

Bowman Wind, LLC  
Bowman Wind Project  
Docket No. PU-21-121

**Late-Filed Exhibit No. 36 – Addendum Cultural Resource Report and State Historical Society of North Dakota Correspondence**

At the August 24, 2021 public hearing, Bowman Wind, LLC (“Bowman Wind”) agreed to provide the Addendum Cultural Resources Report and correspondence from the State Historical Society of North Dakota (“SHSND”) regarding the cultural and architectural history resource surveys conducted for the Bowman Wind Project (“Project”). Provided herewith are the following documents:

- Late-Filed Exhibit No. 36(a): Addendum Cultural Resources Report, dated August 27, 2021;
- Late-Filed Exhibit No. 36(b): SHSND Concurrence Letter, dated September 13, 2021 (for initial Cultural Resources Report, dated July 26, 2021); and
- Late-Filed Exhibit No. 36(c): SHSND Concurrence Letter, dated October 5, 2021 (for Addendum Cultural Resources Report, dated August 27, 2021).

With respect to the additional areas surveyed for the Addendum Cultural Resources Report, QSI (in consultation with the SHSND) recommends minor shifts of two collection lines and one access road within the survey corridor to avoid or create a buffer around identified resources. Bowman Wind will comply with these avoidance recommendations.

Additionally, to mitigate minor indirect (visual) impacts to two architectural history resources, QSI (in consultation with the SHSND) recommends that 1) additional historic research be conducted for a complete National Register of Historic Places (“NRHP”) site evaluation, 2) detailed recording be conducted if eligible and the landowner will allow it, and 3) if appropriate and the landowner will allow it, a NRHP nomination should be completed. Bowman Wind will comply with these mitigation recommendations, but as noted, will only complete recommendations 2 and 3 if applicable and allowed by the landowner.
