In re: ONEOK Bakken Pipeline, L.L.C.  
Tioga Lateral Pipeline Project  
Case No. PU-19-368  
Our File No. 072591-000009

Dear Mr. Kahl:

Per the Tree and Shrub Specifications in the above-referenced case number, the maximum width of tree and shrub removal is 50 feet unless otherwise approved by the Commission. ONEOK Bakken Pipeline, L.L.C. ("ONEOK") has identified two locations along the Tioga Lateral Project route where it is not able to narrow its workspace to 50 feet within tree rows.

Both tree rows are close to 90-degree points of inflection in the pipeline route where the full 75 feet of workspace width is needed due to safety and constructability reasons. These tree rows are located near mileposts 7.7 and 53.8 and are displayed on the enclosed maps.

With this submittal, ONEOK is hereby requesting approval to clear trees and shrubs wider than 50 feet in these two areas. If you need any additional information to support this request, please feel free to contact me.

Sincerely,

Casey A. Furey  
enc.
