

# Memorandum

To: Commissioners Brian Kroshus, Julie Fedorchak, and Randy Christmann  
From: Adam Renfandt  
Date: November 25, 2019  
Subject: Emmons-Logan Wind Energy Center - Emmons & Logan,  
Decommissioning Plan, Cost, and Financial Assurance

Case No. PU-19-179

On October 31, 2019, Emmons-Logan Wind, LLC (Emmons-Logan) filed a decommissioning plan and cost estimate with the Commission for its Emmons-Logan wind facility.

The Emmons-Logan facility has a nameplate capacity of approximately 216 MWs and consists of 102 turbines. The total dollar amount for decommissioning the facility, excluding salvage, is \$13,891,000, or \$136,180 per turbine.

On November 11, 2019, Emmons-Logan also filed a parent guarantee for the same amount. The guarantor, NextEra Energy Capital Holdings, Inc., has an A- credit rating from Fitch Ratings, thereby meeting the Commission's guidelines for proposing a decommissioning parent guarantee.

Staff has reviewed Emmons-Logan's decommissioning plan, cost estimate, and parent guarantee, and find them to be reasonable and consistent with the Commission's rules. Therefore, Staff recommends that the Commission approve the decommissioning plan, cost estimate, and parent guarantee.
