Dear Resident,

Montana-Dakota Utilities Co. (MDU) has announced plans to retire and decommission the coal fired generating units at the R.M. Heskett Station. Because of this upcoming retirement, MDU is currently in the process of making modifications to our electric transmission system near the R.M. Heskett Station.

One of the modifications is to re-route a 230-kilovolt transmission line around the R.M. Heskett Station and terminate in a new position at MDU's Mandan Substation. In order to re-route a 230-kilovolt transmission line, MDU is required to submit a siting application to the North Dakota Public Service Commission. *when? what application*

The siting process requires any residence within 500 feet of the sited transmission line be made aware of the project and the potential for noise during construction and maintenance activities and/or during normal operations. ?

Included with this letter is the acknowledgement form that we ask you to sign and date, a map showing the transmission line relative to your residence, and a Land Rights Receipt showing the payment for your time. An IRS Form W-9 is required for payments to be made and must also be completed and returned.

Please complete and return within the included self-addressed envelope or call to schedule a time to meet to complete all paperwork.

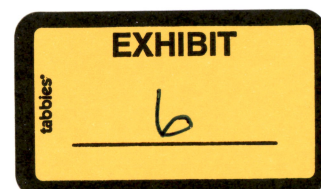

If you have any questions, please feel free to contact me at any time.

Thank you,

Tom Ressler
Land Agent

Bismarck, ND 58501

We, the residents of 5462 Rockhaven Harbor Road N, Mandan, ND 58554, Lot 3 of lot 8 of Lot A of N2 of 139N 81W of Section 10, Morton County, North Dakota.

We understand MDU is rerouting a 230 kV electric transmission line currently within 500 feet of my property. This project is due to the decommissioning of the Heskett Station in Mandan. The new project is placed all on MDU property.

We acknowledge the new project and have no objection.
