Re: Public Service Commission  
Demand Response Investigation  
Case No. PU-22-145

Montana-Dakota Utilities Co. (Montana-Dakota) herewith electronically submits the number of customers that are currently eligible for the Company's demand response rate.

Pursuant to the North Dakota Public Service Commission's request, Montana-Dakota has reviewed customer usage to determine how many North Dakota electric customers have an electric load that would allow them to qualify for the Company's Interruptible Large Power Demand Response – Rate 38. In order to qualify, customers must have “a demand of 500Kw or more for its interruptible load and available for interruption for up to 100 hours annually.” Based on this criteria, Montana-Dakota has 78 customers in North Dakota that meet the minimum demand requirement. Rate 38 is an optional rate which may not be appealing to certain customers because of its interruptible requirement.

As discussed at the public hearing, Montana-Dakota currently has four customers taking service under Rate 38.
