We, the non ev owners, should not have to support any aspect of this. We shouldn't be subsidizing manufacturing of the vehicles or the electricity production or distribution and delivery sites for these vehicles. If we are going to pay for this we should be subsidizing gas and gas stations as well as building normal vehicles. Also there needs to be road tax built in to offset the lose of the fuel taxes that would normally be collected. I DO NOT support any activity to promote anything with EV's. Businesses should be charging the ev users to advance the industry.
