

**PUBLIC SERVICE COMMISSION**  
**Reclamation Division**  
\*\*\*\*\*

**Memorandum**

**TO:** Commissioners Fedorchak, Christmann, and Kroshus

**FROM:** Dean Moos and Zanna Brinkman

**DATE:** July 29, 2021

**SUBJECT:** Transfer of Permit KRSB-8603 for the Beulah Mine from Dakota Westmoreland Corporation to Westmoreland Beulah Mining LLC, Case No. RC-20-154

On March 23, 2020, Westmoreland Beulah Mining LLC submitted an application for the transfer, sale, and assignment of rights under Permit KRSB-8603 for the Beulah Mine. The application proposes to transfer the existing permit from the current permittee, Dakota Westmoreland Corporation (DWC), to Westmoreland Beulah Mining LLC (Westmoreland Beulah Mining). Westmoreland Beulah Mining will be both the permittee and operator for the Beulah Mine and will assume all the regulatory obligations previously held by DWC. Westmoreland Beulah Mining has now filed all of the required documents for the permit transfer and we respectfully recommend that it be conditionally approved.

Westmoreland Coal Company and the subsidiaries of Westmoreland Coal Company, including Dakota Westmoreland Company that operated the Beulah Mine, filed for Chapter 11 bankruptcy on October 19, 2018. The Purchase and Sale Agreement between Westmoreland Coal Company and Westmoreland Mining LLC was effective March 15, 2019. Westmoreland Beulah Mining LLC is the subsidiary of Westmoreland Mining LLC that was formed to own and operate the Beulah Mine.

Permit KRSB-8603 contains 3,871.7 acres located in Sections 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, and 29, T143N, R88W, Mercer County. The current permit term expires August 7, 2026. The Beulah Mine has produced less than 500,000 tons of lignite per year since 2017, primarily for the Heskett Power Station. The coal contract between the Heskett Station and the Beulah Mine ends in May 2022 and mining in this permit area will cease.

As part of the permit transfer application, Dakota Westmoreland was required to submit business entity and violation information and replacement bond and liability insurance documents. Records currently in the Office of Surface Mining's Applicant Violator System (AVS) do not indicate that the applicant, nor any affiliated companies, have any unpaid civil penalties, violations that have not been abated within the required time period, or a pattern of willful violations.

Westmoreland Beulah Mining submitted a surety bond in the amount of \$14,516,993.00 for this permit area. This amount is sufficient to cover the worst-case reclamation condition in this permit area. Westmoreland Beulah Mining also provided evidence of adequate liability insurance.

Dakota Westmoreland published notices of the transfer application in the Bismarck Tribune and Beulah Beacon. We also sent notices to the appropriate agencies and landowners. No objections or requests for an informal conference were received on this application.

We also recommend that a condition be attached to the permit transfer approval to require Westmoreland Beulah Mining to incorporate the business entity, property ownership and related information into the existing permit by filing a permit revision no later than November 1, 2021.

Attached are the proposed motion, award form, and special condition for your consideration at the August 4, 2021 Commission meeting.
