Re: Cost of Gas Adjustment (COG)
Rate 88 and Rate 99
Case No. PU-19-008

In accordance with North Dakota Century Code Section 49-05-05, Montana-Dakota Utilities Co. (Montana-Dakota) respectfully submits an original and two (2) copies of a Cost of Gas (COG) change pursuant to the terms of Rates 88 and 99.

The Rate Summary Sheet (178th Revised Sheet No. 3) showing the proposed natural gas rates reflecting the COG effective October 1, 2019 along with currently effective distribution rates is provided in Exhibit 1. The net effect of this filing, calculated pursuant to the terms of Rate 88, is a decrease of \$0.110 per dk for residential customers and firm general customers, an increase of \$0.145 per dk for small and large interruptible customers, and a decrease of \$0.030 per dk for Air Force interruptible customers.

Montana-Dakota purchases gas supplies under a number of contracts and secures transportation service over a number of pipelines for delivery of the natural gas purchased to Montana-Dakota's distribution system to meet the demands of its customers. The commodity cost of natural gas has decreased \$0.162 per dk since the cost established in the July 2019 PGA filing due to a decrease in the overall commodity price of gas. Changes in pipeline rates increased the cost of gas by \$0.001 per dk. In addition, this filing reflects the annual change in the surcharge adjustment, shown in Exhibit 6, and the grain drying margin credit, shown in Exhibit 8.

Montana-Dakota purchases propane supplies from various wholesale suppliers. The market price of propane has not changed since a change July 1, 2019. However, the net cost of propane has decreased since the last filing due to the grain drying margin sharing credit of \$0.016 applied to propane customers to be effective October 1, 2019.

The following Exhibits are provided in support of the COG rates to be effective October 1, 2019:

- Exhibit 2 summarizes the cost of gas adjustment, the surcharge adjustment, and the grain drying margin sharing adjustment calculated pursuant to the terms of Rate 88 that will apply during the month of October 2019.

ORIGINAL

- Exhibit 3, shows the calculation of the current gas cost adjustment that will be applicable to Montana-Dakota's customers for the month of October 2019 along with an explanation of the reasons for the decrease in the market price of gas. The average cost of gas for firm customers, adjusted for losses, is \$3.747 per dk.
- Exhibit 3a is marked as "Confidential" and contains confidential information regarding gas commodity pricing and is designated as Trade Secret in accordance with the Commission's May 1, 2019, Order in Case No. PU-18-008. Exhibit 3a – Public Copy, is also enclosed. Montana-Dakota has submitted a renewal of the Application for Trade Secret Protection to the Commission in Case No. PU-19-008 to renew the request of confidential treatment of portion of the cost of gas calculation for 2019.
- Exhibit 4 includes a list of FERC proceedings since the October 1, 2018 filing with a brief description of each filing and a summary of the change in pipeline rates occurring since the last COG filing and a copy of applicable effective pipeline rates along with supporting workpapers is also included.
- Exhibit 5 shows the calculation of the return on storage inventory balances and prepaid demand and commodity balances using the calculation procedure set forth in Rate 88. The overall rate of return of 7.236% applied to the balances was authorized by the Commission in Case No. PU-17-295.
- Exhibit 6 shows the calculation of the surcharge adjustment that will apply during the period October 1, 2019 through September 30, 2020. The total surcharge is (\$0.160) per dk residential and general service customers, \$0.285 per dk for small and large interruptible customers and \$0.098 per dk for the Air Force, or an increase of \$0.054 per dk for residential and general service customers, an increase of \$0.306 per dk for small and large interruptible customers and an increase of \$0.130 per dk for the Air Force from the adjustment effective October 1, 2018.
- Exhibit 7 summarizes the cost of gas – propane calculated pursuant to the terms of Rate 99, which apply during the month of October 2019. The average cost of propane for all customers, adjusted for losses, is \$4.940 per dk, no change from the charge effective July 1, 2019.
- Exhibit 8 shows the grain drying margin sharing provision pursuant to the terms of Rate 88. Ninety percent of the margin revenues collected from grain drying customers served under interruptible service rates will be credited to residential and firm general service customers through the COG. A credit of \$0.016 per dk will be applicable to all residential and general service customers due to the grain drying margin sharing provision for the period October 1, 2019 through September 30,

2020. The final interim revenue collected in Case No. PU-17-295 has been applied to the margin sharing provision.

The COG changes, calculated in accordance with Rate 88 and Rate 99, will amount to a decrease of approximately \$118,700 for natural gas customers during the month of October 2019. All Montana-Dakota's retail gas customers in North Dakota may be affected by this proposal. There were 109,233 natural gas customers and 337 propane customers in North Dakota as of July 31, 2019.

Market Conditions for Regional Natural Gas
October 2019**

The established monthly price for the October 2019 Rocky Mountain CIG Index is expected to increase by \$0.01/MMBTU to \$1.72/MMBTU from an expected \$1.71/MMBTU in September 2019. The CIG Rocky Mountain Index is based on a price discovery survey by several natural gas periodicals, including "Inside FERC Gas Market" report and "Gas Daily" by McGraw-Hill Companies, of prices paid by willing sellers and buyers of quantities of gas in that region. That price is reflective of natural gas prices in the Rocky Mountain region and indicative of the supplies Montana-Dakota purchases for its requirements.

The EIA reported nationwide storage levels as of August, 2019 at 3.6 percent below the five-year average and 15.2 percent above last year's balance.

The Department of Energy's (DOE) Energy Information Administration (EIA) provides various publications on energy issues. The information is available on the DOE website: <http://www.eia.doe.gov>.
