

Ruso Wind Partners, LLC
Ruso Wind Project and Gen-Tie Line Project
Docket Nos. PU-19-28/PU-19-29

Late-Filed Exhibit No. 57 - Country of Origin for Turbine Components/Parts

At the public hearing, a request was made for information regarding the country/countries of origin of turbine components and parts that will be used for the Project. The country/countries of origin of components/parts of the Siemens Gamesa turbines are anticipated to be as follows:

- Nacelles/Hubs – United States and/or Spain
- Blades – United States, Mexico, China, India, and/or Brazil
- Towers – United States and/or Indonesia

The country/countries of origin of components/parts of the General Electric turbines are anticipated to be as follows:

- Blades – Mexico and/or United States (South Dakota and/or North Dakota)
- Towers – United States (South Dakota and/or Massachusetts)
- Machine Heads & Hubs – United States (Florida)

Ruso Wind Partners, LLC does not have specific information regarding the percentages of components that will originate from each country, as that data will depend on component availability, pricing, and other factors.
