Good afternoon Victor,

With the June 27th case number PU-19-210 we have been working with the engineering firm on this project to gather the additional locate tickets and pictures that are now being added to our case and it has taken a bit more time to collect the extra data and compare that to the maps and specs on the project. With that, we will have additional locate tickets that were not in the initial claim that will need to be added. Along with that we have corresponding photos.

We wanted to reach out to you and let you know that we are working diligently on this and we needed the extra time to line up all the corresponding documentation with it.

Thank you,
Gina Gilbert
