Re: ND One Call Excavation Notice Case PU-20-098

Please see the attached documents and detailed information listed below.

- The owner AE2S's one call ticket to have their subcontractor install an innerduct for McKenzie County Electric dated 1/14/2020. They installed the innerduct to the concrete vault location and backfilled the area in red on the picture.
- Sun Electric arrived on site to install the disconnect and service entrance stand. We needed to core drill through the concrete shown on the picture about 3' below elevation to set the core drill up. We excavated the soil that was backfilled from the previous contractor to do this. We would not have excavated in any other virgin soil. We work with pipeline company's and the State of ND and know the standards and expectations to meet the safety standards.
- Third document dated 2/26/20 is our one call that was placed. We waited for this to clear to perform our remaining scope.

Sorry for any inconvenience this may have caused. Safety is our #1 goal and we do not take short cuts to get our work done.

Please call or email to discuss if needed.

Sincerely,

Steve Dosch

Area noted below in Red 15 where we moved the backfill before our one call ticket cleared. we removed a couple feet of backfill to get a core drill machine set up. this was backfilled soil from a previous contractor who had a one call on site
