**CERTIFICATION RELATING TO N.D.C.C. § 49-22.1-01(3)(a)**

STATE OF OKLAHOMA    )  
  ) ss.  
COUNTY OF TULSA     )

Pursuant to N.D.C.C. § 49-22.1-01(3), the undersigned, David Roensch, Vice-President – Natural Gas Gathering and Processing Operations, a representative of ONEOK Rockies Midstream, L.L.C. (“ONEOK”), with authority to bind ONEOK to the following, hereby certifies as follows:

1. In an order dated April 11, 2018, in Case No. PU-18-21 (“Order”), the North Dakota Public Service Commission (“Commission”) approved Certificate of Site Compatibility No. 55 (the “Certificate”) for the expansion of the then-existing Bear Creek Gas Plant (the “Plant”) to a capacity of 175 million cubic feet per day. The Plant processes associated natural gas from oil production wells connected to ONEOK’s gathering system.
2. ONEOK hereby provides the Commission with written notice of its intent to undertake the Bear Creek II Project, which will increase the Plant’s capacity by 200 million cubic feet per day to a total capacity of up to 375 million cubic feet per day by installing an additional processing train to be located directly south of the existing processing train (the “Project”). The Project will be constructed within the 76-acre site (the “Site”) approved by the Order and certificated by the Certificate. As part of the Project, ONEOK further intends to modify the existing facilities by reconfiguring an existing stormwater retention pond and adding two new stormwater retention ponds. Attached hereto as Exhibit A, are drawings depicting the location of the Project within the Site.
3. Activities for construction of the Project will occur wholly within the Site, which is the geographic location for which ONEOK previously obtained a site certificate. *See* N.D.C.C. § 49-22.1-01(3)(a).
4. Construction of the Project is for the same type of facility as approved by the Order. *See* N.D.C.C. § 49-22.1-01(3)(a)(1).
