Re: The complaints of case # PU-19-383

Victor Schock,

All of the One Call requests/tickets that involved River Rain were attended to and completed in a timely manner. River Rain has located their lines to the best of their ability since the 1980's. We have had many utility and service lines from various companies cross and parallel our lines since then. It has been on very rare occasions that we have ever been hit. This was not the case on May through August 2019.

After having our lines damaged on May 10th, 13th, and 15th we became concerned of these uncharacteristic events. A call of concern was placed with North Dakota One Call. They assured us that we were locating and flagging our lines in a manner that was compliant.

Phone calls were also made to Nemont. Nemont was the company that SRD was performing the excavations for. We expressed our concerns about the frequency of the damages that were occurring from the contractor that they had hired (SRD).

That is when SRD proposed radio detection at the expense of River Rain. River Rain declined this for several reasons. One, we have been locating our lines for 3 decades and never had any issue or problems with it. Two, the expense was too much for a small business to incur.

The second incident occurred on May 13th. SRD excavated and repaired the damaged pipeline with River Rain supplying the parts and materials. It took several trips for us to get the correct parts, however River Rain was able to amicably work with SRD to get the repairs done. This was the one and only time that SRD made any repairs to River Rain's pipeline.

After the May 13th incident River Rain was informed by SRD employees that they had been warned by their superiors not to aid River Rain in any way for any further damages.

On June 7th our pipeline was damaged again. At this time, we could not get an excavator for the repairs. The SRD crew was afraid to assist us with the machine they had available. As a testament to the goodwill and friendly relationship that we had with the SRD employees, one of their employees helped hand dig the damaged line so that we could repair it. We expressed our gratitude to him and SRD was not charged for an excavator on this date. I can assure you that our relationship with SRD employees was professional and friendly, as it was a simple understanding that they had a job to install services and us to repair the damages done to River Rain's pipeline, however it may have happened.

SRD was billed fairly and appropriately for the parts, labor and equipment that was used to repair the damages that were incurred on these dates.

SRD refused to pay these bills. SRD was legally served on November 22nd, 2019. They had 21 days to respond, they failed to respond and did not dispute the claim. The judgement was granted in favor of River Rain on December 11th, 2019 by North Dakota Civil Courts.

See attached for ticket numbers and incident descriptions.

Thank you,

Kyle Ames
