RE: Case Number PU-19-295

Dear Public Service Commission:

Midstate Telephone marked the ND one call ticket # 19098809 as clear because we believed that the work area was not near our underground facility. The location of the work was described as "Iverson 11-14H mark everything 25 feet outside of new pad corner stakes and hole location".

Midstate has facility entering the NE corner of the Iverson 11-14H. The new pad is located to the west of current pad. (300 ft to the west)

Midstate has been in contact with Scott Derosso at Whiting Oil Company and will work to prevent any future such events.

In response to the other three times Whiting claims that Midstate has not marked our facility. I do not have the ticket numbers for these events. I will discuss this further with Mr. Derosso.

Thank you,

A handwritten signature in black ink, appearing to read "Ryan Wilhelmi".
