Melinda,

Looks like I won't get an answer to my Archives request in the near future. The scope of work below looks good and you can move forward.

CAUTION: This email originated from an outside source. Do not click links or open attachments unless you know they are safe.

Lorna,

Have you had a chance to look over the Scope of Work for the 14-sided barn, below? I know things have been pretty chaotic while we all shifted to working from home and I wanted to make sure it doesn't get lost in the shuffle.

Best,

Melinda

Subject: ND - Architectural Sites Information

Lorna,

Please see below for the information you requested at our Feb. 27, 2019 meeting concerning the mitigation plans for the Nielson 14-sided barn and South St Olafs Church in the Northern Divide Wind Energy Center architectural inventory.

14-Sided Barn

50 PU-19-376 Filed 04/15/2020 Pages: 2
Proposed Exhibit 21 - SHPO Architectural Correspondence
Northern Divide Wind, LLC
Casey Furey, Crowley Fleck, PLLP

Scope of Work:

Field Work

- Brief Sketch of Barn Proportions (Total width; Dimensions of one wall section, door, and stall; Dimensions one window/window opening; etc.)
- Photographs
 - Detailed Digital Photographs of Interior and Exterior (Focus on remaining original features)
 - Digital Overview Photographs of Site Area
- Short Interview with Property Owner

Post-Field Work

- Update Site Form (include line drawings based on sketches taken in the field, photographs, background research results).
- Write Short Article for Preservation North Dakota (PND) Newsletter
- Coordinate with PND and NDSHPO to Publish Article Where Requested

Next Steps:

- 1) If you approve the Scope of Work, a member of PND will request access to the site.
- 2) If permission is granted to access the property, two members of PND will complete the Scope of Work.
- 3) If permission is not granted, we will work with you to further define and complete Option 2 – An Update of MPDF Round Barn Context.

St Olafs Church

Per agreements with the two landowners, \$22,500/year will go to the South St Olafs Church. That's \$675,000 over the 30-year Power Purchase Agreement term.

Next Steps:

- 1) Put together a Technical Action Plan to distribute to the two landowners concerning recommended church repairs and maintenance needs in order (Immediate to Less) with a recommended timeline and some guidelines to help direct the use of historically appropriate materials.
- 2) Submit Technical Action Plan to you for review prior to sending to the landowners.

Once we have your comments, edits, or approval for the Scope of Work on the barn, I will reach out to the PND board and work on requesting access to the property.

Best,

Melinda
