**Re: Case Nos.: PU-08-932 and PU-19-144
Merricourt Wind Energy Conversion Facility**

Dear Mr. Kahl:

On November 30, 2021, our company had provided a response (docketed as #283 in PU-08-932 and as #96 in PU-19-144) to the November 16, 2021, Request for Information from Patrick Fahn, then-Director of the Public Utilities Division. The November 30, 2021, response addressed Mr. Fahn's requests for the status of several items identified by Stantec, the Commission's third-party inspector, in its As-Built Inspection Report.

The response also detailed our company's intended remediation of the issues. The intended remediation involved bringing Wanzek Construction, the balance of plant contractor, back to the site to address areas in need of reclamation, regrading, and reseeding.

Wanzek was on-site beginning the week of July 11, 2022, and completed all civil work by Friday, July 22, 2022. While there was subsequently a heavy rainfall event, we believe the issues have been remediated save only for the potential need to do some hydroseeding on hillsides where revegetation is slower due to the terrain. Further time is necessary to evaluate whether this hydroseeding will be necessary.
