

Public Service Commission of North Dakota

My husband, Rodney D. Olson, and myself, Donna B. Olson, are very much in favor of the Burke wind project.

We would be at the March 8 meeting if it were possible. However on that date we will be at the Mayo hospital in Rochester for pancreatic cancer surgery on Rodney.

We feel the benefits for Burke County and the state of North Dakota far outweigh any of the arguments against it. Wind energy is a clean air project. That alone makes it important to all. Electricity is one of the most important parts of energy and it needs to come from somewhere. North Dakota is perfect for it. We have wind and that is the cleanest way to provide future needs. We need that project here and now. Harnessing the wind was a great idea.

Sincerely

Rodney D Olson
Donna B. Olson
