

Regarding the Complaint

I Darryl Duchsherer bought 2 quarters of land. I decided I wanted to spot check to see if there was any gravel on this land which requires digging. So I made the one call answered all questions and we were all good and I gave them my phone number for any questions. Two days later I got calls from two different utilities and we talked about what I wanted and they marked these stuff no problems at all. The next day I got a call from North Prairie water. First question out of his mouth was where is your white lines. I told him I don't know what you are talking about. He then said you are required by law to have white lines. I again said I don't know what a white line is. He then said he doesn't have to mark these lines because there is no white lines. I then told him I don't care what he does and I hung up on him. He was rude and being a jack ass. All he would have had to do is explain to me what a white line is or I would have met him at the property and I could have showed him what I was doing. When I made the one call no one said a thing about a white line. So I am not sure what is happening because all the other utilities are marked and not NPAW. So NPAW went out and marked section

11 and 12 and F requested 13 and 14.
So F don't know if they marked wrong
sections or what is going on.
