RE: Revision to SRT Communications, Inc. Intrastate 800 Data Base Access Service Charges

The attached Section 13, Sheet 4, Revision 10, changes the 800 Data Base Access Services Queries to match NECA's Interstate Access Rates with an effective date of July 1, 2020.

Thank you,

A handwritten signature in blue ink that reads "Julie Lizotte".

---

**INTRASTATE SWITCHED ACCESS SERVICE**
**B. Switched Access Rate Elements – Local Transport Restructure (“LTR”) – Recurring**

11.	<u>Multiplexing</u>	<u>Monthly Rate</u>
	Per DS3-DS1 Arrangement	\$346.50

The Multiplexing rate applies when a High Capacity DS3 Direct Facility is connected with High Capacity DS1 Direct Transport.

12.	<u>800 Data Base Access Service Queries</u>	
	Per Query	
	Basic	\$0.005700
	Vertical Feature	\$0.006300

800 Data Base Access Service is provided to all customers in conjunction with FGC and FGD switched access service. A Basic or Vertical Feature Query charge is assessed for each query launched to the 800 data base. The Basic Query provides the identification of the customer to whom the call will be delivered and includes area of service routing which allows routing of 800 calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides this same customer identification function in addition to vertical features which may include: 1) call validation (ensuring that call originates from subscribed service area); 2) POTS translation of 800 numbers (which is generally necessary for the routing of 800 calls); 3) alternate POTS translation (which allows subscribers to vary the routing of 800 calls based on factors such as time of day, place of origination of the call, etc.); and 4) multiple carrier routing based on factors similar to those in 3.
