**In re: ONEOK Bakken Pipeline, L.L.C.
Spring Creek II Pump Station
Case No. PU-22-164
Our File No. 072591-000010**

Dear Mr. Kahl:

Enclosed for filing on behalf of ONEOK Bakken Pipeline, L.L.C. (“ONEOK”), please find correspondence from ND Department of Environmental Quality granting ONEOK’s application modification for permit to discharge in the above-referenced matter.

Please feel free to contact me if you have any questions. Thank you.

Sincerely,

/s/ Casey A. Furey

Re: NDPDES Permit No. NDG070879

We have received your modification to **NDG070879** and have granted authority to discharge under the General Permit for Temporary Discharge Activities – Permit NDG070000. This permit has been issued by the North Dakota Department of Environmental Quality (department) with the understanding that all other applicable permits and permissions have been obtained for the start of the following project. The application indicates that the discharge(s) will consist of hydrostatic testing of new facility infrastructure and piping associated ONEOK's Spring Creek II Pump Station.

<u>Discharge Point</u>	<u>Volume (gallons)</u>	<u>Location</u>	
002H	10,000	Spring Creek II Pump Station	TWN 148N, RGE 102W, SEC 3; McKenzie County

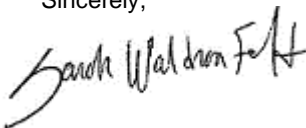

In the event of a discharge, all discharge points shall be inspected daily. On a daily basis, record the total volume of discharge and make a visual inspection for Oil and Grease. Analytical parameters for pH and Total Suspended Solids (TSS) shall be waived for this project. The parameter for Chlorine shall be as the water source has been chlorinated. The parameter for Oil and/or Grease is waived unless a sheen is observed in the discharge; if observed then collect a sample for Total Petroleum Hydrocarbon (TPH). The department shall be contacted on all findings of Oil and Grease. All discharges made directly to a surface water body or wetland shall be inspected closely in order to minimize any turbidity issues. Best Management Practices (BMPs) must be used to minimize the impact of the discharge.

ADDITIVES: No additives were reviewed for this project.

The department has granted your request for a temporary waiver from electronic reporting. The granted waiver is not transferable. The waiver is effective September 16, 2022 and **will expire on March 31, 2025**. Enclosed are Discharge Monitoring Report (DMR) forms for your use. If someone else is responsible for the submittal of the DMRs, please forward this letter and the enclosed forms to them. The reports cover three months; the dates and location have been filled out. If no discharge occurs during the reporting period, check "No" in section one. The reports must be post-marked by the last day of the month following the end of each reporting period. All original DMR forms should be sent to the department and a copy should be kept for your files.

If any other testing is conducted during this project, copies of the results of any such test should be forwarded to the department. **Should you wish to no longer be covered under this permit, you must submit a written request to terminate and cite the reasons for termination.** Coverage shall be maintained until a written notification to release has been issued to the permittee by the department. Should you have any questions about your permit or how to complete the DMRs, please contact me at (701) 328-5237.

Sincerely,

Sarah Waldron Feld
Environmental Scientist
