

Ruso Wind Partners, LLC
Ruso Wind Project and Gen-Tie Line Project
Docket Nos. PU-19-28/PU-19-29

Late-Filed Exhibit No. 52 – Storage Locations of Safe Harbor Turbines

At the public hearing, the Commission requested information regarding the storage locations of the safe harbor turbines that will be used for the Ruso Wind Project. The components for Siemens Gamesa safe harbor turbines allocated to Southern Power are in storage at the locations specified below. Accordingly, Ruso Wind Partners, LLC (“Ruso Wind”) could obtain Siemens Gamesa safe harbor turbine components from these locations:

- The SWT-2.415-108 towers are currently in storage in Abilene, Texas; Tulsa, Oklahoma; and Manitowoc, Wisconsin. Ruso Wind could obtain towers from one or more of these locations.
- Nacelles and hubs are currently in storage in Hutchinson, Kansas.
- Power units are currently in storage in Wichita, Kansas.
- Blade sets are currently in storage in Montrose, Iowa.

The General Electric safe harbor turbines are in storage in Garden City, Kansas.
