¹ Distance to closest edge of the residence is available only for those residences within the Project Area or very close to the edge based on planimetric data.

² This residence is a pending participant and currently in the process of executing administrative documents for a participation agreement.

³ This residence is a pending participant and currently in the process of executing administrative documents for a participation agreement. Should this landowner not sign, Turbine 41 would not be constructed and the resulting sound level would be 44 dBA L_{eq}.
