Subject: electrification of transportation

***** **CAUTION:** This email originated from an outside source. Do not click links or open attachments unless you know they are safe. *****

1. **END all subsidies** for electric vehicles and the companies that make them.
2. **END all subsidies** for electric vehicle charging stations. Let those folks pay for their "fueling places" the SAME way the rest of us pay for "gas stations"--by allowing the vendor to make enough profit for a viable business. If the business is not viable, it shouldn't exist.
3. **END the War on Cars** in general, the war on internal-combustion vehicles in particular. Stop stealing funds from the motor-vehicle fuel tax to destroy traffic flow via "traffic calming", "complete streets" and "Zero Vision" nonsense.

In short, STOP WASTING TAX MONEY on politically-correct but **ethically-corrupt** "projects" that weaken or stress the already-fragile power grid. DO NOT artificially slow traffic flow and create congestion, and DO NOT prioritize the 2% of transportation that isn't motor vehicle based, at the expense and frustration of the 98% majority. Motor vehicle owners/operators are the ONLY

transportation group that pays EXTRA for their infrastructure, and we're being shit upon by corrupt politicians and Appointed Idiots.

Raise all the speed limits to AT LEAST the 85th Percentile of FREE-FLOWING traffic. Do not be like the Grand Forks "Traffic Engineers" who tried to deceive the GF City Council by presenting fraudulently-obtained "85th Percentile" (of congested traffic) speed data. We have ENOUGH dirtbags already.

Schurkey
