Caliber North Dakota LLC

**BEFORE THE STATE OF NORTH DAKOTA
PUBLIC SERVICE COMMISSION**

**Caliber North Dakota LLC
8-inch Residue Gas Line – McKenzie County
N.D.C.C. § 49-22.1-23**

Case No. PU-21-___

**CALIBER NORTH DAKOTA LLC'S
REQUEST FOR APPROVAL OF TEMPORARY FACILITY OPERATIONS**

Pursuant to North Dakota Century Code section 49-22.1-23, Caliber North Dakota LLC d/b/a Caliber Midstream North Dakota LLC (“Caliber”), through its undersigned counsel, hereby submits this Request for Approval of Temporary Facility Operations (“Request”) seeking Commission approval for temporary facility operations and modifications as more particularly discussed herein.

1. Background

Caliber is a limited liability company formed under the laws of Delaware with its principal office located at 950 17th St., Ste 1000, Denver, Colorado 80202. Caliber is authorized to do business in the state of North Dakota and is in good standing with the North Dakota Secretary of State. Caliber’s corporate paperwork is provided as Attachments A to D hereto, and includes copies of the following documents:

- Exhibit A: Caliber North Dakota LLC’s Certificate of Formation filed with the Delaware Secretary of State;
- Exhibit B: Caliber North Dakota LLC’s Certificate of Good Standing issued by the Delaware Secretary of State;
- Exhibit C: Caliber North Dakota LLC ‘s Trade Name Renewal (Caliber Midstream North Dakota LLC) filed with the North Dakota Secretary of State; and,

- Exhibit D: Caliber Midstream North Dakota LLC's Certificate of Good Standing issued by the North Dakota Secretary of State.

Caliber is engaged in the business of crude oil and natural gas gathering, transportation, treating and processing, and also provides produced water transportation and disposal by pipeline.

2. Description of Facility

Caliber owns and operates an existing 2.62-mile long, eight-inch diameter pipeline located in Township 150 North, Range 101 West, Section 36 and Township 150 North, Range 100 West, Sections 29 and 32, McKenzie County, North Dakota (the "Project"). The Project was constructed in August of 2014 and does not currently have a Commission issued siting certificate or permit. The Project provides a connection from Caliber's mechanical refrigeration natural gas processing Hay Butte Plant¹ for delivery to the Northern Border Pipeline ("Northern Border"). Natural gas is delivered to the Hay Butte Plant for processing through Caliber's low-pressure gas gathering system, which is connected to various Bakken producers in McKenzie County. The Project currently delivers intermittent flows between two and eight million cubic feet per day ("mcf/d") of treated natural gas from the Hay Butte Plant to Northern Border. A map providing additional information regarding the Project's location and interconnection is attached hereto as Exhibit E. An existing compressed natural gas ("CNG") truck fueling facility is located adjacent to Caliber's Hay Butte Plant. In addition to supplying Northern Border, residue gas from the Hay Butte Plant also flows directly to the truck fueling facility via a separate non-jurisdictional facility piping connection.

¹ Caliber's Hay Butte Plant is a non-jurisdictional facility under the Commission's regulations because the plant is not designed for or capable of manufacture or refinement of 100 mcf/d of gas or more. See N.D.C.C. § 49.-22.1-01(6)(a).

3. Scope of Request

Caliber submits this Request in compliance with the provisions of N.D.C.C. ch. 49-22.1. Section 49-22.1-23, N.D.C.C., permits the temporary operation of facilities upon Commission approval. Specifically,

[t]he commission may approve temporary operation of facilities or a temporary variance from approved construction, operation, or maintenance of facilities upon a showing of good cause and a utility certification that the activities will have no adverse impacts upon the welfare of the citizens of this state or the environment. The commission may a temporary approval or variance without the necessity of notice, publication, or public hearing

N.D.C.C. § 49-22.1-23. In accordance with the foregoing, Caliber respectfully requests the Commission issue interim approval authorizing the existing Project's continued operation and minor modifications to the Project at the existing interconnection with Northern Border to allow gas to flow bi-directionally on the Project (the "Modification").

Bidirectional flow capability will enhance the Project by allowing it to transport gas received from Northern Border for delivery to the trucking facility adjacent to the Hay Butte Plant. Gas flows from Northern Border to the Project would be on an intermittent and seasonal basis with minimal volumes ranging between approximately 0.1 and 5 mcf/d. Caliber anticipates these volumes will be delivered by actual flows of gas, and by displacement. Upon delivery to the trucking facility, gas from the Project would be loaded into trucks and CNG would be delivered to production facilities for use as fuel in hydraulic fracturing operations and consumed wholly within North Dakota. Caliber does not own the CNG trucking facility and would not take title to any gas flowed from Northern Border. The facilities are anticipated to be placed in-service by November 1, 2021.

Reconfiguration of the Project to support bi-directional gas flows from Northern Border to the CNG trucking facility does not require construction of a new pipeline. Modification and

reconfiguration will require only minor activities. Activities to install the Modification will take place on land owned by Caliber, thus there will be no impact to landowners. Caliber will not be taking customers from any other pipeline or replacing pipeline capacity that customers are currently using on another pipeline. To facilitate the Modification, Caliber estimates it will need to install approximately 10 to 20-feet of above-ground piping at the Northern Border interconnect, and approximately three connection valves including one pressure regulator. Northern Border operates the interconnect and Caliber owns some of the equipment there. Northern Border will need to install a tee, valving, and meter to allow the buyback at the interconnection, and Caliber will need to install a regulator, a tee, and valving to connect the buyback.

4. Demonstration of Good Cause

Approval of Caliber's request is in the public interest. The Project's continued operation and Modification support operations in the Bakken. The Project minimizes flaring from the state's oil and gas production in support of meeting the gas capture goals of the North Dakota Industrial Commission. Additionally, the Project's operation and Modification will permit clean burning CNG to be used as fuel for hydraulic fracturing equipment in North Dakota, replacing diesel fuel. The Project Modification will also facilitate additional operational flexibility on Northern Border. Interim approval is necessary to meet in-service dates and to implement the Modification in advance of the approaching winter season to utilize North Dakota's limited remaining 2021 construction window. For the above reasons, Caliber respectfully requests interim approval be granted as soon as possible.

In accordance with N.D.C.C. § 49-22.1-23(a), a utility certification in support of this Request is attached hereto as Exhibit F. The Project and Modification are not anticipated to adversely affect the environment or the citizens of North Dakota. Activities are minor in nature, include installation of above-ground infrastructure, and will occur entirely within land owned by

Caliber. Thus, installation activities for the Project Modification will have negligible impact. Furthermore, the Project is comprised of existing infrastructure that has been operating without incident since 2014. The Project has no history of releases and is inspected annually by Commission pipeline safety personnel which began in 2016.

Caliber has retained an environmental consultant to evaluate and study the Project and draft a siting application pursuant to the Commission's siting criteria and applicable regulations and rules set forth in N.D.C.C. ch. 49-22.1 and N.D. Admin. Code art. 69-06. Caliber is diligently working with its consultant to complete studies, surveys, and agency consultations, which are underway, and a siting application will be submitted in a timely and expeditious manner. The Commission's interim approval is requested in advance of the Project's forthcoming siting application, which is anticipated to be finalized and filed with the Commission on or before November 30, 2021.

For the reasons set forth herein, approval of Caliber's request is warranted. Therefore, Caliber respectfully requests the Commission approve this Request for Approval of Temporary Facility Operations and authorize: (i) the 2.62-mile Project's continued operations; (ii) the referenced Project Modification and associated installation activities to facilitate bi-directional flow; and (iii) any such other relief as the Commission deems just and proper.

Signed this 15th day of October 2021.
