Victor,

We were able to find an additional picture that shows excavating equipment at the location of the damage. However, the excavating company stated that they were hand digging and we have no further evidence or pictures to substantiate that. We agree that the case should be closed.

Sincerely,

Lisa Kallberg

Hi Lisa,

Please see attached response from Fox Underground regarding the complaint you submitted against them. They indicate the damage was due to hand excavation with a shovel rather than an excavator. If this is true it would still make them liable for the damage, however it would not be a law violation.

It is difficult to discern from the pictures exactly where the damage is. Do you have any additional pictures or information you want to share on this case?

Please respond by April 19th. If I do not hear from you by then I will recommend the commission close the case due to lack of evidence to prove a violation.

Thanks,

Victor Schock
