

Ruso Wind Partners, LLC  
Ruso Wind Project  
Docket No. PU-19-28

**Supplement to Late-Filed Exhibit No. 51 – Update on Resolution of Potential Concerns**  
**Raised by Department of Defense/Minot Air Force Base**

At the North Dakota Public Service Commission’s (“Commission”) working session on August 28, 2019, the Commission requested that Ruso Wind Partners, LLC (“Ruso Wind”) confer with the Minot Air Force Base (“MAFB”) regarding the potential for partial implementation of an Aviation Detection Lighting System (“ADLS”) and request additional information regarding the MAFB’s concerns with use of ADLS on the Ruso Wind Project (“Project”). In an e-mail from the MAFB dated October 3, 2019, the MAFB confirmed that they oppose implementation of ADLS, including partial implementation of ADLS, and provided additional information regarding their concerns. A copy of the MAFB e-mail is attached as **Late-Filed Exhibit No. 51(c)**.

At the working session, the Commission also asked if light dimming technology might be an option for the Project. As explained in the attached memorandum prepared by Capitol Airspace Group, light dimming technology has not been approved by the Federal Aviation Administration for use in the United States. The Capitol Airspace Group memorandum is attached as **Late-Filed Exhibit No. 51(d)**.
