Re: Cost of Gas Adjustment (COG)
Rate 88 and Rate 99
Case No. PU-20-008

In accordance with North Dakota Century Code Section 49-05-05, Montana-Dakota Utilities Co. (Montana-Dakota), respectfully submits an original and two (2) copies of a Cost of Gas (COG) change pursuant to the terms of Rates 88 and 99.

The Rate Summary Sheet (181st Revised Sheet No. 3) showing the proposed natural gas rates reflecting the COG effective February 1, 2020 along with currently effective distribution rates is provided in Exhibit 1. The net effect of this filing, calculated pursuant to the terms of Rate 88, is a decrease of \$0.287 per dk for residential customers and firm general customers, a decrease of \$0.282 per dk for small and large interruptible customers, a decrease of \$0.280 per dk for Air Force interruptible customers, and a decrease of \$1.097 per dk for propane customers from the currently effective rates.

Montana-Dakota purchases gas supplies under a number of contracts and secures transportation service over a number of pipelines for delivery of the natural gas purchased to Montana-Dakota's distribution system to meet the demands of its customers. The commodity cost of natural gas has decreased \$0.279 per dk since the cost established in the January 2020 PGA filing due to a decrease in the overall commodity price of gas. Changes in pipeline rates decreased the cost of gas by \$0.003 per dk. In addition, a system wide change in contracted capacity, coupled with the quarterly update of WBI capacity release, has changed the total demand charges allocated to North Dakota in the amount of (\$0.005) per dk.

Montana-Dakota also purchases propane supplies from various wholesale suppliers for the propane service provided in Hettinger, North Dakota. The cost of propane has decreased since the cost established in the January 2020 PGA filing.

The following Exhibits are provided in support of the COG rates to be effective February 1, 2020:

- Exhibit 2 summarizes the cost of gas adjustment, the surcharge adjustment, and the grain drying margin sharing adjustment calculated pursuant to the terms of Rate 88

that will apply during the month of February 2020.

- Exhibit 3, shows the calculation of the current gas cost adjustment that will be applicable to Montana-Dakota's customers for the month of February 2020 along with an explanation of the reasons for the decrease in the market price of gas. The average cost of gas for firm customers, adjusted for losses, is \$3.722 per dk.
- Exhibit 3a is marked as "Confidential" and contains confidential information regarding gas commodity pricing and is designated as Trade Secret in accordance with the Commission's October 2, 2019, Order in Case No. PU-19-008. Exhibit 3a – Public Copy is also enclosed. Montana-Dakota has submitted a renewal of the Application for Trade Secret Protection to renew the request of confidential treatment of portions of the cost of gas calculation for 2020.
- Exhibit 4 provides a summary of the change in pipeline rates occurring since the last COG filing and a copy of applicable effective pipeline rates along with supporting workpapers.
- Exhibit 5 shows the calculation of the return on storage inventory balances and prepaid demand and commodity balances using the calculation procedure set forth in Rate 88. The overall rate of return of 7.236% applied to the balances was authorized by the Commission in Case No. PU-17-295.
- Exhibit 6 shows the computation of the (over)/under recovered gas cost account balances.
- Exhibit 7 summarizes the cost of gas – propane calculated pursuant to the terms of Rate 99, which apply during the month of February 2020. The average cost of propane for all customers, adjusted for losses, is \$8.783 per dk.

The COG changes, calculated in accordance with Rate 88 and Rate 99, will amount to a decrease of approximately \$759,000 for natural gas customers and a decrease of approximately \$8,000 for propane customers during the month of February 2020. All Montana-Dakota's retail gas customers in North Dakota may be affected by this proposal. There were 110,532 natural gas customers and 337 propane customers in North Dakota as of December 31, 2019.

Please refer all inquiries regarding this filing to:

Ms. Tamie A. Aberle
Director of Regulatory Affairs
Montana-Dakota Utilities Co.

Market Conditions for Regional Natural Gas
February 2020**

The established monthly price for February 2020 Rocky Mountain CIG Index is expected to increase by \$0.17/MMBTU to \$2.03/MMBTU from \$1.86/MMBTU in January 2020. The CIG Rocky Mountain Index is based on a price discovery survey by several natural gas periodicals, including “Inside FERC Gas Market” report and “Gas Daily” by McGraw-Hill Companies, of prices paid by willing sellers and buyers of quantities of gas in that region. That price is reflective of natural gas prices in the Rocky Mountain region and indicative of the supplies Montana-Dakota purchases for its requirements.

The EIA reported nationwide storage levels as of December 13, 2019 at 0.3 percent below the five-year average and 22.1 percent above last year’s balance.

The Department of Energy’s (DOE) Energy Information Administration (EIA) provides various publications on energy issues. The information is available on the DOE website: <http://www.eia.doe.gov>.

- 3/ For fuel, lost and unaccounted for gas, the Company shall be entitled to retain the stated percentage of all therms received for transportation, unless otherwise agreed in writing. Further details are given on Sheet No. 56 section 14A.
- 4/ Interruptible Transportation Service is not available to Distribution System End-user Customers. The Customer Charge will be charged only for those months gas actually flows.
- 5/ In addition to the transportation charges stated above, Shippers are responsible for the monthly administrative fee as stated, applicable to each meter located at the Customer location. For Interruptible Transportation Shippers, the Administrative Fee will be charged only for those months gas actually flows. Firm Transportation Shippers will be charged each month, regardless of gas flow.
- 6/ Per Dth of MDTQ per month.

Abbreviations (as defined in the General Terms and Conditions of this Tariff):

- MLI Mainline System Interconnect
- MLE Mainline System End-user
- DSE Distribution System End-user
- MDTQ Maximum Daily Transportation Quantity
