Subject: BBCS comments

Hi Ryan,

See attached track changes document for the draft BBCS. I am also attaching a recent FWS Region 6 document with recommended buffers for wind development. Most of these are likely already built into your project with the exception of wetlands, since this is an area with lower wetland density than other sites in ND. I do recommend still considering wetlands in the BBCS and I made a note of that. I also recognize that some of your figures are contingent on final turbine placement.

Let me know if you have any questions.

Thank you,
Heidi

Subject: Bowman Wind - Updated BBCS
Attachments: BOW_Draft BBCS_2021-07-01.docx

Hi Heidi,

As we discussed yesterday, please find attached the updated BBCS. Of note, the offset acreage calculations using Shaffer Loesch GIS model have been updated for the now final layout.

Please let me know if you have any comments or concerns.

Regards,

-Ryan
