Minneapolis, Minnesota 55401

Dear Ms. Sampson:

The U.S. Fish and Wildlife Service (Service) has reviewed the description for the proposed ONEOK Little Missouri Lateral pipeline project received on February 22, 2019. The proposed 10.8 mile, 12-inch diameter steel pipeline would transport natural gas liquids and be located in McKenzie County, ND. We appreciate the write-up and the desire to cooperate. We have reviewed the project and based on the commitment to the project-based conservation measures and avoidance of suitable Dakota Skipper habitat, we have no objections to the project.

Thank you for the opportunity to comment on this project. If you require further information, please have your staff contact Jessica Johnson of my staff at (701) 355-8507 or you can contact me at (605) 224-8693 extension 224.

Sincerely,

Scott V. Larson
Field Supervisor
