct approximately 37 miles of 345 kV electric transmission line and associated facilities extending from the proposed Burke Wind Energy Center in Burke County to Basin Electric's Tande Substation in Mountrail County, North Dakota, as shown on the attached map.

On September 14, 2018, in Case No. PU-18-344, Burke Wind, LLC filed an application for a Certificate of Site Compatibility. On November 14, 2018, Burke Wind amended its application. Burke Wind proposes to construct an up-to 200 MW Burke County IND Energy Center of up to 76 wind turbine generators and associated facilities in Burke County North Dakota, as shown on the attached map.

Believing that there will be no prejudice to the rights of the parties or the public interest, and finding the cases involve similar questions of law and fact, the Commission is consolidating these cases for hearing under North Dakota Admin. Code section 69-02-04-04.

The issues to be considered are:

1. Will the location and operation of the proposed facilities produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?
2. Are the proposed facilities compatible with the environmental preservation and the efficient use of resources?
