Dear PSC;

I needed to attach additional pictures of damage but it will not allow me too, it may be my issue regarding size of files. So I will be sending a separate email with additional damage pictures. I want to make it clear, Austin Broden has been very responsive, he agreed to work with us to educate other farmers. In addition we did put additional pipeline markers in the area as he indicated he did not see them til he was approached. So at this time, I would ask the PSC to take into consideration his willingness to work with us and to educate others. He does know how to use 811 and has used it in the past. This was one of those situations, he finished in another field and thought he could get this field done before the end of the day. I will share the article with you when we get it done if you like. It will be going out to all of our CHS membership. Thanks
