**Temple to god Zeus unearthed in Egypt**

**SAMY MAGDY**  
Associated Press

CAIRO — Egyptian archaeologists have unearthed the ruins of a temple for the ancient Greek god Zeus in the Sinai Peninsula, antiquities authorities said.

The Tourism and Antiquities Ministry said in a statement the temple ruins were found in the Tell el-Farma archaeological site in northwestern Sinai.

Tell el-Farma, also known by its ancient name Pelusium, dates back to the late Pharaonic period and was also used during Greco-Roman and Byzantine times. There are also remains dating to the Christian and early Islamic periods.

Mostafa Waziri, secretary-general of Egypt's

Supreme Council of Antiquities, said archaeologists excavated the temple ruins through its entrance gate, where two huge fallen granite columns were visible. The gate was destroyed in a powerful earthquake in ancient times, he said.

Waziri said the ruins were found between the Pelusium Fort and a memorial church at the site. Archaeologists found a set of granite blocks probably used to build a staircase for worshippers to reach the temple.

Excavations at the area date back to early 1900 when French Egyptologist Jean Clédat found ancient Greek inscriptions that showed the existence of the Zeus-Kasios temple but he didn't unearth it, according to the ministry.

**RIG**  
continued from page 7

fore tying on the hook, add a sliding bullet sinker, or utilize a pinch-on one after the rig is set up.

2. Start hook in bait. Once the hook is tied to the line, run the point of the hook through the nose of the plastic and thread the worm over the hook a little bit farther than the neck of the hook, located just behind the hook eye.

3. Run the hook through the bait. Carefully slide the hook through the hole made in the plastic and then turn the hook 180 degrees so it is upright once again. The eye of the hook can be inside the plastic a little or it can be out. This variation can be determined by experimentation and experience and preference of the fish and how

each bait performs in the water and on the hookset.

4. Run hook into bait again. Run the hook point back up through the worm. For the best horizontal presentation, it may be necessary to bend the plastic down into the hook gap a bit to get a horizontal lay of the bait. A true Texas rig will leave the point just below the top surface of the plastic. An "exposed" Texas rig will have the point laying flat along the plastic as in Figure 5. A "Texposed" version reinserts the hook point back into a little flap of plastic to keep it mostly weedless, but easier to get a hookset.

5. Hook point tight to bait. If exposed, the hook point should sit flat against the top side of the

plastic. This minimizes snags and weeds on the lure and makes it more hydrodynamic and natural looking.

6. Texposed option. As discussed above, re-insert the hook point in the plastic to prevent most weeds from getting on the lure.

As with any hook which is inserted and re-inserted into a bait, a Texas rigged offering will require a powerful hookset to drive the point into the mouth of the fish. For this tradeoff in needed power (and that cool baseball-swing hookset you see on televised bass tournaments) an ideal bait for exploring those places where bass lurk is created. It slips through weeds, slides over timber, and glides gently around dock posts with a gentle pull, getting to those spots that will increase spring angling success. Give the Texas rig a shot this season and find fast fishing worth a few extra turns.

**CATCH**  
continued from page 6

favorite species when the fame of being the greatest at something, even if just for a short period of time, is on the line. Now, if it was just the state record walleye, I might keep that without a second thought.

Certainly, I don't strive to specialize in one fish either. While I can appreciate the drive exhibited by folks that live to chase walleyes all weekend, or those under the influence of a muskie fever so intense it pushes their efforts to the extreme when it comes to gear, travel, boats and even off-season obsession projects, I find my afflictions shifting from week to week in any given season. With perch in the winter, pike as the ice gives way, crappies in the warming waters of spring, bass and walleyes all summer long, and trout in the cool flows of fall, the calendar presents so many options and so many ways of fishing for them, I'm simply unable to stick with one and figure out its seasonal moves and wants entirely.

These are the reasons I identify with Ash's sidekick Goh and appreciate his view of the universe of creatures that battle in the ultra-competitive arenas, and simply roam the forests, mountains and waters of the Pokemon world. Like him, I am a cataloger of events with a love of the variety the outdoors has to offer, and while trying to best all other anglers on the water, catching the biggest, most notable fish, or even becoming an expert for a certain species are all excellent pursuits on the water and I laud those who have the drive, skill and resources to do so; for me the challenge remains simply to catch 'em all...in our outdoors.
