

Bowman Wind

Project Boundary

Lek B6 and Buffer

Lek B6

Four mile buffer (Lek B6)

Proposed Turbines

Turbines on Unbroken Grasslands *

Turbines Within 4 Miles of Lek B6 **

Removed Turbines of Most Concern to NDGF

Other Turbines

* As acknowledged by NDGF, a miscommunication occurred regarding sharp-tailed grouse lek surveys during previous agency coordination. NDGF and Bowman Wind discussed ways to minimize potential impacts, and Bowman Wind committed to avoiding all ground disturbing construction activities at these turbines between March 15 and July 15. See Supplement to Exhibit No. 19.

** As acknowledged by NDGF, these turbines are on tilled cropland at the edge of the species range. NDGF has alleged that T41 and T45 are within a PCA; however, Bowman Wind site-specific surveys indicate the turbine sites do not meet the definition of a PCA per the NDGF 2014 Greater Sage-Grouse Conservation Plan. See Supplement to Exhibit No. 19.
