Re: Cost of Gas Adjustment (COG)  
Rate 88 and Rate 99  
Case No. PU-21-008

In accordance with North Dakota Century Code Section 49-05-05, Montana-Dakota Utilities Co. (Montana-Dakota) electronically submits a Cost of Gas (COG) – Natural Gas change pursuant to the terms of Rates 88. Montana-Dakota will not seek a COG – Propane adjustment for the month of January 2021 for Rate 99. In response to the COVID-19 pandemic, Montana-Dakota has provided an electronic copy only to further reduce the potential spread of the virus.

The COG Adjustment tariff (Rate 99), Section 2(b) provides that “Montana-Dakota shall file to reflect changes in its average cost of gas supply only when the amount of such COG is at least 25 (twenty-five) cents per dk.” For Rate 99 – Propane, the COG adjustment for the month of January 2021 results in a change of less than 25 cents per dk, and therefore, in accordance with the authorized tariff, Montana-Dakota will not seek a COG adjustment change for the month of January 2021.

The Rate Summary Sheet (190<sup>th</sup> Revised Sheet No. 3) showing the proposed natural gas rates reflecting the COG effective January 1, 2021 along with currently effective distribution rates is provided in Exhibit 1. The net effect of this filing, calculated pursuant to the terms of Rate 88, is an increase of \$0.609 per dk for residential customers and firm general customers, an increase of \$0.611 per dk for small and large interruptible customers, and an increase of \$0.608 per dk for Air Force interruptible customers.

Montana-Dakota purchases gas supplies under a number of contracts and secures transportation service over a number of pipelines for delivery of the natural gas purchased to Montana-Dakota’s distribution system to meet the demands of its customers. The commodity cost of natural gas has increased \$0.589 per dk since the October 1, 2020 rates due to an increase in the overall commodity price of gas. There have also been changes in pipeline rates resulting in an increase in the cost of gas of \$0.021 per dk, and there was a quarterly update of capacity release for an increase of \$0.013 per dk. In addition, a system wide change in contracted capacity has changed the total demand charges allocated to North Dakota for a decrease of \$0.014 per dk.

The following Exhibits are provided in support of the COG rates to be effective January 1, 2021:

- Exhibit 2 summarizes the cost of gas adjustment, the surcharge adjustment, and the grain drying margin sharing adjustment calculated pursuant to the terms of Rate 88 that will apply during the month of January 2021.
- Exhibit 3, shows the calculation of the current gas cost adjustment that will be applicable to Montana-Dakota's customers for the month of January 2021 along with an explanation of the reasons for the increase in the market price of gas. The average cost of gas for firm customers, adjusted for losses, is \$4.347 per dk.
- Exhibit 3a is marked as "Confidential" and contains confidential information regarding gas commodity pricing and is designated as Trade Secret in accordance with the Commission's February 19, 2020, Order in Case No. PU-20-008. Exhibit 3a – Public Copy is included in this filing.
- Exhibit 4 provides a summary of the change in pipeline rates occurring since the last COG filing and a copy of applicable effective pipeline rates along with supporting workpapers.
- Exhibit 5 shows the calculation of the return on storage inventory balances and prepaid demand and commodity balances using the calculation procedure set forth in Rate 88. The overall rate of return of 7.236% applied to the balances was authorized by the Commission in Case No. PU-17-295.
- Exhibit 6 shows the computation of the (over)/under recovered gas cost account balances.

The COG changes, calculated in accordance with Rate 88 and Rate 99, will amount to an increase of approximately \$1,922,000 for natural gas customers during the month of January 2021. All of Montana-Dakota's retail natural gas customers in North Dakota may be affected by this proposal. There were 111,295 natural gas customers in North Dakota as of November 30, 2020.

**Montana-Dakota Utilities Co.  
Market Conditions for Regional Natural Gas  
January 2021**

The established monthly price for January 2021 Rocky Mountain CIG Index is expected to increase by \$0.48/MMBTU to \$2.89/MMBTU in January from \$2.41/MMBTU in December 2020. The CIG Rocky Mountain Index is based on a price discovery survey by several natural gas periodicals, including “Inside FERC Gas Market” report and “Gas Daily” by McGraw-Hill Companies, of prices paid by willing sellers and buyers of quantities of gas in that region. That price is reflective of natural gas prices in the Rocky Mountain region and indicative of the supplies Montana-Dakota purchases for its requirements.

The EIA reported nationwide storage levels as of November 13, 2020 at 6.2 percent above the five-year average and 8.0 percent above last year’s balance.

The Department of Energy’s (DOE) Energy Information Administration (EIA) provides various publications on energy issues. The information is available on the DOE website: <http://www.eia.doe.gov>.
