**VIA E-MAIL**

Mr. Darrell Nitschke  
Executive Secretary  
North Dakota Public Service Commission  
600 E. Boulevard, Dept. 408  
Bismarck, ND 58505-0480

**RE: Rolette Power Development, LLC's Ten Year Plan for 2020-2030  
Case No. PU-20-\_\_\_\_\_**

Dear Mr. Nitschke:

Enclosed for filing are originals of the following documents:

1. Rolette Power Development, LLC's Ten Year Plan: 2020-2030;
2. Notice of Filing Ten Year Plan: 2020-2030; and
3. Certificate of Service.

Electronic copies of the enclosed documents were filed with the Commission today via e-mail. If you have any questions, please let me know.

Sincerely,

MOLLIE M. SMITH

MMS/rg  
Enclosures

Beth Berge (w/ enclosure)

70195455 v1

**TEN YEAR PLAN: 2020-2030**  
**Rolette Power Development, LLC**

**June 2020**

In accordance with N.D.C.C. § 49-22-04 and N.D.A.C. Ch. 69-06-02, Rolette Power Development, LLC (“Rolette Power”), submits the following Ten Year Plan for years 2020 through 2030.

- (1) A description of the general location, size, and type of all facilities to be owned or operated by the utility during the ensuing ten years, as well as those facilities to be removed from service during the ten-year period.

Rolette Power is a North Dakota limited liability company, and is owned jointly by M-Power, LLC, and Border Power, LLC, also North Dakota limited liability companies. Rolette Power is developing an up to 100.4 megawatt (“MW”) energy conversion facility known as the Rolette Wind Energy Project (“Project”) located south and west of the City of Rolette in Rolette County, North Dakota. On June 2, 2015, Rolette County issued a Conditional Use Permit (“CUP”) for the Project. On November 18, 2015, the North Dakota Public Service Commission (“Commission”) issued Findings of Fact, Conclusions of Law and Order (“Order”) granting Certificate of Site Compatibility No. 46 to Rolette Power for the Project (*see* Case No. PU-15-124).

A specific point of interconnection to the grid has not yet been identified. However, the Project may potentially interconnect to the grid at the following locations: (1) the Rugby-Glenboro 230 kilovolt (“kV”) transmission line owned by Otter Tail Power Company (“OTP”); (2) the Rolette-Rugby 115 kV transmission line owned by OTP; or (3) the Rolette 115 kV Substation owned by Western Area Power Administration. A 230 kV or a 115 kV generation-interconnection transmission line between two and six miles in length will need to be constructed to interconnect the Project to the grid, depending on which point of interconnection is selected. The specific location of and design details regarding such a transmission facility will be determined at a future date. Rolette Power plans to move forward with Project construction once an off-taker and interconnection point have been identified.

Other than the Project and potentially an associated generation-interconnection transmission line, Rolette Power does not own or operate, or have plans to construct, own, or operate, any generation or transmission facilities. The Project and any associated transmission line have an estimated life of greater than 10 years. As such, Rolette Power does not plan to decommission any transmission or generation facilities within the next ten years.

- (2) An identification of the location of the tentative preferred site for all energy conversion facilities and the tentative location of all transmission facilities on which construction is intended to be commenced within the ensuing five years and such other information as may be required by the commission. The site and corridor identification shall be made in compliance with the criteria published by the commission pursuant to section 49-22-05.1.

As noted above, the Project footprint is located south and west of the City of Rolette, North Dakota, in Rolette County. The specific location of any generation-interconnection transmission line has not yet been determined, but Rolette Power would obtain the necessary approvals for the route selected.

As set forth in the Order, the location of the Project complies with the Commission's siting criteria, including the exclusion and avoidance area criteria referenced in N.D.C.C. § 49-22-05.1 and identified in N.D.A.C. Ch. 69-06-08. Maps of the Project's designated site, and additional detail regarding the Project site, are provided in Case No. PU-15-124.

- (3) A description of the efforts by the utility to coordinate the plan with other utilities so as to provide a coordinated regional plan for meeting the utility needs of the region.

Rolette Power commissioned studies to determine which regional utilities may have a need for the wind energy capacity produced by the Project, and to identify various options for transmitting the Project's output from the Project site to the identified utilities' respective loads. The studies have assisted Rolette Power in identifying potential off-takers, as well as in its efforts to coordinate selection of the best option(s) for delivering the Project's output to the destination(s) designated by the ultimate off-taker(s).

Rolette Power has also initiated discussions with other parties who may potentially benefit from the Project, depending upon the ultimate transmission interconnection selection. As discussed above, in any of the scenarios currently under consideration, only a relatively short transmission line would be required between the Project collection substation and the point of interconnection to the transmission grid. When plans are finalized, Rolette Power will apply to the applicable transmission system operator for further study of the intended interconnection.

- (4) A description of the efforts to involve environmental protection and land-use planning agencies in the planning process, as well as other efforts to identify and minimize environmental problems at the earliest possible stage in the planning process.

Rolette Power employed a qualified environmental consulting firm to study and identify avoidance and exclusion areas within the Project site, in accordance with N.D.C.C. Ch. 49-22 of and N.D.A.C. Ch. 69-06-08. As noted above, Rolette County issued a CUP for the Project on June 2, 2015 (which is currently in the process of being renewed), and the Commission issued Certificate of Site Compatibility No. 46 for the Project on November 18, 2015 (*see* Case No. PU-15-124). Throughout Project development, Rolette Power has consulted with applicable local, state, and federal agencies and entities, and will continue to do so, as appropriate.

Additional information regarding Rolette Power's agency and entity contacts, and efforts to identify and minimize any potential environmental issues, is provided in Case No. PU-15-124.

- (5) A statement of the projected demand for the service rendered by the utility for the ensuing ten years and the underlying assumptions for the projection, with that information being as geographically specific as possible, and a description of the manner and extent to which the utility will meet the projected demands.

Rolette Power plans to sell the energy produced by its proposed Project to one or more utilities that need additional renewable energy in order to comply with state and/or, if applicable, federal renewable energy standards and objectives.

In 2007, the North Dakota Legislature enacted a statutory provision adopting the national "25x25" initiative, which establishes a goal of having not less than twenty-five percent of the total energy consumed within the United States come from renewable resources by January 1, 2025.<sup>1</sup> Additional renewable resources will be needed to meet the 25x25 initiative.

A need also exists for renewable energy produced in North Dakota to meet state renewable portfolio standards. Eleven of the Midcontinent Independent System Operator ("MISO") states currently have either mandated or voluntary renewable portfolio standards or policies.<sup>2</sup> Under current state standards, total United States renewable portfolio standard demand will increase from 310 terawatt hours ("TWh") in 2019 to 600 TWh in 2030.<sup>3</sup> Given existing renewable energy capacity, an additional 230 TWh increase in renewable resources will be required to meet demand through 2030.<sup>4</sup> In addition, the regional transmission grid is being expanded to deliver wind generation in a cost-effective manner; specifically, MISO's Multi-Value Project ("MVP") Portfolio enables 41 million megawatt hours ("MWh") of wind energy per year to meet renewable energy mandates and goals.<sup>5</sup>

Given Rolette Power's proximity to the MISO market, energy from Rolette Power's proposed Project may be utilized to meet the existing renewable energy needs of one or more utilities in the MISO region, as well as other utilities located in adjacent Regional Transmission Organizations/Independent System Operators, such as the Southwest Power Pool.

Thus, the renewable energy produced by Rolette Power's proposed Project will help meet a significant need for renewable energy.

---

Case No. PU-20-\_\_\_\_

**IN THE MATTER OF THE FILING OF A TEN  
YEAR PLAN BY ROLETTE POWER  
DEVELOPMENT, LLC**

**NOTICE OF FILING TEN YEAR PLAN  
2020-2030**

**PLEASE TAKE NOTICE** that Rolette Power Development, LLC, in accordance with N.D.C.C. § 49-22-04 and N.D.A.C. Ch. 69-06-02, filed a Ten Year Plan for the years 2020 through 2030 with the North Dakota Public Service Commission on June 10, 2020, and the Rolette County Auditor on June 10, 2020.

Dated this 10th day of June, 2020.

FREDRIKSON & BYRON, P.A.

**STATE OF NORTH DAKOTA**  
**PUBLIC SERVICE COMMISSION**

Case No. PU-20-\_\_\_\_

**IN THE MATTER OF THE FILING OF A TEN  
YEAR PLAN BY ROLETTE POWER  
DEVELOPMENT, LLC**

**CERTIFICATE OF SERVICE**

Mollie M. Smith, being first duly sworn, does depose and state that on June 10, 2020, she served the following document:

**Ten Year Plan: 2020-2030**

by placing a true and correct copy of said document in an envelope addressed as follows:

Ms. Valerie McCloud  
Rolette County Auditor  
102 2nd Street NE, P.O. Box 939  
Rolla, ND 58367

and depositing the same, with postage prepaid, in the United States mail at Minneapolis, Minnesota.
