Dear State and Local Entities,

We are writing to express the Greely Township Supervisor's strong support for the proposed Ruso Wind Partners, LLC Project to be located in our Township. In addition to producing revenue for the State of North Dakota, we believe that the project will be a tremendous benefit for Ward County and McHenry County by creating quality, high-paying jobs and additional revenue for our local and state government and local school system. Furthermore, the project will benefit local landowners participating in the project by providing a steady source of lease revenue throughout the lifetime of the project.

We are excited about the potential wind farm as it will be a major economic development project for our rural community that could spur additional renewable energy investments in our area. We understand that Ruso Wind Partners, LLC is applying for state and local permits and we are hopeful that the permits will be granted as they would significantly improve the chances of the Ruso Wind Project being built.

Thank you for the opportunity to convey our enthusiastic support for this important project for Ward County and McHenry County. We sincerely appreciate all that do for our state and community.

Best Regards,

Greely Township Supervisors
