

9-4-2019

TO. Executive Secretary, ND Public Service

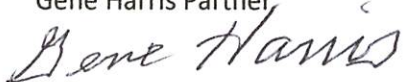

In response to a case No. PU-19-300 and One- call ticket No. 19095969

Crosby Creek was blading a access road and preparing to replace 5 culverts on the road. One culvert was exposed thru the surface of the road bed which is present in the first picture. Making it unsafe for vehicles to pass over it. We hand dug and probed the area and then peeled the old culvert out and replaced it with a new one while not exposing any additional soil. Safety precautions were used to not dig deeper than the culvert that was exposed.

Respectfully,

Crosby Creek Consulting LLP

Gene Harris Partner

A handwritten signature in cursive script that reads "Gene Harris".
